RE: Late Claim No 22-13867

Dear Mr. Carlsen,

As you requested in your letter of March 18th, I have highlighted the irrigated parcels on the photo map you sent me. I have conservatively reduced the area in the northern portion per our discussion today. I'm not sure, however that the aerial photo hasn't biased my estimate since the greener area we both noted may represent the northern most ditch. I'll look forward to checking it out this summer, not that it affects your efforts. For me it's one more thing to learn about the place.

Thanks again for your help.
