Hayden Lake, ID 83835

February 4, 2009

To Whom It May Concern:

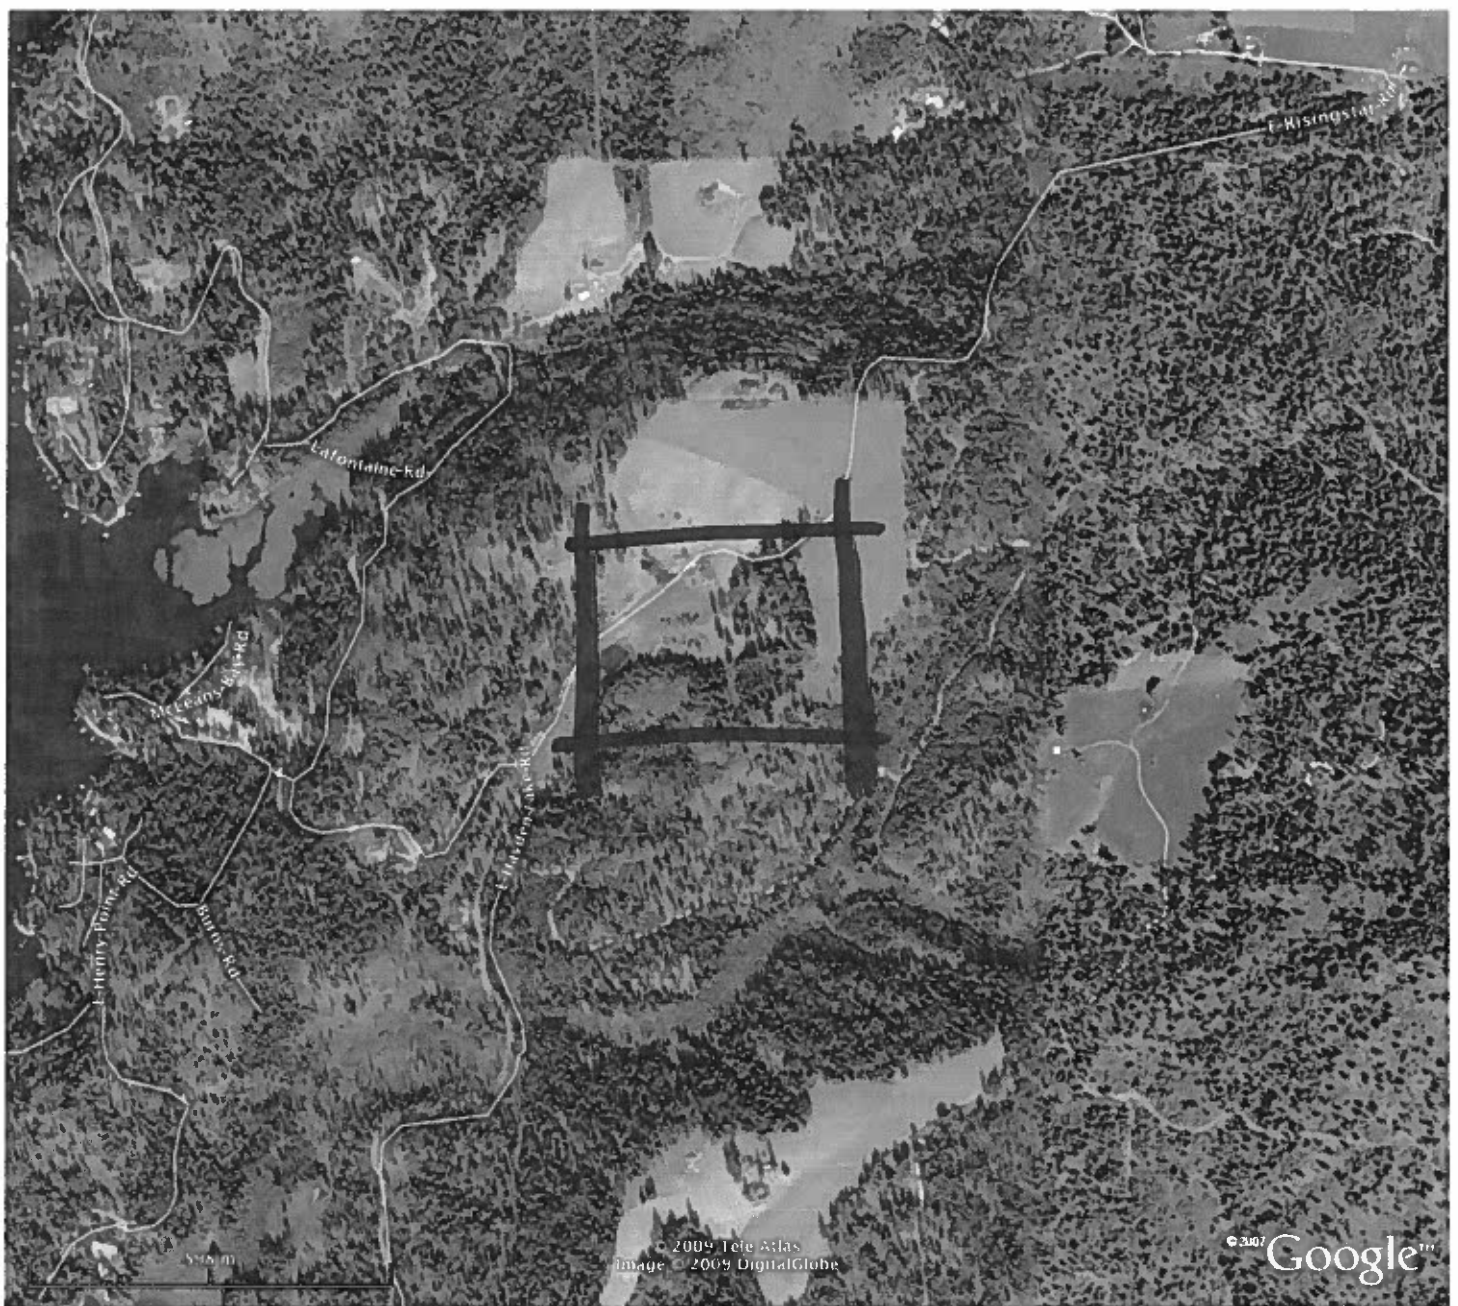

I own the farm next door to the Hayes' farm and used to live on that property. The Hayes' bought it from Todd and Ola Boren about 20 years ago. Karen Hayes asked me about the use of two of their developed springs that you don't have claims for in your files. I have those springs marked on the attached map.

I can remember as far back as 1944 that both of those springs were in use by the Borens, for their garden and for livestock. Before that, I was too young to remember.

Sincerely,

Luburtus VanderBilt

Bud VanderBilt

Portion of Hayes farm
 where 2 springs missing
 from IDWR files are
 located. Next view
 magnifies this portion &
 shows the location of
 the 2 springs.

The 2 springs are circled.

Both were used for livestock watering
+ continue to be used for this.

Spring 'A' is also used for irrigation of
new-seeded pasture (or re-seeded, for pasture improvement),
+ also forest re-planting. Spring 'B' is also used
for watering the family garden + orchard.
