DEPARTMENT OF WATER RESOURCES

INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Section 42-1409(7), Idaho Code. This statute provides that new property owners notify the Department of Water Resources (IDWR) of any change in ownership of a water right during an adjudication of water rights, and if a claim for the water right has not been filed to file the needed claim(s).

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures or if you have questions about completing this form please contact your nearest office of IDWR or you may call 1-800-451-4129 (toll-free).

The first line of the form asks for the date of closing so IDWR will have a record of the effective date of the property transfer.

The second line of information requires the legal description of the property being transferred. This information is **ESSENTIAL** and should be available from the documents that will be present at the time of closing. The first two lines of the legal description **MUST** be completed. IDWR's records are based upon legal descriptions using township, range, section and fractions of a section descriptions, and this information must be included on the form. If you also have available a legal description based upon a townsite or subdivision and lot and block number, please also include this additional information. A lot and block legal description is **NOT** a substitute for the township, range, section and fraction of a section description.

After completing the legal description, if all water is supplied by a public service water supply you may check the first box; complete the name, address and telephone information for yourself, the new owner; sign the form in the space provided and return the form to the IDWR office nearest you.

If there are water rights associated with the property, the seller should be able to provide you with the water right number(s). The water right number(s) for the property are to be put in the space provided at the second box on the form. If you or the seller believe there are water rights for the property but the numbers are unknown, then you may wish to call or come into an office of IDWR for assistance in identifying the water rights for the property involved. If claims for the property have not been filed you will be so advised by IDWR.

After the water right number(s) for the property has been entered on the form, complete the name and address information for **BOTH** the former owner/seller and for yourself, the new owner, in the spaces provided. Please also include your telephone number. If the property you have purchased is only part of the property owned by the former owner/seller, you may be purchasing only part of the total water right held by the seller. This means the water right held by the seller must be split so you get your proportionate share of the water right. Be sure to include a description of the portion of the water right you have purchased. The seller should be able to help you describe the portion of the water right for the property you have purchased.

If the former owner/seller will sign the form and the seller is shown as the claimant of the water right in IDWR's records, then you do not need to attach proof of ownership of the land or the water right. The seller should know if the original claim was filed by him, or if the seller has filed a change in ownership so the seller is shown as the claimant of the water right in IDWR's records. If the seller is not going to sign the form then you must attach some proof of ownership of the property described at the top of the form or proof of ownership referencing the specific water right(s) for the property.

The new owner must sign the form in the space provided. If the former owner/seller is available to sign the form please do so in the space provided.

When complete, the new owner and the former owner/seller should each retain one of the copies and return the original of the form to IDWR. You may return the form to the IDWR office nearest you or to: Idaho Department of Water Resources, Statehouse Mail, Boise, ID 83720-9000, Attention: Adjudication Bureau.

Renumbered to Notice of Claim to a Water Right No. A67-04098E

Glen W. or Sandra A. Coates
1205 Medicine Bow
Green River, WY 82935

Dear Claimants:

We have received and processed a Change of Ownership for a portion of the original claim to a water right number as referenced above. This change of ownership required a split of the original claim resulting in renumbering this claim by adding alpha-suffixes to represent each split. The new notice of claim to a water right number for your portion is referenced above and a copy is enclosed.

Your portion of the claim has a specified point of diversion, nature of use and place of use. If you plan on changing the nature of use, place of use or point of diversion under this right, including adding a new point of diversion, then an Application for Transfer on your portion of this right is required. Please contact this office for further information on the application for transfer form. If you do not plan on changing any items on your claim, then no further action is required at this time.

Please be advised that you will be required to submit evidence of the priority date claimed when we begin our field work in your area. I have enclosed a brochure entitled "Evidence of Priority" which describes the types of information that can be submitted to substantiate the priority date claimed. It may be to your advantage to begin collecting this evidence while the former owners are still accessible.

I also found that a portion of License No. 67-07620 may be appurtenant to your property. A claim to a water right was not required on this license so we did not take any action in regard to it. Enclosed, for your information, is a copy of this license. Due to recently passed legislation you may be required to submit notice of ownership of your portion of this license in the near future.

TO: SHELLEY KEEN

FROM: KAY WALKER *KW*

RE: LICENSE 67-07620

Hi, Shelley... I believe I have found a problem with a recently issued license that I would like to see "adjusted" if possible.

Right 67-07620 was examined in June of 1993 and all information looks okay but the place of use description. The examiner used a "traced" copy of an ASCS photo that shows the correct amount of acres, however, Section 6, Twp. 13N, Rge. 1E, is a long and narrow section. The ASCS did not locate the bottom of the section correctly and noted that this photo was not to scale. See the copy of ASCS photo attached which Ron Howerton has corrected section lines on. I have also attached an ortho-photo quad of this area which I inserted the 40-acre tracts and Gov. Lots and tried to show the irrigated area. Please look at the ASCS photo, ortho-photo, and license and see what you think about the place of use description that was licensed.

We have processed several change of ownership forms on Rt. A67-04098 which is for lands adjacent to Rt. 67-07620, but does not overlap according to field examiner. This is how I became aware of the place of use problem on 67-07620. The lands under A67-04098 are for lands the examiner found unable to receive Little Weiser River water because they are located on a hill as he said on the traced copy of ASCS photo. A SRBA claim was not required for License 67-07620 and we will not have a chance to correct the place of use discrepancy. Also this property has been subdivided into four parcels. When you begin receiving and reviewing change of ownership forms in July, the correction to the license will make processing much easier.

Let me know what you think about this one.... Kay

Dear Malcolm and Nita,

We have received and processed a Change of Ownership for a portion of your original Claim to a Water Right Number as referenced above. This change of ownership resulted in a split of your original claim.

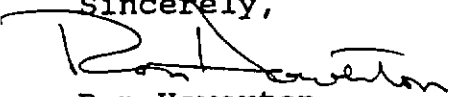

When a portion of the original water right claim has been conveyed to another and the original right has been split, then the original claim number is renumbered by adding alpha suffixes to represent each split.

Each split contains only the portion of the original right for each separate owner. The above referenced new claim number reflects your remaining portion of the original claim after the change of ownership.

Enclosed is a copy of this new claim for your records. Please refer to your new claim number when corresponding with our office.

If you have any questions concerning this ownership change or the enclosed claim copy, please feel free to contact this office.

Telephone conversation 11-17-94

Dear Malcolm and Nita,

This office has received two Notices of Change of Water Right Ownership for portions of the above adjudication claim that is still in your name. I have reviewed both notices for the new ownerships and prior to making any paper work changes I would like your input.

I have enclosed a map that is color coded showing the irrigated lands covered by the adjudication claim and recent license 67-07620. The highlighted areas show the irrigated lands that are owned by the new owners and yourself. The Johnson's irrigated lands are in green, the Way's in yellow and yours in pink.

Do these look ok to you? If you think it is different please mark any difference on this map. If it looks ok then just return it with no marks on it.

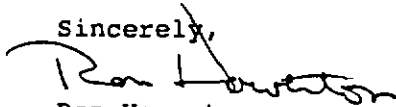

During our telephone discussion I mentioned that the statutory claim had a error for one of the 1/4-1/4's. I've enclosed a data entered copy showing the error, you can compare with the map I've made to see the problem. After I found this error I needed to have you see the problem. Then I could proceed to have you signing an amended claim to correct this.

Amended claim: I've enclosed an amended claim with the corrected 1/4-1/4's and your latest mailing address. Please sign the document in front of a Notary and return it within 30 days.

License 67-7620: The recently licensed right 67-7620 doesn't need to have an ownership change because of current policy for a licensed water right of this type. We may need to do some correcting on the license later, but first I will work to correct the claim. Can you tell me whether the new owners will use a different point of diversion for the license? If so they will possibly need to file a transfer application to add a separate point of diversion to the licensed right.

Feel free to contact me if you have any questions concerning this letter.

Sincerely,

Ron Howerton
