Re: Water Right issues and Enlargement claim proposal

Dear Bruce and Bonnie:

Enclosed you will find a GIS representation of the place of use represented by your water rights as they apply after Transfer No. 4601 and profile reports of the adjudication claims. This does not include Permit 33-07172.

You will note the change of ownership for the water rights still has not been done. I will need a signed Notice of Change of Water Right Ownership form with copies of the deed(s) in order to complete this task.

Also as referenced above Permit 33-07172 is not included in the GIS layout. This is because water rights still in the permit stage cannot be recommended as being used in conjunction with other rights. Field exam measurements are still required. Further, if you want the water right recommended in your names the Assignment of Permit form must be submitted with a \$25.00 fee.

The enlargement issue. Initial review of the Place of Use tended to indicate an additional 5 acres within the entire farm was being irrigated without the acreage covered by a water right. Refinement of the GIS process indicates only 4 acres is being irrigated. If you wish to you may file an enlargement claim for the additional 4.0 acres using the 1987 NAPP photography as basis for the enlargement unless maps can be produced showing the system changes and acreage irrigated at some earlier date (circa 1979). There is of course a fee for such a claim, which will be \$54.00.

Should you need to discuss any of these matters please feel free to contact me.

Respectfully submitted,

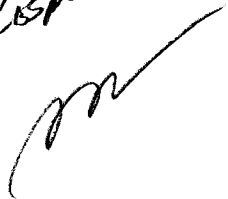

Allen B. Ruberry
