8. smaxey 8/11/2008 Overlap analysis

Comment: Overlap analysis: Water rights 95-8, 95-7185 and 95-8937 are all for domestic use. Water use does not overlap because this water right is irrigation only.

9. smaxey 8/11/2008 Field Report Narrative

Comment: Coordinates at Diversion from Hayden Lake

47 Degrees 46 Minutes 15.0 Seconds North latitude.

118 Degrees 44 Minutes 50.8 Seconds West longitude.

7.5 HP Grundfos FPS 4400 High Capacity Submersible Pump MDL # S675

The submersible pump lifts water underneath a narrow road to the top of bluff overlooking Hayden Lake. Vertical elevation change is 140 feet from the lake surface to the irrigated area that begins on the edge of the bluff.

The water line from the lake passes an electronic control station that is used to control 24 irrigation sprinkler zones. A underground vault about 30 feet from the control station houses a small pressure tank for the irrigation system. Irrigation, using lake water, occurs using surface level sprinklers.

The 4.2 acre lawn extends from the edge of the bluff eastward to Point Hayden Drive. The land rises an additional 10-15 feet in elevation over the distance between the edge of the bluff where irrigation starts and North Point Hayden Drive.

Spigots seen in the yard are not part of the irrigation system. These are connected to a potable water system using water from the North Kootenai Water District.
