Monica van Bussum
Idaho Department of Water Resources
P. O. Box 83720
Boise, Idaho 83720

Dear Monica,

Please provide the following list of records.

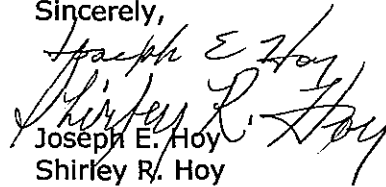

- Documentation of any amendment of License #17747.
- All supporting documentation generated at time of licensing; i.e. maps and initial report reflecting irrigable acres (would have been 1932-1937).
- Footprint of 25 irrigable acres, (18.75 acres east of the North Fork and 6.25 acres west of the North Fork).
- Documentation of any existing decrees (water rights), using Diversion 13, on land outside the subdivision.
- Water right of owner prior to creation of subdivision.
- With regard to water license #17747 and subdivision, directives to sub-contractor (Jack Ellis) and reports/correspondence by Jack Ellis.
- When physical inspection(s) were accomplished, of what part of subdivision, by whom and reports generated by inspector.
- Water right allotment of Friedorf Gulch, by lot.
- Idaho Code authorizing IDWR to divide water equally (proportioning, as established by undated letter from Senior Resource Agent Rodney A. Parker to Gene Robertson, Frontier Realty broker), between lots, when doing so alters the licensed footprint and reassigns water from original irrigated land to areas outside the original footprint.
- Documentation of change from "proportioning" and notification to owners of said change.
- Any additional correspondence between IDWR Parker to Robertson or Robertson to Parker relating to this subdivision.

- . Documentation of all decrees to each property owner since inception of subdivision to present (including to/from correspondence).
- . Satellite color copies, uniform scale, of each lot (1 through 17) reflecting designated irrigable acreage. Please show highlighted perimeter measurements of designated irrigable acreage.
- . Procedure (method or directive) used for extraction of internal portions of irrigable land and sizing of extractions. For example, road(s), structures, non-irrigable inclusions (timbered areas, slopes, etc.).
 - Lot 1, for example, road, house and garage appear to be excluded.
 - Lot 3, outbuilding (shop) and roadway appear to be excluded.
 - Lot 4, roadway appears to be excluded.

QUESTION: Per License #17747, IDWR has allotted .01 cfs for each half acre flood irrigation. What is cfs allotment for sprinkling?

Thank you, very much, for your attention to this request for documentation.

Sincerely,

Joseph E. Hoy
Shirley R. Hoy
