POD

The source is listed as Webster Creek tributary to Spring Creek.. These two creeks run basically parallel to each other with Spring Creek being on the north side of Webster Creek. It appears that they join together within a few feet before the join Tygee Creek.

Using the sketch that was prepared by the engineer at the time of filing the application the distance from the POD to the south boundary of the claimed QQ is approximately 10,000 feet, which is 1.89 miles. I could not tell from any of the imagery how close the drawing fits to the ditches, if any, along the path indicated.

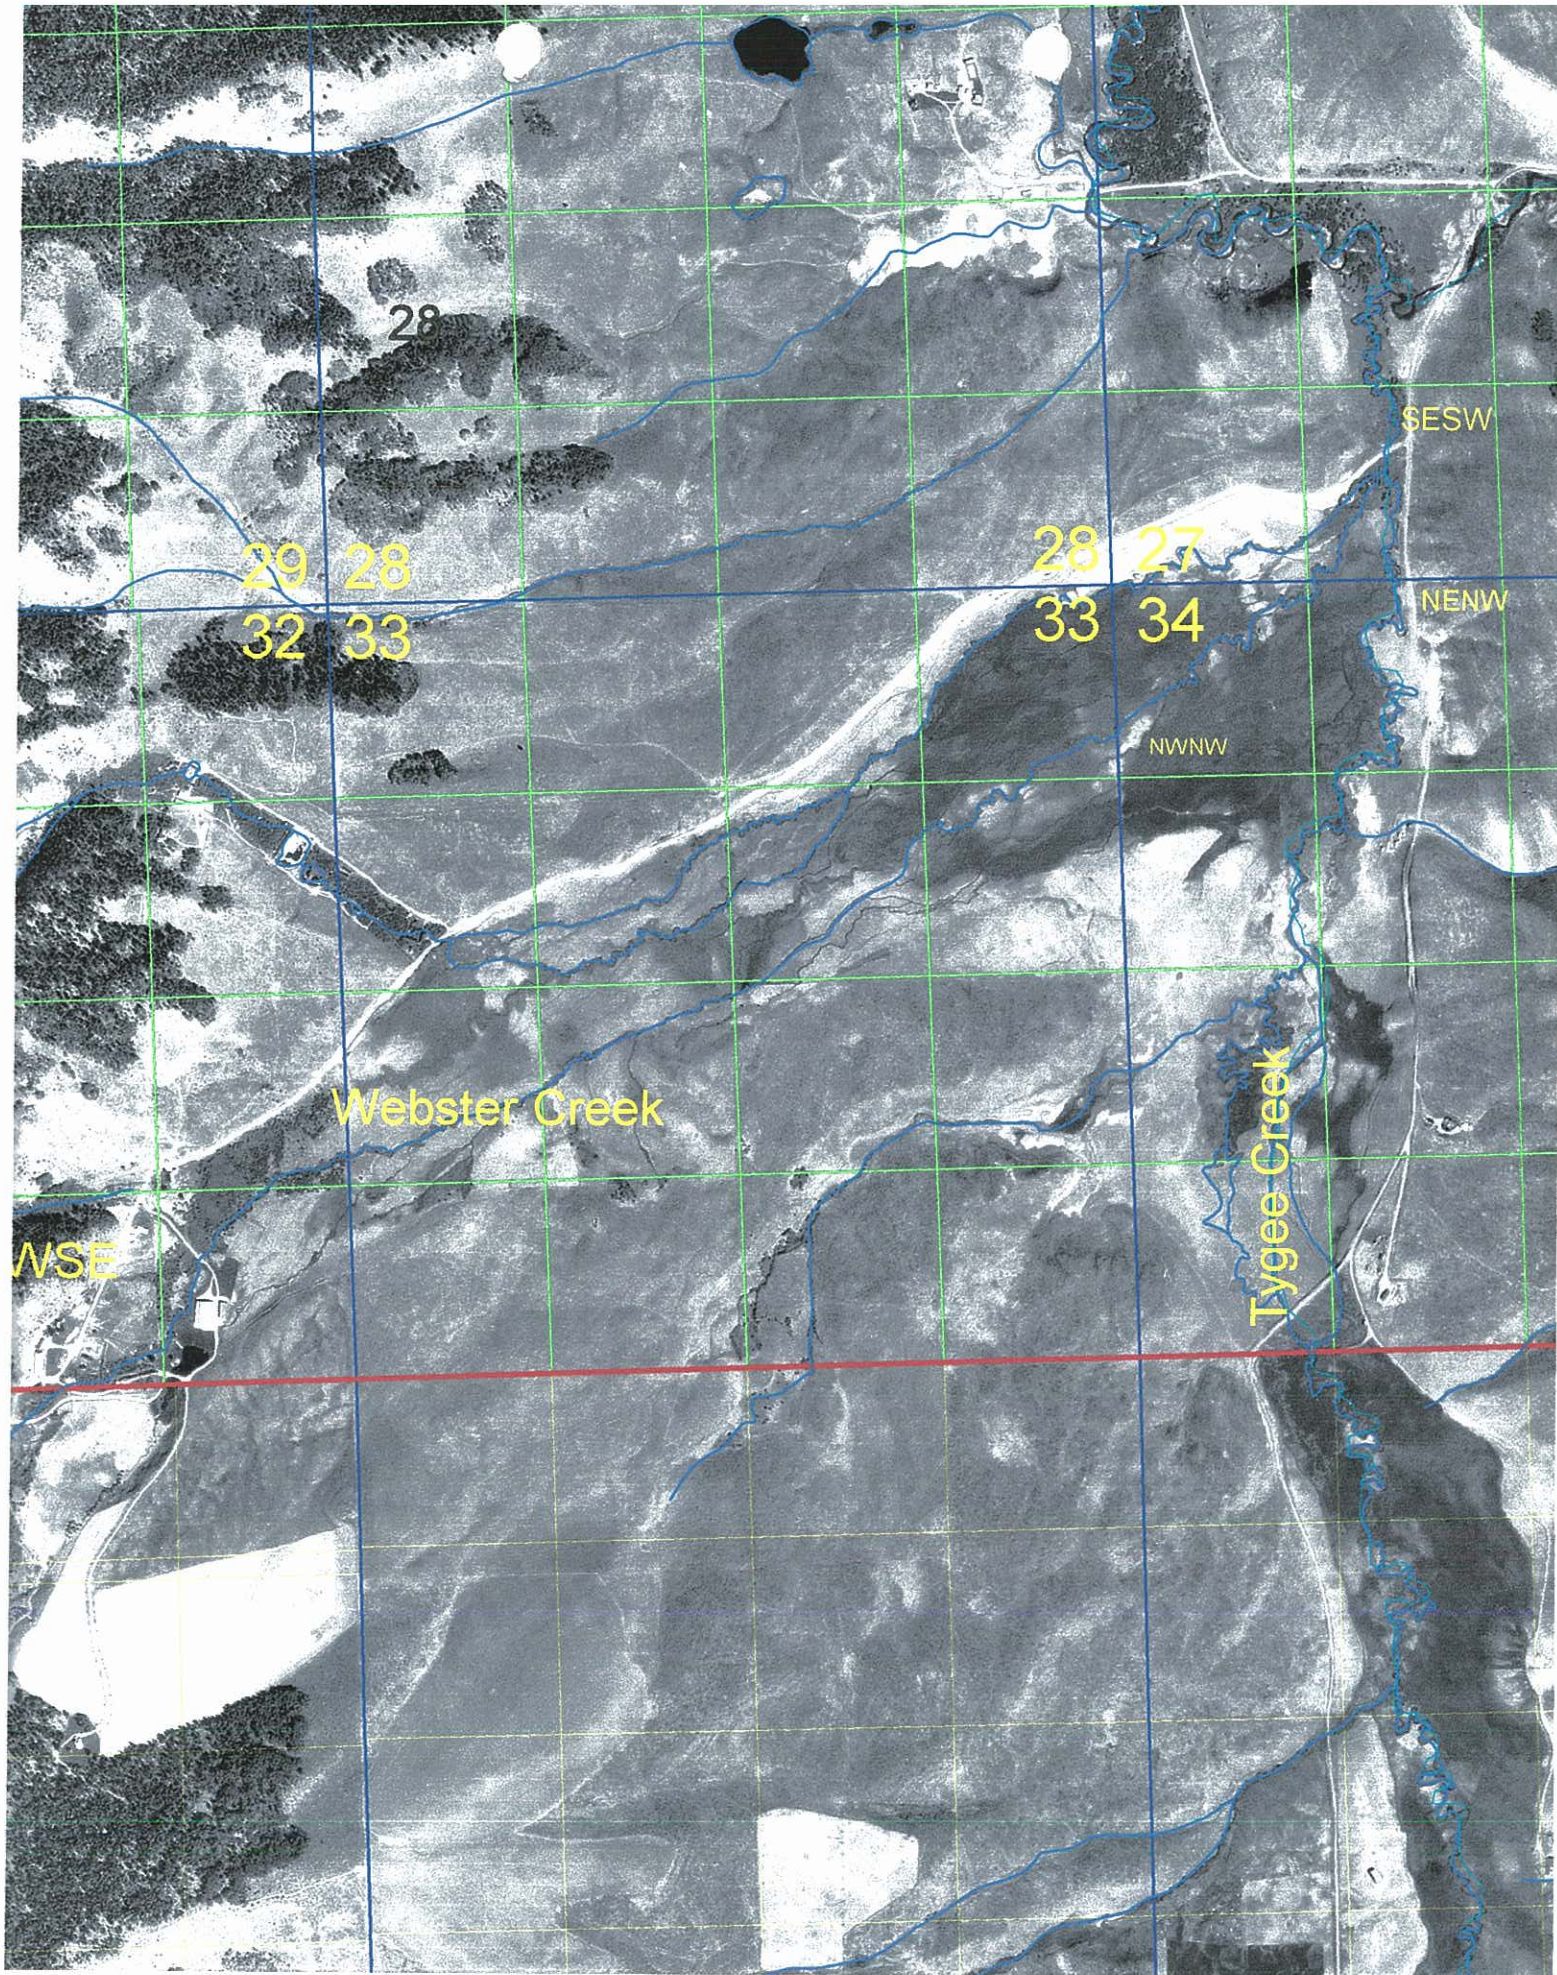

The diverting works consist of headgate, ditches, flood irrigation. The actual POU appears to be bordered by the Tygee Creek. I wonder if they are flood irrigating from the Tygee Creek. The elevation of the POD appears to be around 6400'. The POU is approximately 200' lower.
