RE: POU Boundary. - Amended Claims, deed.

Conversation: Per the warranty deed we corrected the ownership layer for the B portion of these rights.

In the SWNW of section 10, it should be a rectangle of approximately 20 acres (S 1/2) and the W 1/2 SENW of section 10 is also approximately 20 acres.

Gregg Draney farms the NW corner of the SENW of section although it's owned by Zane. The SE corner of the SENE of section 9 is farmed by Zane →

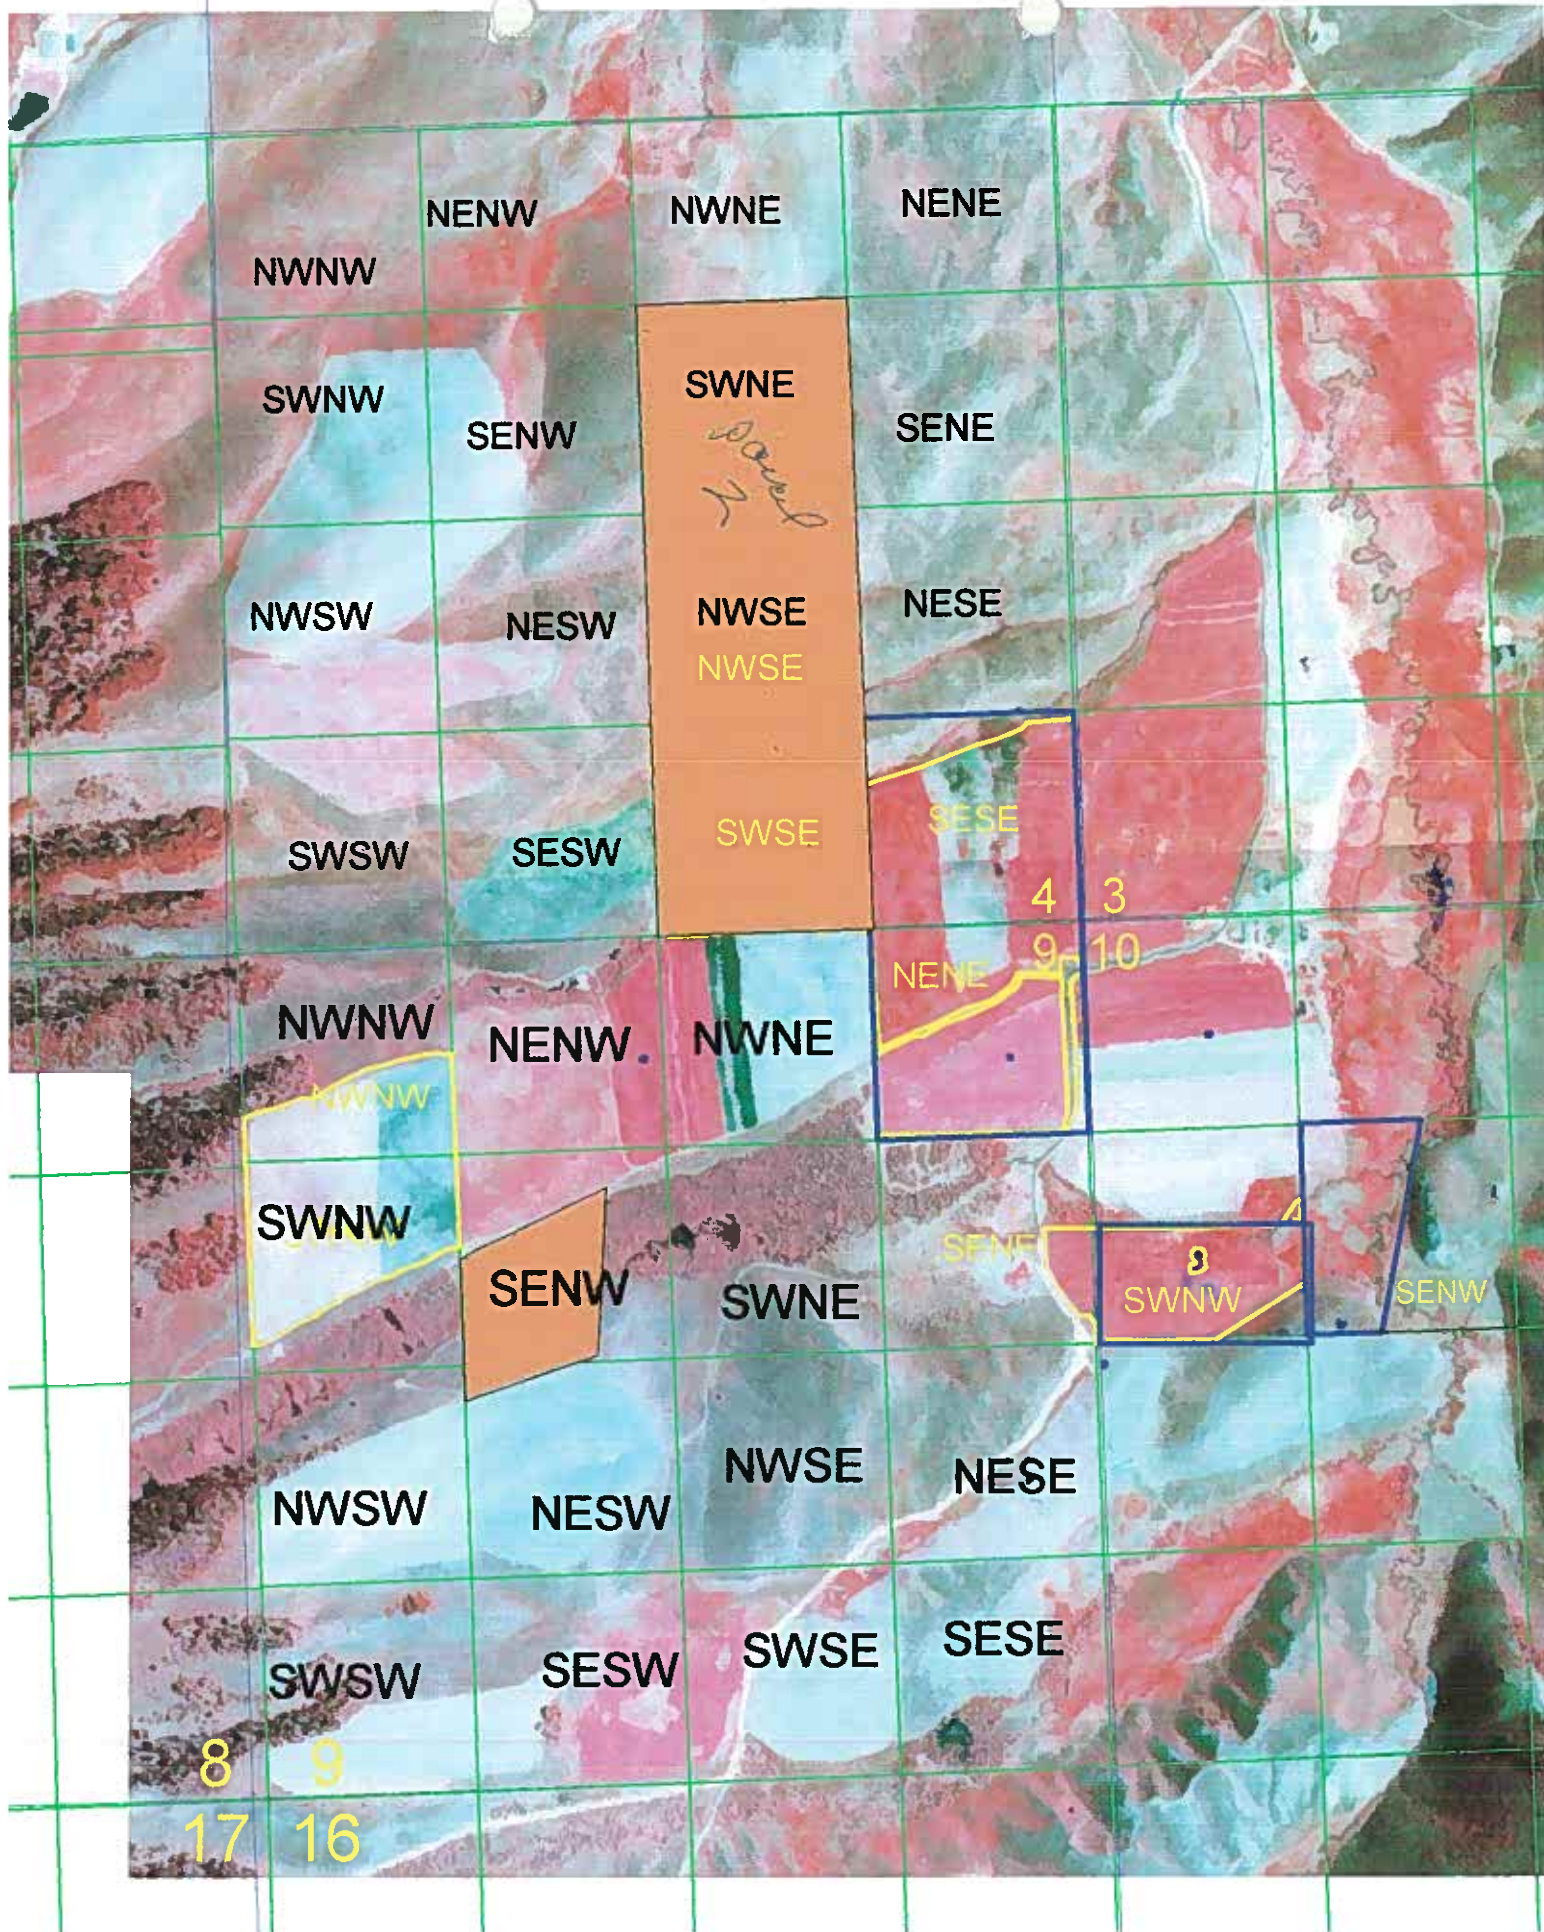

=====

Action Required:

The PPU boundaries for both A & B needs to be adjusted in the SWNW of section 10 to stay within the boundary. The change in the overall total number of acres under both A & B that division rate was not adjusted.

although its owned by Gregg. They plan to do a deed swap of the land. But for now we will note within each file of the difference.

Also the adjustment of the Poll shape for both rights is so small I'm not going to adjust the diversion rate. They would loose more than this in conveyance loss. CB

- Ownership change:

7-14-1997 This land went into a revocable trust for Gleno Draney and it went to the 3 boys.

Zan filled out the ownership change form to change it to the 3 boys.

I mentioned that if one of the boys decide to sell their portion of the land the W/R would have to be split @ \$100- each. Unless they kept it in the family business then it would \$25 @ right to ~~add~~ change the parties.

Zan is going to talk with the other 2 brothers and see if they want to split it in the adjudication or leave it as a whole piece.

CONVERSATION WITH: Zan Draney 307-886-5621.
Son of Gleno Draney.

SUBJECT: Change in POD & POH.

According to my phone conversation with
Zan, they went through FSA and change
their system to a gravity system w/ sprinklers
back in the 1960's. He didn't think they
still had paperwork on the system.

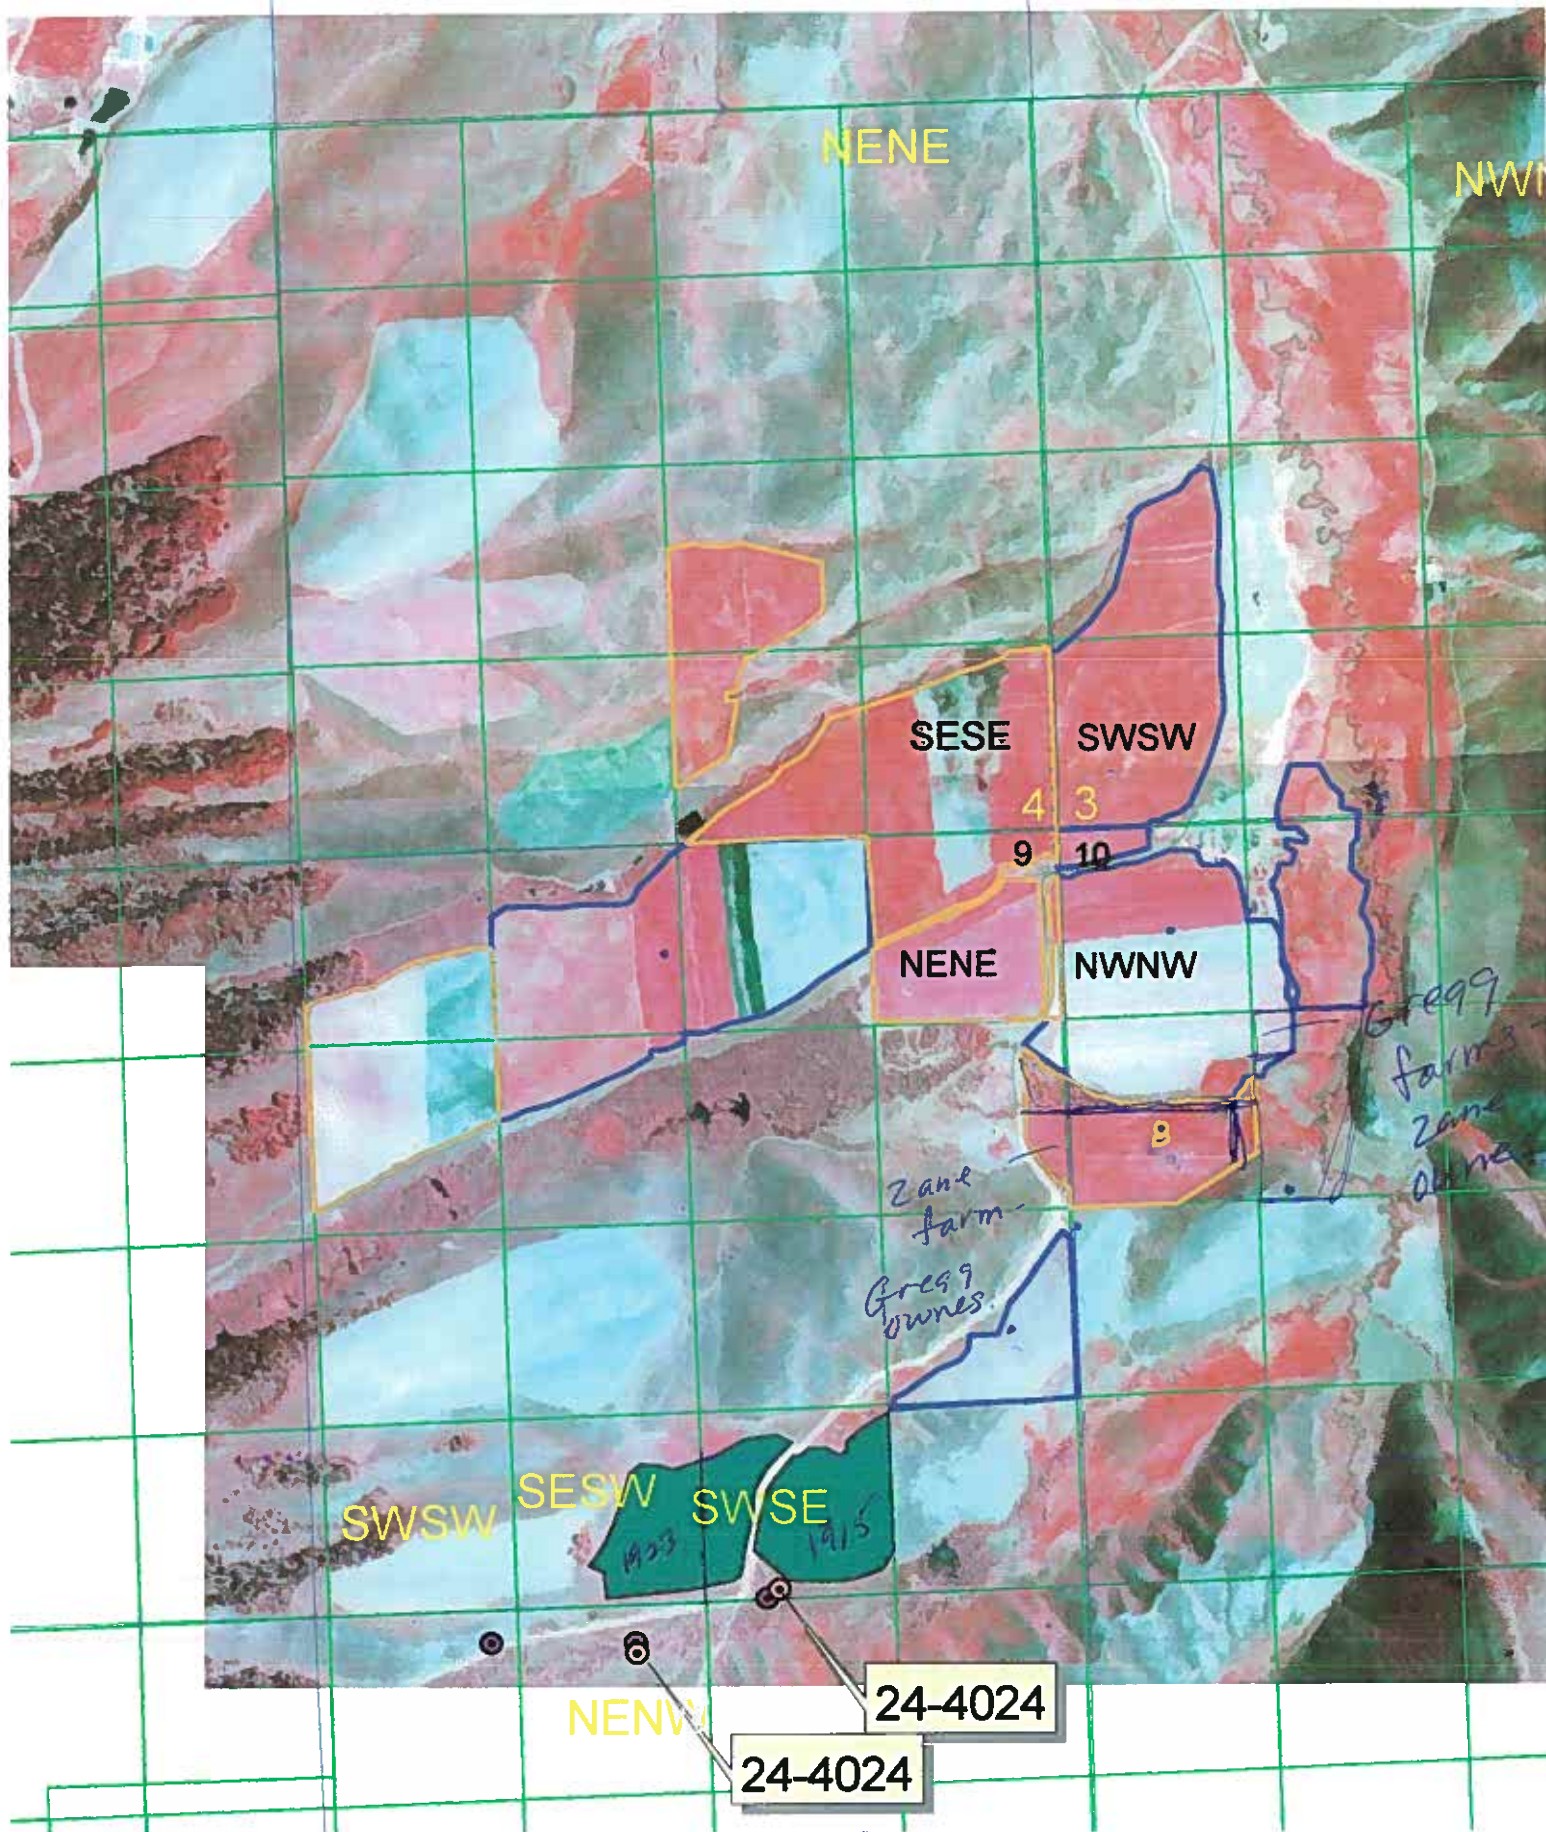

Also, Gleno passed away and the land is
now in 3-son's names. I told him we
needed an ownership change.

1964:- New sprinkler system was put in.

Sum of Proposed Rec.		390	7.8		(within 319.9 combined POU limitation)

I propose leaving the licensed diversion rate intact in order to preserve the ability to resume the original licensed practice of gravity irrigation, which requires more diversion rate than sprinklers. This requires individual acreage limits that add up to more than the PPU acreage, so a combined acreage limit may also be appropriate.
