Re: Recommendations.

The surface rights were originally claimed on a permissible place of use basis, showing enlargement to 871 acres. Due to the late date of getting started on this file, I did not have time to have the claimant come in to file and enlargement claim. Therefore the surface rights are recommended to the irrigated acres (315) identified in the original place of use authorized by transfer 781. The rights sum to 6.8 cfs; 315 acres @ 0.02 comes to 6.3. The length of ditch probably justifies 0.5 cfs of transmission loss, if challenged I will need to perform the Worstell analysis.

Claim A33-02114 is based upon a license and will be recommended as an accomplished transfer to the claimed place of use, up to the acreage limitation of the original license.

Claim A33-10057 is basically an enlargement of 33-02114, in that no extra cfs were developed at the time the extra ground was brought into production. However the development commenced prior to March, 1963, so this is coded as beneficial use. Watermaster records and the affidavit supporting priority date indicate no addtl. cfs. Combined rate and volume limitations reflect system capacity. Recommended for 315 acres in claimed area of POU per GIS, even though claim was only 305. There are enough acres on other claims, I think, for this addition.

Claim A33-07192 is recommended as licensed, even though licensed for more acres than claimed. Again, overlaps w/ surface claims and surface claims recommended at significantly reduced acres should cover this.

Comments on each record detail remarks limiting cfs and acreage.

33-02114 and 33-10057 are diverted from a well, injected into the Little Lost River, and rediverted near the place of use. A remark allows the continued watermaster practice of charging an appropriate shrink to these rights.

33-00023A is a Sawmill Creek right with historical shrink and change in source to Little Lost River. It received Carter's shrink remark.
