MEMORANDUM

TO: FILE NOS. 33-07006 & 33-07057

FROM: PAM SKAGGS³³/STATE OFFICE

SUBJECT: TRANSFER NO. 4839

DATE: January 7, 1997

sk E 1-14-97

=====

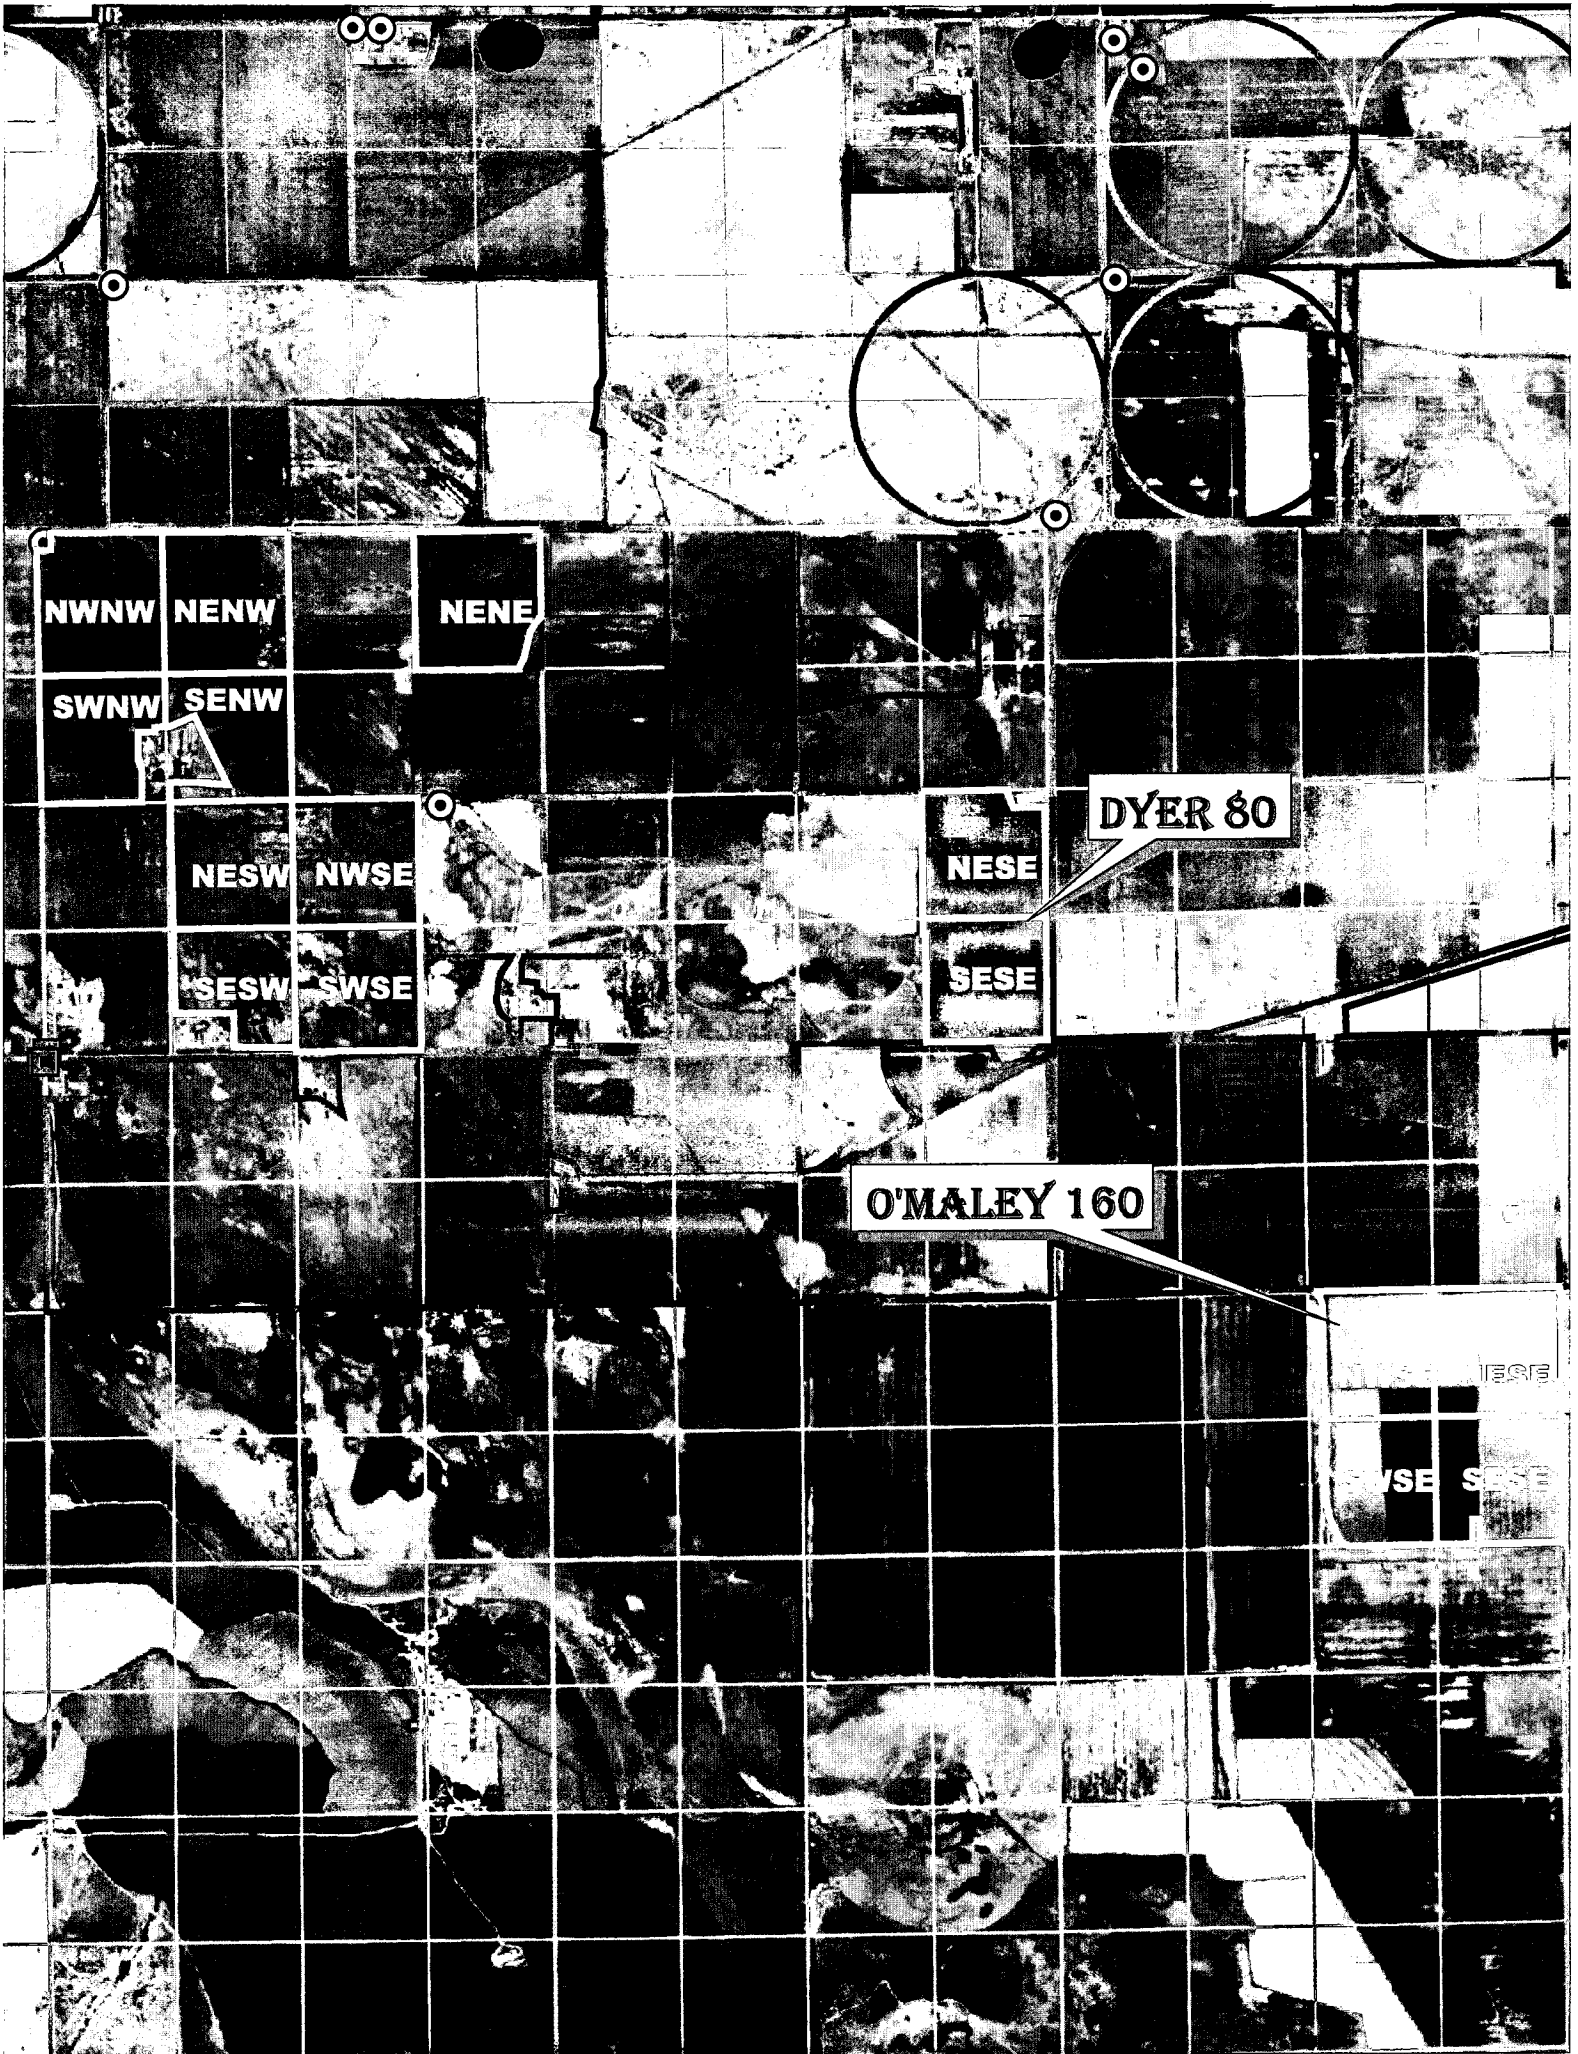

Transfer No. 4839 was filed to change the point of diversion and place of use under a portion of Right Nos. 33-07006 and 33-07057, splitting each right into parts A and B.

The applicant owns the original place of use and will dry up the corners of his fields as described to transfer 49 acres to the proposed place of use. These groundwater rights overlap with surface water rights at both the original and new location.

The application was filed by the owner of the original rights who mistakenly identified the wrong quarter-quarter description of the proposed new point of diversion for the use of Isham Farms. The application originally identified the point of diversion in the NWNW, Section 36 and was later corrected by region staff to reflect the NWSW, Section 36, both within T05N, R29E.

Season of use and diversion volume were adjusted to current standards. The combined limit under Right No. 33-07006A was reduced to reflect the removal of 0.24 cfs from the combined rights and avoid expansion of use.

✓ Recommended conditions include drilling permit requirements, future measuring device & annual reporting, supplemental groundwater, irrigation overlap, right-of-way, permissible place of use and standard transfer conditions.

RESEARCH AND RECOMMENDATIONS FINDINGS SUMMARY

COMMENTS: Based on review of transfer no. 472 it appears this right was originally diverted at or near the Hartman diversion. The watermaster states that it has long been standard practice to transfer 2 cfs (1/3) under the 9/1/1879 Isham rights from the Hartman diversion to the Isham-Amy headgate downstream when the junior priority rights at the Isham-Amy diversion are cut. SRBA claims include both points of diversion for these rights. The watermaster states that a 10% loss is charged to the 2 cfs which is moved downstream to the Isham-Amy ditch.

As this transfer or rotation has been accomplished and in place prior to 1987, it is recommended that this practice may continue but that the actual reach loss which is determined between the Hartman diversion and the Robert Mays diversion be assessed to the delivery of the 2 cfs.
