EXHIBIT 1

SUBJECT: 1. Source listed on water rights 75-04005, 75-10061AH and 75-10062AG are incorrect and need to be corrected.

SUBJECT: 2. Extension of period of use on water rights 75-04005, 75-10061AH, 75-10062AG, 75-13314 and 75-13313.

Subject: 1.

I would like to make you aware that the source named on water rights 75-04005, 75-10061AH and 75-10062AG listed as Carmen Creek is incorrect. The correct water source and name of source is Freeman Creek. This needs to be corrected on the decree's to show the true source on record.

Subject: 2.

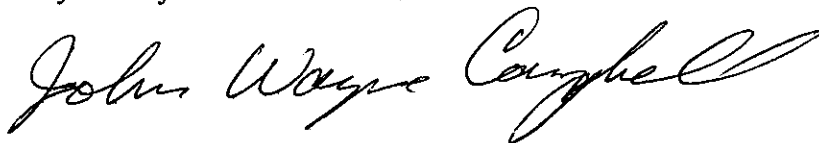

Please note that Freeman Creek's water table is extremely low during the following times of the year; mid April through mid May also from mid July to late October. This is due to runoff and recharge conditions. In early spring there is very little melt and runoff from the Bitterroot Mountains also recharge from irrigation and spring rains have not begun.

Fall precipitation is very seldom enough to raise soil moisture to levels to help winter and spring recharge. As ranchers and irrigators our experience has been that if we can irrigate a significant amount of ground that has not had adequate water through the late summer and fall we will increase recharge in the spring and have soil moisture levels high enough to give plants a better start in the spring. With spring water being inadequate this gives us a significant advantage.

Most irrigators have shut off their irrigation water by mid October leaving enough water available to irrigate until mid November or until freeze-up. Even though this is only a short period of use, we feel this has a significant effect on our ability to produce quality crops and use water during a period that won't have a negative effect on the watershed as a whole.

Therefore I'm asking for an extension of period of use for water rights 75-04005, 75-10061AH, 75-10062AG, 75-13314 and 75-13313 to be listed on records as 04-01 to 11-15.

Thank you for your consideration.
