RE: Snake River Basin Adjudication (SRBA) late claims 75-2065 and 75-2105

Dear Ms. Conway,

The Idaho Department of Water Resources received the order granting the motion to file late notices of claims 75-2065 and 75-2105 in January of 2009. The initial review of the claims turned up some questions that I was hoping you could clarify.

75-2065:

Water right 75-2065 was originally licensed to be used on H.E.S. 57 (see enclosed map). Claim 75-2065 claims the place of use (POU) in T23N, R18E, S34 SESW which is close to H.E.S 57. However, the map included with the claim and the GPS point of diversion indicate use on H.E.S 428 in T23N, R18E, S35.

- 1) Is your intention to claim use of water right 75-2065 on H.E.S 428 or H.E.S 57?

Secondly, since 75-2065 was originally licensed to H.E.S 57.

- 2) If it is your intent to claim use of this right on H.E.S 428, you will need to provide evidence of when that water right was transferred from H.E.S. 57 to H.E.S 428. This could be in the form of an affidavit from someone with first hand knowledge describing when the place of use for 75-2065 changed.

75-2105:

Water Right 75-2105 was originally licensed to be used on H.E.S 428 as claimed.

Between claims 75-2065 and 75-2105, you have identified two points of diversion and both of those points of diversion are located within H.E.S. 428 (See red and green points on enclosed Location Map).

- 3) Was it your intent to claim both points of diversion for water right 75-2105?

I am enclosing several maps with different aerial photography and the H.E.S boundaries identified in water rights 75-2065 and 75-2105.

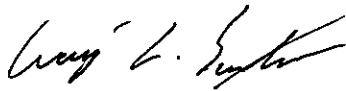

4) Please take one of the enclosed maps and draw in the irrigated acres within those boundaries, and locations of the points of diversion (if they differ).

When satisfied, please return that map along with the answers to the above questions and any evidence of change in POU for 75-2065, if applicable, to this office as soon as possible.

I know this is a lot of information to ask for in the mail, but any additional information you could provide about your historical and current water use would really help insure that accurate recommendations for claims 75-2065 and 75-2105 are made to the SRBA court.

Please feel free to contact me at (208) 287-4916 with any questions.

Sincerely,

Craig L. Saxton
Water Right Supervisor
Adjudication Bureau
