

FEB 19 2009

Special Master Bilyeu:

Your Honor in reference
to water rights numbers.

27-4011

27-11998

27-11999

And if advice and help from
Mr. Mike Holliday (IPWR) IP Falls.
I would like to explain a
discrepancy.

These 3 rights are all
in my pasture in Diamond Creek
with only 1 stream running into
Dia Cr (trib. TO Blackfoot River).

I ran 300 cows-calves in
the same pasture from May 1 TO
NOV 30. They have access TO
all 3 streams. This calculates
TO

$$\begin{aligned} & 300 \text{ cow calf} \times 20 \text{ gal per cow calf} / \\ & \text{day} \times 214 \text{ days} \times 1/325,850 \text{ gals.} \\ & = 3.9 \text{ AFY.} \end{aligned}$$

When I met with Elsie Teton
The Fall of 2007. She helped me
calculate a Volumetric Amount For
a settlement with the Tribe.

I must have confused her
because the following was
calculated which is incorrect.

300 cow-calf / 20 gal / ~~2~~ days
Plus 100 cow-calf X 20 gal / day X ~~2~~ days.

Your Honor and finally water
right number

27-12082 (instream stockwater
Timothy Cr.)

This is a separate pasture
with separate cows.

period of use: 5/1 — Oct 27.

40 cows X 12 gal for 1 cow / day
X 150 days X $\frac{1 \text{ acft}}{325,850 \text{ gal}}$
= 0.22 AFY.

I would appreciate your
consideration on this matter

Thank you
