Contact Person(s) Marc T. Hansen

Nature of Contact Mr. Hansen called to respond to the information request I mailed him on July 13, 1994

Substance of Communication Mr. Hansen told me he bought the land with water rights 33-07030 and 33-02062 about two years ago. At that time, he said, the ^{#2} Blaine County Canal shares were sold to Mr. J. Panchieri. He said the ^{#2} two wells are not connected by a buried mainline.
^{#1} The corners are not being irrigated because there has been no money to extend mainlines and to buy hand lines. Instead the corners were put into federal cropland set aside two years ago (wheat + barley program).

RE: Snake River Basin Adjudication (SRBA)
Butte County -- A33-07030 and A33-02062

Dear Mr. Hansen:

While reviewing the SRBA claims listed above, I noticed that you have recently installed two center pivots on the claimed place of use for these rights. Water right transfer #3656, approved in 1990, indicated your intention to do so. As a result of the change, I have some questions about your current irrigation practices. Your answers will help me prepare accurate descriptions of your water rights for inclusion in the Director's Report to the SRBA court.

1. On the latest ASCS information that I have for your land, most of the corners (outside the circles) are listed as "OUT". When I was in your area a couple of weeks ago to review the Blaine County Canal system, it appeared that all of your corners are dry. Do you intend to begin irrigating those corners? If so, when and by what means? *No. not w/ Tx*

2. Although the Blaine County Canal Co. has claimed your land as part of the place of use for its rights, we saw no evidence that BCC water is used or can be used on the land under the pivots. What is the status of BCC water use on your land? *NOT USED SINCE 1992 SOLD TO PANCHINI*

3. Is there a buried mainline that connects the two wells? *No*

I would appreciate a response from you by August 10, 1994.

If you have any questions, please contact me at (208)327-7934 in Boise.

Sincerely,

Shelley Walter Keen

MEMORANDUM

TO: FILE

FROM: TIM LUKE

DATE: June 7, 1990

RE: TRANSFER APP. NO. 3656/LICENSE NO.S 33-2062 & 33-7030

=====

This transfer seeks to add a point of diversion to two overlapping place of use groundwater licenses which presently share the same single well or point of diversion.

Both Ron Carlson and Keith Wilson of our Eastern Region office have written memos to the file expressing some concern that allowing an additional well will result in a rate of diversion that exceeds the licensed amount allowed for both licenses. Ron however has noted that the licensed volume parameter may allow an increased diversion rate and has suggested that the volume is the more important parameter. I concur with Ron's analysis and recommend that the transfer be approved. I further suggest that we reiterate the combined rate of diversion and volume condition issued with license no. 33-7030 and shown below. The 2.85 cfs flow rate, if taken over a 24 hr/day period, will produce sufficient volume for 312 acres over the entire irrigation season for this area.

Conditions of Approval:

The maximum combined rate of diversion and annual volume of water under right no.s 33-2062 & 33-7030 shall not exceed 2.85 cfs and 936 afa.

my conversation with Marc Hansen yesterday revealed that the Blaine County Canal shares were removed from this land only recently. I am concerned that the removal of the surface water has changed this right from a supplemental right to a primary right. If so, the priority of this right may need to be advanced to prevent injury. more investigation is warranted.

Both wells appear on the 1977 USGS O.G. *Note Their 10-acre tract locations are listed in the recommendations, below. The 10-acre descriptions on the USGS O.G. and on the map prepared by S.W.
