E. NARRATIVE/REMARKSCOMMENTS

Water right license 03-02031 covers 55 acres north of this permit's 27 acres. Water right license 67-02216 covers this permit's same 27 acres. This permit is for supplemental Snake River water. According to the owner and Al Cito, the farm manager, Snake River water has never been intentionally diverted for the 27 acres. License 67-02216 was for a 36" well. The field exam noted that the height of the water in the well was determined by the height of the Snake River. The well has since been replaced with a pond and booster pumps. The pond is ~3 to 5 af. Per a 9/24/86 memo from Brad Dingee, the owners visited the office and stated that the point of diversion for permit 03-07035 was actually a gravel pit that filled with Snake River water. Per my 7/24/98 field exam, the owner and farm manager stated that the gravel pit replaced the well and that they have not had to use their supplemental Snake River water on the 27 acres yet because the ground water pit has been sufficient. The owner said that if they ever did have to use this permit, they would just use

a portable pump (tractor driven). I feel this permit is from the same source as license 67-02216. The question is whether the pond water is defined as Snake River water or ground water. Either way, the source and the 27 acres have been licensed. Maybe both sources could be listed on license 67-02216 per the SRBA. If the pond ever failed to provide the licensed amount for the 27 acres, then applicant could use the portable pump and file a transfer to add a point of diversion if necessary. Based on the above information, I recommend this permit be disallowed.

Have conditions of permit approval been met? ☐ yes ☐ no

F. FLOW CALCULATIONS

Measured Method:

____ Additional Computation Sheets Attached

G. VOLUME CALCULATIONS**1. Volume Calculations for Irrigation:**

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = \underline{\hspace{2cm}}$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = \underline{\hspace{2cm}}$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = \underline{\hspace{2cm}}$$
