RE: Subcases 75-77A, 77-4337 & 75-10061K (Carm-Ida Livestock)

Dear Special Master Dolan:

In an effort to prepare an ADR for the above-referenced claims by November 28, 2008, the Idaho Department of Water Resources ("Department") spent additional time reviewing the files for this water right and discussing the objections with the claimant. As a result, it has become clear that it is necessary to have a Hubble Analysis performed on the claimant's property to determine the appropriate rate of flow for these water rights. Unfortunately, the Department will not be able to accomplish this for quite some time, as the Department only has one agent at this time qualified to evaluate the Hubble Analysis. The Department would like to request an extension of time within which to file the ADR until after the Hubble Analysis is conducted. I plan to provide more information to the Court at the Status Conference scheduled for January 29, 2009.

Thank you for your consideration in this matter. Should you have any questions, please do not hesitate to contact me.

Sincerely,
