Case No. 39576)	**For Water Right 33-10086**
)	

On November 30, 2000, a ***Special Master's Report and Recommendation*** was filed for the above water right. No Challenges were filed to the ***Special Master's Report and Recommendation*** and the time for filing Challenges has now expired.

Pursuant to I.R.C.P. 53(e)(2) and ***SRBA Administrative Order 1***, Section 13f, this Court has reviewed the Findings of Fact and Conclusions of Law contained in the ***Special Master's Report*** and wholly adopts them as its own.

Therefore, IT IS ORDERED that water right 33-10086 is hereby **decreed** as set forth in the attached ***Partial Decree Pursuant to I.R.C.P. 54(b)***.

DATED JAN 16 2001.

Re: B33 Irr POD's objected to by BLM

POD LOCATION

T11N R26E S10 NWNENE
This legal description defines the beginning of a channelized portion of Sawmill Creek. Apparently back in the 1920'-1930's there were several attempts tried to preserve water from Sawmill Creek because the stream would "break'. Among them were things like a canal dug from Sawmill Creek to Summit Creek and a channelization project aimed at cleaning and to some extent straightening the Sawmill Creek channel as it flowed across Mud Flats (ref: OQ U-82).

In review of the adjudication claims from Sawmill Creek and the Little Lost River, it was initially considered that the source(s) could all be Little Lost River since it was difficult to determine where Little Lost River started and Sawmill Creek ended. Seeing no difference in source recommendations of Sawmill Creek claims were changed to Little Lost River. The Preliminary Director's Report was filed only to find that Sawmill Creek now occasionally breaks at the shearing corrals, which is about half-mile upstream from the confluence of Sawmill Creek and Summit Creek; The beginning of the Little Lost River. This new information seriously impacted recommendations since the Sawmill Creek claims, now changed to Little Lost River, became senior to the junior Little Lost River rights, causing injury to the junior Little Lost River appropriators.

Ultimately, the source issue was changed back to Sawmill Creek. Now a problem arose where a Point of Diversion had to be defined for the Sawmill Creek claims since actual deliveries are made from Little Lost River (except 33-00107 which is a true Sawmill Creek right, but, Decreed as a Little Lost River right). The 1927 Decree states "at the mouth of Sawmill Creek". However, there were no rights diverted at the mouth of Sawmill Creek. And, the dilemma of where was the mouth of Sawmill Creek. In consideration of the channelization project aimed at preserving waters of Sawmill Creek it was determined that the channelization had in-fact changed the streambed to a canal, saving water. Therefore, the beginning of the channelization would now become the Point of Diversion and the ending of the channelization would be a Point of injection back into the Sawmill Creek stream channel. The Point of Injection is near the shearing corrals, about half-mile upstream from the confluence of the streams. The Sawmill Creek claims Point(s) of Diversion are recommended as Points of Re-diversion from Little Lost River at or near their respective Place(s) of Use. This recommendation preserves both the source and the Sawmill Creek priority dates and, forgoes the injury issue of junior Little Lost River rights.

T9N R27E S4 SWNWNE
This objection is a true error. Apparently a typographical error was made during the recommendation process. The TRUE Point of Diversion should read T9N R26E S4 SWSWNE. The claimant, Mr. Waymire has been notified and is now aware of the issue.

33-00085
00087
00130

T11NR27E S31 NESESE
BLM believes this POD should read S31 SENESE based on GPS data. However, during the field exam of these claims several Points of Diversion were identified to include the one in question. The recommended POD in-question is an actual Point of Diversion where an unnamed stream intersects with the collector ditch and can be verified using OQ V-32. The site proposed by the BLM is a drainage that was dry during the field exam, thus no recommended POD.

33-00065
33-7087

T6N R28E S2 SESWSW
Specifically named is SRBA claim 33-10995. This claim identifies private lands historically irrigated by the Hawley's, later sold without water. The Point of Diversion used during the irrigation era is on BLM but is now longer used. The claimant filed this SRBA claim and Transfer No. 4551 in an effort to preserve the acreage irrigated by surface water. The transfer is in-place awaiting the BLM objection to prompt IDWR to review and act. However, the transfer is currently protested.

T6N R 28E S11 SESENW
This is an historic Point of Diversion dating back to the late 1800's (according to the water right priority dates, 1885-1891) and is one of three serving the ranch. One of which previously mentioned above, T6N R28E S2 SESWSW. The other is within the private holding of the ranch.
33-10996 is an enlargement claim for acres on BLM lands that were historically irrigated by the Hawley's and is part of the Transfer No. 4551 aforementioned. BLM is aware of this claim and supports the transfer of acreage to private lands. As mentioned previously, the transfer is protested.

33-00051 thru
33-00060

T7N R28E S21 NWNWSW
According to the Proof of Beneficial Use filed for this right (33-07010) this well dates to the 1940's. However, the Licensed date of priority was March 19,1971, but then Transfer No. 3809 was filed to "unstack" surface and groundwater rights. As a result, the priority date of the well was advanced to July 2, 1990. Surface water decreed to this ranch date to 1885 to 1891.
This particular well dating to the 1940's (unsupported evidence of prior claimant) was located according to the initial survey dating to July 9, 1890, which no doubt established fence lines. A resurvey of the East line of Section 21 was done in August 1941. Then, in 1978, another resurvey was done as, evidenced by the monument caps. This 1978 resurvey puts the TRUE Point of Diversion of the 33-07010 well in the NENWSW (a BLM QQ). However, this matter was discussed with Ms Deena Teal, BLM, Idaho Falls District Office, in October of 1996, shortly after the discrepancy was found. Ms Teal indicated, at

Rocky Ross

that time, that since the well predated some 1976 ruling, by which BLM operated, they (BLM) would not protest the actual POD.
This basically explains the history of the well and the recommendation; however, the listing of the POD as NWNWSW is clearly an error. The CVR shows the POD to be located as NENWSW Sec. 21, which is accurate.

T8N R28E S31 SWNWSE
This POD defines a well used solely for mitigation and is defined as an amendment to the 1927 decree as a Judgement against Orville Nicholson, 1954. The recommendation does define a Place of Use; however, this POU is by exchange with surface waters as defined in the Judgement. The period of use is 4/1 to 7/15 annually, when all this well does is deliver water to the river. The Objection is not to the Point of Diversion, but rather to the Point of Injection. And, in-fact, as recommended this Point of Injection is accurate.

33-02128

T6NR29E S31 NWSWNW
This is another typographical error. The recommended POD should read T6N R29E Section 30 NWSWNW. There is a pending Transfer to correct the actual POD location to T6N R28E Section 25 NESENE.

Subject: Sawmill Creek Rights

This morning we met via teleconference with Dave Tuthill and Peter Anderson. One of the things we discussed was the Sawmill recommendations. During our call, Bill Stauffer called and reported that he had discussed the Sawmill recommendations with others, including Don Isham, James Andreason, and David Andreason. They all concur with the proposals in the January 6 letter. James Mays has sent us written concurrence.

Per Dave Tuthill's instructions to Al and me, I have gone ahead and changed the source of Sawmill Creek rights back to "Sawmill Creek, tributary to Little Lost River." The point of diversion is 11N 26E section 10, NWNENE, and the point of injection is 10N 27E section 18, NWSESW. The former points of diversion have been identified as points of rediversion. I removed any comments relating to change of source and I removed condition C02.

The rights I changed were:

R33-00023B
R33-00030
R33-00043
R33-00077
R33-10070
R33-10073
R33-10084
R33-10086

I'll put a new profile report and a copy of this memo in each file.

There were other Sawmill rights which I did not change. These are:

R33-00038 1927 decree & claim list source as Little Lost River
R33-00096B Recommended w/ source "Summit Creek"
R33-00107 Recommended originally w/ source "Sawmill Creek"

33-10464 Stockwater claim already PD w/ source "Sawmill Creek"

Sawmill Creek Water Users
Water District 33
Howe, Idaho, 83244

Dear Watermaster and Water Users:

Based on the information available to the department at the time, Idaho Department of Water Resources recommended the Little Lost River as the source for water rights originally decreed with a source of Sawmill Creek. This change effectively puts the Sawmill Creek rights on a par with Little Lost River rights.

Through the Notice of Error process, additional information has been brought forward indicating that the recommendations should be changed to show the source as "Sawmill Creek" as originally decreed. This change would afford protection to holders of Little Lost River rights that have priorities junior to May 25, 1891, the priority for decrees from Sawmill Creek.

The 1927 decree lists "the mouth of Sawmill Creek" as the Point of Diversion, with implied injection into the Little Lost River and implied points of rediversion near the places of use.

It appears that the basis for these Sawmill Creek rights was a channelization or improvement of Sawmill Creek. We have tentatively selected the apparent beginning of the channelization as the recommended Point of Diversion, as illustrated on the attached maps. The confluence of Sawmill Creek and Summit Creek would be recommended as the Point of Injection, and the headgates on the Little Lost River as Points of Rediversion.

To administer Sawmill Creek rights separately from Little Lost River rights, the watermaster would have to measure the contributions of Sawmill Creek to the Little Lost River. The attached maps show the apparent historical location where these measurements were taken and a proposed alternate measurement point. The measurement point would not be specified in the water right recommendations but would be a practical matter for the watermaster's administration.

Please review these proposed changes to the recommendations and the enclosed maps and respond with the attached form. Feel free to mark the maps and add additional comments as needed. Please return any comments by January 15, 2000.

Sincerely,

Ernest Carlsen
Water Rights Supervisor

A33-10086 10/21/1999 Bruce A. Counton

Analysis after disallowal of A33-00002 & A33-10084.

1) Available "Early Season" WR w/ those two removed:
"Early" Dry Creek Flow 10 c/s - 1997 Waterwaster records, attached to 8/19/99 memo re: disallowal.

33-00068	4.28
33-00075	3.43
33-00004	12.00
33-00005	145.00
	174.71

2) Generous analysis of system capacity and irr. requirements point to ≈ 180 c/s. See 8/19/1999 and 8/26/1999 memos. Historical deliveries approach this amount.

3) Attached affidavits justify historical delivery of avail. high water to BCC.

4) 180 - 174.7 = 5.3 c/s

5) Priority must be later than decree date; if right had existed earlier it would have been decreed. (BC investment was party to decree).

I, David Andreason, of Howe, Idaho, am Watermaster of District 33. I have filled that position since 1984. I have personally delivered the waters of Sawmill Creek as follows:

789 inches	1891 decrees
all water above 1891 decrees	Blaine County Canal Co.

In that time no one has protested this delivery or made other claims on the waters of Sawmill Creek.

I have in my possession a notebook which belonged to Neph Hansen, who was Watermaster for 40 years, approximately. To the best of my knowledge and according to this notebook, Mr. Hansen and his successors delivered the waters of Sawmill Creek as I have been doing.

Signed David S. Andreason

STATEMENT OF DIVERSION
OF
WATERS OF SAWMILL CREEK

I, Don Isham of Howe, Idaho, am very well aquainted with the historical use and diversion of the waters of Sawmill Creek. I became the ditch rider of Blaine County Canal Company in 1960 and filled that position intermittently until 1986. In 1965 I was elected Chairman of the Board of Directors of the Company and served on that board untill 1986.

I certify that the spring flood water of Sawmill Creek has been delivered to Blaine County Canal Company all the time that I have been aquainted with the Canal Company affairs. To the best of my knowledge this use goes way back to the first years of the Company. It has been historically treated as a 1908 right, diverting and putting to beneficial use all the water in Sawmill Creek above prior decrees.

Signed: Don Isham

Date: 1-25-1990

Notary: Virginia A. Gray

AFFADAVIT

Evidence of Priority

I, William C. Stauffer, resided at Howe, Idaho from 1909 to the 1930's. My father, Henry Stauffer, began farming in 1909 using Blaine County Canal Company water for irrigation. As my father was one of the original stockholders in Blaine County Canal Company, I hereby certify that Sawmill Creek water has a 1908 priority date; from knowledge given to me by my father as he irrigated with the water from 1909 until 1958.

Signed William C Stauffer

Date April 5, 1993

Notary Michael C Mapes

(3)

Evidence of Priority

I, Jesse Strope, am a resident of Howe, Idaho and am very well acquainted with the historical use and diversion of the waters of Sawmill Creek. My father, John M. Strope, homesteaded in the Little Lost River Valley in 1909, and at that time began using Blaine County Canal Company water. He was one of the original stockholders in Blaine County Canal. His farm was one of the first homesteads under the Blaine County Canal and the consequent irrigation development. The Strope family has been in continuous operation of the farm in Howe since 1909. I am certain the Sawmill Creek water was a 1908 priority date and has been used continuously since Blaine County Canal acquired the water. I certify this information is to the best of my knowledge due to the information passed on to me by my father. I also certify the accompanying photocopies of the original headgate on Blaine County Canal were taken in 1910 or 1911.

Signed Jesse D. Strope

FAX TRANSMITTAL COVER SHEET

DATE: 8/26/99

TO: Bryce Contor **FROM:** Cindy Bird

DOCUMENT DESCRIPTION: Conveyance Loss table
Worstell equation

COMMENTS:

COVER SHEET + 1 **PAGES**

PLEASE CONTACT 327-5450
IF YOU DO NOT RECEIVE THIS ENTIRE DOCUMENT

Most seepage formulas use a unit seepage rate which some call "C" and others call "i". In English units these coefficients are expressed as cubic feet per square foot per day or simply feet per day.

The following table of "C" values is from American Civil Engineering Practice:[25]

Kind of Material	Loss per Day (in feet)
Cemented gravel and hardpan with sandy loam	0.34
Clay and clay loam	0.41
Sandy loam	0.66
Volcanic ash	0.68
Volcanic ash with some sand	0.98
Sand and volcanic ash or clay	1.20
Sandy soil with some rock	1.68
Sandy and gravelly soil	2.20
Concrete lining	0.33

The following table of "i" values is taken from the California Department of Water Resources Inspection Manual for use with the Etcheverry formula.

Kind of Material	Loss per Day (in feet)
Impervious clay loam	0.25 - 0.35
Medium clay loam underlaid with hardpan at depth of not over 2 to 3 ft. below bed	0.35 - 0.50
Ordinary clay loam, silt soil or lava ash loam	0.50 - 0.75
Gravelly clay loam, sandy clay loam, cemented gravel, sand or clay	0.75 - 1.00
Sandy loam	1.00 - 1.50
Loose sandy soils	1.50 - 1.75
Gravelly sandy soils	2.00 - 2.50
Porous sandy soils	2.50 - 3.00
Very gravelly soils	3.00 - 6.00

The following tables of "Average Seepage Rates" is from

[25] Abbett, Robert W., American Civil Engineering Practice, John Wiley & Sons, Inc., New York, 1956, Vol. II, pp. 17-31, 17-32.

Re: Field Inspection/Disallowal of A33-10086

1) Ditch widths measured at 18 locations, bottom soil type recorded. Worstell Analysis assuming 150 cfs required to be delivered to main project area (approx. .03 X 4880 acres) shows required delivery to canal of 162 cfs.

2) One diversion (Weekes) is diverted at headgate above BCC headgate, estimate 10 cfs max delivery (probably generous).

3) Main canal is measured through 8 ft Parshall flume. Chart shows max delivery rate of 140 cfs w/ 2.5 ft of head. However throat is large enough to accommodate 3 ft depth; calculate approximate capacity = 180 cfs.

4) Defunct 12' Cipolletti weir with 2.5 ft max depth shows historical capacity of main canal approx = 160 cfs.

5) Photo of drop structure w/ analysis in 8/19/1999 memo is not applicable – attached photos show that structure was on a now abandoned canal not part of current delivery system. Note that field inspection shows analysis of old photo was basically correct.

Analysis of Cipolletti weir in old photos is probably still applicable, based on notation "The Upper Weir."

6) Attached Manning's calculation based on flume across river indicates that flume is not limiting factor for canal system max. capacity.

7) Adding 10 cfs for Weekes diversion to 160 cfs for Cipolletti weir capacity does ~~not indicate~~ indicate that system capacity is approximately matched to existing springtime wr's of about 180 cfs.

8) The above data support the 8/19/1999 recommendation for disallowal of A33-10086

9) Attached notes from discussion w/ Bill Stauffer give guidance for service area mapping.

Re: Knollin Water

Historical Water District 33 watermaster records (attached to A33-10086 disallowal memo) record three classes of Blaine County Canal Water: "River," "Knollin," and "Bassinger."

Per my phone conversation with watermaster David Andreason on 8/19/1999, "Bassinger" waters are Dry Creek rights, "Knollin" waters are 1884 rights, and all other Little Lost River and Sawmill rights are classed as "River" rights.

Neph's Bible (copy attached) lists six "Knollin" rights for BCC. Existing notations identify three of these with "75," "77," and "69." Based on priority and diversion rate, I have identified the others in red marker. It appears that the "early" Knollin rights sum to approximately 9.0 cfs and were administered separately from: "late" Knollin rights:

75 Knollin Water 2/15/1884	171 inches
77 Knollin Sawmill 5/25/1891	64 inches
Knollin[1] 6/1/1891	214 inches
Total	449 inches = 8.98 cfs

The late rights appear to be the following:

33-00081, 81, and 82 5/1/1908	120 inches
33-00072 5/10/1908[2]	40 inches
33-00069 6/1/1908	160 inches
Total	320 inches or 6.4 cfs

Oscar Johnson's watermaster records from 1974, 1976 and 1982 indicate that he delivered 9.0 cfs of Knollin water, which corresponds to the above assumptions. David Andreason's watermaster records indicate delivery of 9.12 cfs of Knollin rights. These are probably still the same rights; Neph's notes indicate delivery of 64% of 33-00077 based on transmission losses, while transfer 656 indicates that 71.5% should be delivered. That difference and rounding differences probably account for the difference between Johnson's and Andreason's deliveries.

If the above assumptions are correct, then BCC "River" rights would be

33-00004	1/23/1905	12.00 cfs
33-00005	1/14/1908	145.00 cfs
33-10084	3/15/1891	5.30 cfs
Total		162.30 cfs[3]

Affidavits in claim file A33-10086 and testimony in hearings on transfer 4221 indicate that historically "all Sawmill water above 1891 decrees is delivered to Blaine County Canal Company." BCC with these affidavits asserted ownership of the "later" Knollin Rights, apparently 33-00069, 33-00071, 33-00072, 33-00080, 33-00081, and 33-00082. The company claimed some of these rights with claims A33-00069B,

[1] I identify this right as 33-00068, the "Bird Place" water.

[2] Priority 5/1/1908 in decree.

[3] Combine claim representing 33-00006 through 33-00013

A33-00071B, and A33-00072B. The company also claimed all waters junior to these rights with beneficial use claim A33-10084.

Watermaster records for "good water years" 1974, 1976, and 1982 do not indicate that water was delivered above the 162 cfs sum of BCC "River" rights.

The final order on transfer 4221 states "The Canal Co. is not entitled to ownership of water rights owned by Sage Willow" and allows Sage Willow to transfer these late Knollin rights.

Based on the above, I propose recommending A33-10086 (see separate memo), A33-00069B, A33-00071B and 33-00072B for disallowal.

Re: Disallowal

Facts:

1) Existing water rights sum 71.65 cfs for Dry Creek, 164.72 cfs for the Little Lost, and 6.73 cfs for Sawmill creek.

2) Per David Andreason, Water District 33 watermaster, Dry Creek runoff tends to be later in the season, while Sawmill and Little Lost River runoff tends to be earlier.

3) Diverting works capacity calculated at 141 to 188 cfs on original system, calculated from old photographs in A33-10086 claim file. One photo is of the weir at the diversion and another is of a drop. From the mountains in the background, it appears that the drop is located on the upper part of the canal west of the Little Lost River and therefore represents the full flow of the canal, before lateral branches.

4) Generous calculation of water requirements sum to 170 cfs. This assumes 0.03 cfs/acre for irrigation and 6.0 ft/day seepage loss in canals.

5) Water master records for 1997 (a good water year) show maximum deliveries of approximately 90 cfs. Early June showed the highest Little Lost/Sawmill flows, with Dry Creek flows approximately 9 to 10 cfs in early June.

6) Per Mr. Andreason, deliveries the last three to five years are below historical levels, and Blaine County Canal has not always requested its full allotment. Therefore the 1997 records may not show all the water that would have been available under existing rights.

7) Water master records for the years 1974, 1976, and 1982 (good water years per Lyle Swank, Water District 01 engineer) showed maximum deliveries of 155.1 cfs, with 143 apparently coming from Little Lost/Sawmill rights.

Analysis

Adding 10 cfs of early Dry Creek water to the 164.72 cfs of Little Lost rights and 6.73 cfs of Sawmill rights gives a potential authorized early June delivery of about 180 cfs. This is very close to system capacity and calculated water requirements, and appears to exceed historical deliveries.

Per Mr. Andreason's assertion that in recent years BCC has not requested its full allotment, it appears that there is no longer a need for additional water rights above those existing.

Recommendation

Based on the above, I recommend disallowal of a33-10086. Code P03, no beneficial use found.

Re: Conversation with David Andreason

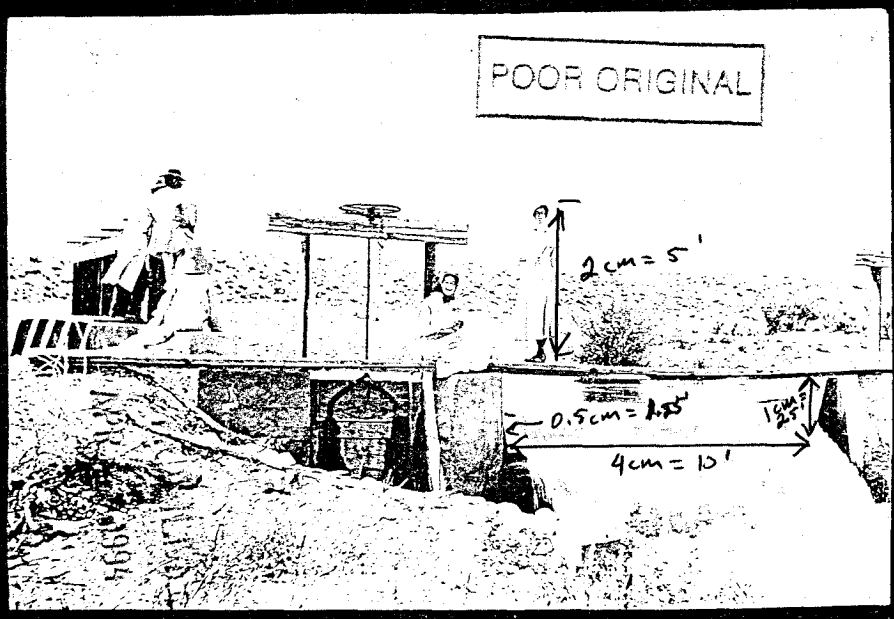

This morning I spoke on the telephone with David Andreason, watermaster for Water District 33.

1) In watermaster records, "Bassinger" water is Dry Creek rights. "Knollin" water is 1884 rights. All other Little Lost River and Sawmill rights are recorded as "River."
2) Neph Hansen retired in 1964 or 1965. That is when "Neph's Bible" was written, as a guide to Oscar Johnson.
3) Oscar may not have segregated BCC water by source in the watermaster records.
4) Since the drought (last 3,4 5 years), Blaine County Canal company has not always used all of its rights and some water has been delivered to later-in-time rights on Knollin ranch.
5) Generally Sawmill water comes off early, Dry Creek water comes off late. From this I conclude that max. diversion rate may be less than the sum of the Dry Creek and Sawmill rights.

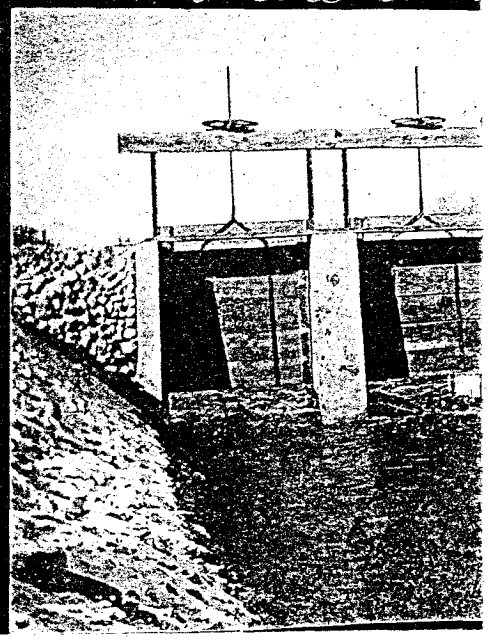

The Upper Weir

Mr Cole at

Photos submitted w/ claim A33-10086

Assume Woman is ≈ 5' tall, then this is a 10' Cipolletti weir.

Illustrated head ≈ 1.25', Capacity head ≈ 2.5'

$Q = 3.367 L H^{3/2}$

$Q_{illustrated} = 3.367(10)(1.25')^{3/2} = 47.1$ cfs

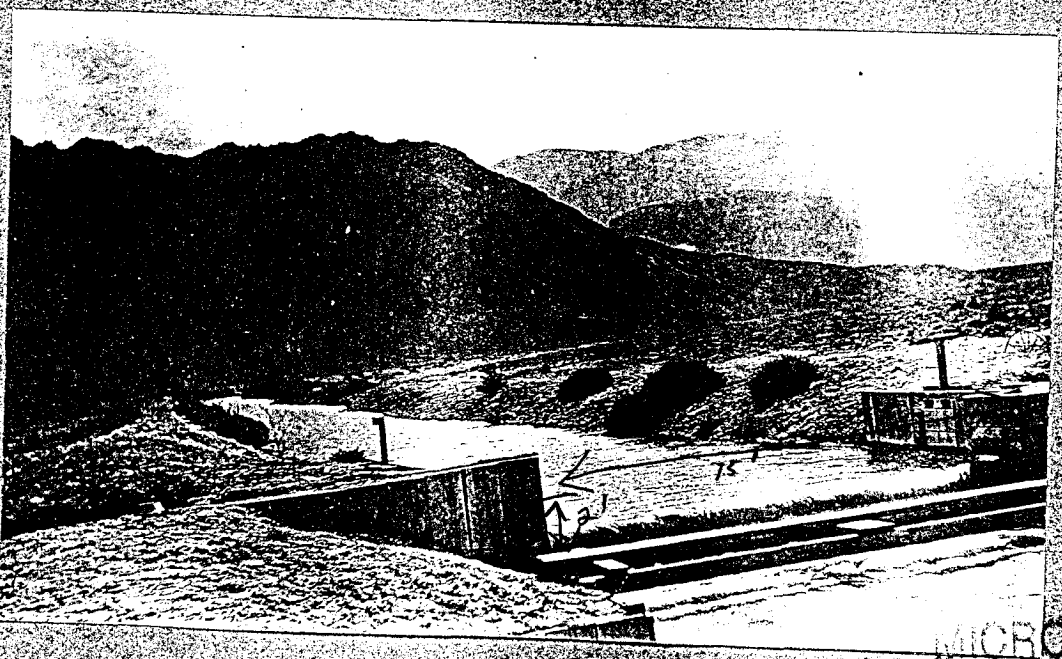

$Q_{capacity} = 3.367(10)(2.5)^{3/2} = 133.1$ cfs

If max head is 3',

$Q_{capacity} = 3.367(10)(3)^{3/2} = 175$ cfs

View on distribution canal

A33-10086

MICROFILMED
APR 15 1994

Drop on distribution canal

Photo in "proof of publicity" documentation w/ claim A33-10086

Capacity calculations: Assumed Dimensions, use suppressed rectangular weir formula. $Q = 3.33 L H^{3/2}$

$L = 15'$ $H = 2'$ $Q = 3.33(15)(2)^{3/2} = 141$ cfs

Note that from canal bank, photo appears to show historical high delivery.

$Q = 3.33(15)(1)^{3/2} = 50$ cfs

if width = 20', these values become

$\frac{141}{15} \times 20 = 188$ cfs $\frac{50}{15} \times 20 = 67$ cfs

CFS requirement analysis for Blaine County Canal Co.

Source	Acres	CFS-low (0.02/acre)	CFS-high (0.03/acre)
Claims	6198	124	186
Stauffer Map	5850	117	176
Shares	4880	98	146
Ditch Loss		9	22
Claims Total		133	208
Stauffer Total		126	198
Shares Total		107	168

Note that claims and Stauffer map are prepared on a permissible place of use basis; it is not contemplated that the full acreage will be irrigated in any one year. The number of shares is a reasonable irrigated acreage, based on the historical allocation of one share per acre prior to 1987.

Bryce A. Contor

Re: Allowable irrigated acres for calculation of required CFS.

In 1987 was elected to the board of directors of Blaine County Canal Company. I served as a director and/or secretary treasurer from 1987 through about 1991. One of my activities during that time was to research and prepare the company's adjudication claims.

When I first became associated with the canal, stock was allocated at one share per acre. Per Pat Woodie, current secretary, there are now 4880 shares outstanding, and I believe the same number were outstanding when I was secretary. Though each certificate was associated with a particular place of use on the company books, shareholders freely applied their water to various lands within the service area. With the exception of the "Miller Place" (06N 29E 27 NE 1/4) and Owen Romrell's "L-shaped field" (06N 29E 33 NW 1/4), to my knowledge BCC water was not applied to lands not represented by stock shares.

The first step in relaxing the "one share per acre" policy was a dispute with Jerry Pancheri, where the directors sought to stop Jerry from using the 80 Hartman shares on lands not deemed to be part of the "original project." We were not able to prevent Pancheri from moving his water, and found in fact that a policy preventing moving of water was not what the shareholders wanted.

With the filing of the adjudication claims, we decided to maintain flexibility by claiming more places of use than just the 4880 acres represented by certificates. The company voted to pay the $1/acre adjudication fee for 4880 acres out of the company budget, and asked each shareholder to designate the places of use to claim for their shares. We also solicited land lists of additional lands that shareholders wished to include on the claims, with the requirement that the shareholder pay the $1/acre fee on additional lands. The claims as amended sum to 6198 acres.

Bill Stauffer's map of current places of use sums to approximately 5850, and Stauffer acknowledges that not all 5850 acres are irrigated in any given irrigation season.

Following consultation with Ernie Carlsen, I plan to recommend a large service area (based on Stauffer's and Shelley Keen's maps) as a permissible place of use, with a condition limiting annual irrigated acres to some smaller number. Based on this historical background, I propose limiting annual irrigation to a total of 4880 acres.

Based on this analysis, I used 4880 acres in the calculation of a reasonable required diversion rate.

re: A33-10086: Evidence of Priority

Dear Sir:

Pursuant to your request of March 8, 1993, enclosed you will find evidence gathered to the best of my ability. I have numbered the evidence and made comments where I felt the necessity.

1. Copy of affadavit: William C. Stauffer, dated 4/5/93

2. Copy of Statement of Diversion of Waters of Sawmill Creek: Don Isham, dated 1/25/90

3. Copy of affadavit: Jesse Strope, dated 3/29/93
   Patent deed: John M. Strope, dated 6/5/19
   Photocopies of headgates and weir on Blaine County Canal Co, dated 1910 or 1911

4. Copy of the certified copy of Articles of Incorporation of the Blaine County Canal Company, Limited, dated 6/29/10
   It seems only logical to assume the irrigation system was already in place by the 1910 incorporation date, especially with the reference to the old permit numbers 1119 and 3399.

5. No. 12004: Quitclaim deed, dated 10/26/09

6. No. 13330: Quitclaim deed, dated 4/7/10

7. No. 7802: Quitclaim deed, dated 11/6/07

8. No. 1331: Quitclaim deed, dated 4/7/10

9. Photocopies of the canal system for Blaine County Canal Company. This album was owned by Alice Eaton Torrey, a very early settler family in the Little Lost River valley. As you will note, on the first page the river picture was dated 6/24/11. It appears all the pictures were taken at that time. The album consists of pictures of the construction camp, headgate, canals, fields and crops involved in the irrigation system of Blaine County Canal Company. The photo album was given to Don Isham by Alice Torrey and is in his possession.

MICROFILMED
APR 15 1994

As I researched the limited data available, it became evident Blaine County Canal Company had a very colorful history and was instrumental to the development of the farming area that now exists in Howe. Based on the evidence I feel the 1908 priority date is correct.

Sincerely,

Patricia E. Woodie

Patricia E. Woodie
Secretary-Treasurer
Blaine County Canal Company

(1)

AFFADAVIT

I, William C. Stauffer, resided at Howe, Idaho from 1909 to the 1930's. My father, Henry Stauffer, began farming in 1909 using Blaine County Canal Company water for irrigation. As my father was one of the original stockholders in Blaine County Canal Company, I hereby certify that Sawmill Creek water has a 1908 priority date; from knowledge given to me by my father as he irrigated with the water from 1909 until 1958.

STATEMENT OF DIVERSION OF WATERS OF SAWMILL CREEK

I, Don Isham of How e, Idaho, am very well aquainted with the historical use and diversion of the waters of Sawmill Creek. I became the ditch rider of Blaine County Canal Company in 1960 and filled that position intermittently until 1986. In 1965 I was elected Chairman of the Board of Directors of the Company and served on that board untill 1986.

I certify that the spring flood water of Sawmill Creek has been delivered to Blaine County Canal Company all the time that I have been aquainted with the Canal Company affairs. To the best of my knowledge this use goes way back to the first years of the Company. It has been historically treated as a 1908 right, diverting and putting to beneficial use all the water in Sawmill Creek above prior decrees.

Evidence of Priority

I, Jesse Strope, am a resident of Howe, Idaho and am very well acquainted with the historical use and diversion of the waters of Sawmill Creek. My father, John M. Strope, homesteaded in the Little Lost River Valley in 1909, and at that time began using Blaine County Canal Company water. He was one of the original stockholders in Blaine County Canal. His farm was one of the first homesteads under the Blaine County Canal and the consequent irrigation development. The Strope family has been in continuous operation of the farm in Howe since 1909. I am certain the Sawmill Creek water was a 1908 priority date and has been used continuously since Blaine County Canal acquired the water. I certify this information is to the best of my knowledge due to the information passed on to me by my father. I also certify the accompanying photocopies of the original headgate on Blaine County Canal were taken in 1910 or 1911.

4—1003.

The United States of America,

To all to whom these presents shall come, Greeting:

WHEREAS, a Certificate of the Register of the Land Office at **Hailey, Idaho,** has been deposited in the General Land Office, whereby it appears that, pursuant to the Act of Congress of May 20, 1862, "To Secure Homesteads to Actual Settlers on the Public Domain," and the acts supplemental thereto, the claim of **John M. Strope** has been established and duly consummated, in conformity to law, for the **east half of the northeast quarter of Section twenty-six in Township six north of Range twenty-nine east of the Boise Meridian, Idaho, containing eighty acres,**

according to the Official Plat of the Survey of the said Land, returned to the GENERAL LAND OFFICE by the Surveyor-General:

NOW KNOW YE, That there is, therefore, granted by the UNITED STATES unto the said claimant the tract of Land above described; TO HAVE AND TO HOLD the said tract of Land, with the appurtenances thereof, unto the said claimant and to the heirs and assigns of the said claimant forever; subject to any vested and accrued water rights for mining, agricultural, manufacturing, or other purposes, and rights to ditches and reservoirs used in connection with such water rights, as may be recognized and acknowledged by the local customs, laws, and decisions of courts; and there is reserved from the lands hereby granted, a right of way thereon for ditches or canals constructed by the authority of the United States.

IN TESTIMONY WHEREOF, I, **Woodrow Wilson,** President of the United States of America, have caused these letters to be made Patent, and the seal of the General Land Office to be hereunto affixed.

GIVEN under my hand, in the District of Columbia, the FIFTH day of JUNE in the year of our Lord one thousand nine hundred and NINETEEN and of the Independence of the United States the one hundred and FORTY-THIRD.

By the President: Woodrow Wilson

By M P. LeRoy, Secretary.

ARTICLES OF INCORPORATION

OF THE

BLAINE COUNTY CANAL COMPANY, LIMITED.

KNOW ALL MEN BY THESE PRESENTS: That WHEREAS the Blaine County Irrigation Company, Limited, a corporation organized and existing under the laws of the State of Idaho, entered into a certain contract with the State of Idaho, bearing date the 29th day of June, A. D. 1910, for the reclamation of certain lands situate in the Counties of Blaine and Fremont in said State, said lands being fully described in said contract, and said reclamation to be in accordance with such contract accomplished under and in compliance with the provisions of an Act of Congress, approved August 16, 1894, commonly known as the Carey Act, and the laws of the State of Idaho and the Rules and Regulations of the State Board of Land Commissioners of the State of Idaho; and,

WHEREAS under said contract with said State, a corporation was to be formed for the purposes of operating and managing the irrigation system by which said reclamation is to be accomplished under the contract aforesaid with the State of Idaho;

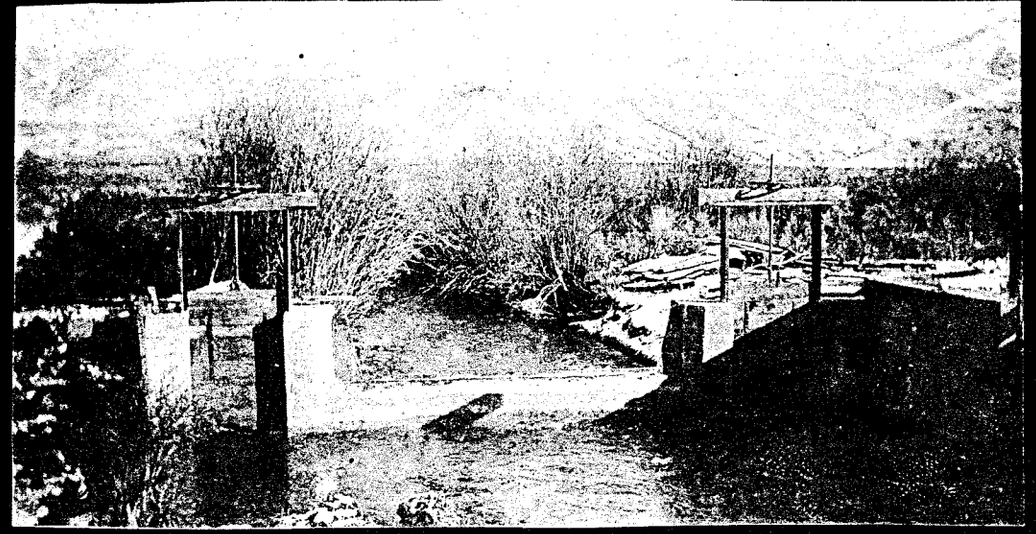

THEREFORE, the undersigned have voluntary associated themselves together to form such corporation under the laws of the State of Idaho, and to that end do hereby agree and certify as follows, to-wit:

I.

The name of said corporation is Blaine County Canal Company, Limited.

6198 ACRES TOTAL

USE OF THIS RIGHT WITH THE RIGHTS LISTED BELOW IS LIMITED TO THE IRRIGATION OF A COMBINED TOTAL OF 4,880 ACRES IN A SINGLE IRRIGATION SEASON. COMBINED RIGHT NOS.: 33-00003, 33-00004, 33-00005, 33-00068, 33-00075, 33-00077, 33-00098

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

THIS PARTIAL DECREE IS SUBJECT TO SUCH GENERAL PROVISIONS NECESSARY FOR THE DEFINITION OF THE RIGHTS OR FOR THE EFFICIENT ADMINISTRATION OF THE WATER RIGHTS AS MAY BE ULTIMATELY DETERMINED BY THE COURT AT A POINT IN TIME NO LATER THAN THE ENTRY OF A FINAL UNIFIED DECREE. SECTION 42-1412(6), IDAHO CODE.

EXPLANATORY MATERIAL: BASIS OF CLAIM -

10/18/2000

IDAHO DEPARTMENT OF WATER RESOURCES
RECOMMENDED WATER RIGHTS ACQUIRED UNDER STATE LAW

Prepared on MS word, not printed fr. Database. Bare

RIGHT NUMBER: 33-10086

NAME AND ADDRESS: BLAINE COUNTY CANAL CO
HC 65 BOX 1058
HOWE, ID 83244

SOURCE: SAWMILL CREEK TRIBUTARY: Little Lost River

QUANTITY: 5.3 CFS

THE APPROPRIATOR IS ENTITLED TO THE QUANTITY OF WATER DESCRIBED ABOVE AT THE POINT OF MEASUREMENT IN T10N R26E SECTION 12 NESW
POINT OF REDIVERSION FROM LITTLE LOST RIVER

PRIORITY DATE: 04/01/1927

POINT OF DIVERSION:

T06N R28E S11	NENW	Within BUTTE County	R
T10N R27E S18	NWSESW	Within BUTTE County	±
~~T11N R26E S10~~	~~NWNENE~~	~~Within LEMHI County~~	

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
IRRIGATION	4-01 10-31	5.30 CFS

PLACE OF USE:

IRRIGATION Within BUTTE County

MICROFILMED
NOV 18 1992

I, David Andreason, of Howe, Idaho, am Watermaster of District 33. I have filled that position since 1984. I have personally delivered the waters of Sawmill Creek as follows:

789 inches	1891 decrees
all water above 1891 decrees	Blaine County Canal Co.

In that time no one has protested this delivery or made other claims on the waters of Sawmill Creek.

I have in my possession a notebook which belonged to Neph Hansen, who was Watermaster for 40 years, approximately. To the best of my knowledge and according to this notebook, Mr. Hansen and his successors delivered the waters of Sawmill Creek as I have been doing.

Signed David S. Andreason

Watermaster District No. 33

Subscribed and sworn to before me, this 10 day of Feb, 1990

STATEMENT OF DIVERSION
OF
WATERS OF SAWMILL CREEK

I, Don Isham of Howe, Idaho, am very well aquainted with the historical use and diversion of the waters of Sawmill Creek. I became the ditch rider of Blaine County Canal Company in 1960 and filled that position intermittently until 1986. In 1965 I was elected Chairman of the Board of Directors of the Company and served on that board untill 1986.

I certify that the spring flood water of Sawmill Creek has been delivered to Blaine County Canal Company all the time that I have been aquainted with the Canal Company affairs. To the best of my knowledge this use goes way back to the first years of the Company. It has been historically treated as a 1908 right, diverting and putting to beneficial use all the water in Sawmill Creek above prior decrees.

Signed: Don Isham

Date: 1-25-1990

Notary: Augustine A. Gray
