INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Sections 42-248 and 42-1409(6), Idaho Code. Section 42-248 requires certain property holders to notify the Department of Water Resources (IDWR) of any change in mailing address or ownership of all or part of a water right record on file with IDWR. Section 42-1409(6) provides that new property owners must notify IDWR of any change in ownership of a water right during an adjudication of water rights, and, if a required claim for the water right has not been filed, to file the needed claim.

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures, or if you have questions about completing this form, please contact your nearest IDWR office or call 1-800-451-4129.

If you need additional space to describe or explain any of the items on the form, please attach additional sheets to the form as you may require.

1. If there are water rights associated with the property, the seller should be able to provide you with the water right or adjudication claim number(s). Please enter these number(s) at Item 1. If you or the seller believe there are water rights for the property but the numbers are unknown, you may wish to call IDWR or come into an office of IDWR for assistance in identifying the water rights for the property in question. If claims for the rights are required, and have not been filed, IDWR will so advise you.
2. The information described at Item 2 is required, since IDWR cannot process the requested change without documentation of ownership. The preferred types of documentation are shown; contact IDWR if you have difficulty obtaining this information. Do not obtain a new survey for purposes of this form before contacting IDWR.
3. Please provide the name and address of the former owner of the water right and/or adjudication claim at Item 3.
4. The name, mailing address, and telephone number of the new owner(s) is entered at Item 4. Please indicate the relationship between multiple owners by using the connector "and", "or" or "and/or". If an "and" is used, all parties must sign this form. If an "and/or" or "or" is used, all parties may sign, however only one of the named parties is required to sign.
5. At Item 5, please provide the date the property in question was acquired. This may be the date of "closing" in the case of a real estate transaction or the date of court order for other types of ownership changes.
6. If the property you have purchased is only a portion of the property owned by the former owner/seller, you may be purchasing only a portion of the total water right held by the seller. This means the water right held by the seller may be "split" to provide your share of the right in question. Be sure to include a description of the portion of the water right you have purchased at Item 6.

Please provide as much detail as possible concerning your water right: include the number of homes, irrigated acreage if more than 1/2 acre is irrigated, type and number of stock if your right is for stockwater, etc. In the absence of information to the contrary, IDWR will assume the intent is to split the rights *proportionately*.

7. The new owner(s) must sign the form in the space(s) provided at Item 7. Corporations and other organizations must submit a list of directors or officers demonstrating the authority of the director or officer to sign the form.
8. There is no filing fee. When complete, you should retain a copy and return the original of the form to the IDWR office nearest you:

Re: Notice of Claim to a Water Right No. A67-07451

Dear Claimants:

Enclosed is a copy of the above referenced claim, which reflects the change in ownership of the land and appurtenant water rights covered under the original filing.

The Department will contact you in the future concerning any requirements that may be needed in order to process this claim for final court decree.

Please note, the ownership has also been changed on water right numbers 67-10289, 67-10290, 67-10291 and 67-10292, which have been decreed by the SRBA Court.

Thank you for your patience and cooperation, as we have had several ownership changes to process. If you have any questions concerning the enclosed claim, please feel free to contact this office.

Sincerely,

A handwritten signature in cursive script that reads "Denise Buffington".

E. NARRATIVE/REMARKS/COMMENTS

280 AF Reservoir on unnamed drainage and pump Station in Hog Creek used to irrigate 198 acres, primarily pasture and alfalfa. Uppermost fields irrigated by gravity diversion from reservoir. A check dam positioned in the Hog Creek channel captures flows for a pump Station used to sprinkle lower fields. Primary source of flows for pump station are return irrigation flows from upper fields, as both Hog Creek and the unnamed drainage commonly cease flowing soon after spring runoff. However, as the flows enter the channel before being redirected, this site needs to be recognized as a Second P/O.

No other water rights used.

Stockwater for 200 range cattle.

Rate of diversion for irrigation from natural flow can be derived in part from capacity of pump station, ~~but not mostly~~ ~~from~~ Rated discharge of reservoir outlet exceeds permit limit therefore total natural flow may be diverted when available. Rated outlet discharge = 17 cfs per dam safety file

Reservoir capacity 280 AF from dam inspection records.

Meas. device requirement: A flowmeter is installed on the Hog Creek pump. There is no device at the reservoir and one is not really needed as most years there is no need to bypass flows because drainage does not flow during irrigation season.

Have conditions of permit approval been met? ☐ yes ☐ no See remarks.

F. FLOW CALCULATIONS

Measured Method:

Hog CK Pump: See attached

☒ Additional Computation Sheets Attached

allow 3.0 cfs per proof unit

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 198 \times 4 = 792$$

$$V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 3.0 \times 214 \times 1.9835 = 1273$$

$$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 792$$

2. Volume Calculations for Other Uses:

Stock/water range 2.7 AF per tables

WATER RIGHT LICENSE

WATER RIGHT NO. 67-07451

CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license shall be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Use of water under this water right will be regulated by the watermaster of State Water District No. 67.
6. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. Witness the seal and signature of the Director, affixed at Boise, this 25th day of FEBRUARY, 1998.
