RE: Snake River Basin Adjudication (SRBA)
Claim Numbers: 72-00176E and 72-00201F

Dear Mr. and Mrs. Goicoechea:

I am writing in response to your reply to our Notice of Error forms concerning the above mentioned claims. I hope that this letter will explain how the preliminary recommendations for quantity, period of use and place of use were arrived at for each parcel. Please note that your original Notices of Claim for a Water Right, filed August 27, 1992, were unsubstantiated claims, and as such, subject to further investigation, now completed.

72-00176E: The *place of use* for each water right in Idaho encompasses the portion of the parcel that is actually irrigated. In the case of your lot on Road Creek, this only includes that part of your lot located on the valley floor, excluding the hillsides to the north and south. This Adjudication is concerned with present irrigation practices, and cannot include any acres that a landowner may wish to irrigate in the future. The number of acres irrigated on the valley floor in your lot 4 was calculated to be 3.0 acres by a computer program known as Arc View, which is quite accurate in determining area. I believe that my recommendation for place of use is correct for this claim, unless you provide specific information showing that additional irrigated acres exist.

The basis of this claim is a court decree from 1921, which specifies that the purpose of use for this water is Irrigation. As a general provision, IDWR allows the inclusion of stockwater in any irrigation claim, however, the stated *period of use* must be within the irrigation season, if the claim is based upon a license or decree for irrigation only. The irrigation season for basin 72, based on climate analysis conducted by the Department, is determined to be April 01 through October 31.

The diversion amount for stockwater must also be included in the total diversion amount allowed under the right for irrigation, if the claim is based upon a decree for irrigation only. As was explained to Susan, from your office, on December 17th, the 1921 Decree on Road Creek awarded a total of 0.4 cfs from Road Creek, to irrigate the approximate 20 acres (my calculations), originally owned by Leuzinger, located within the valley floor between the boundary of federal land and the county road. This amounts to one inch (or 0.02 cfs) per acre of water, long a standard amount for irrigation in Idaho.

Using this figure, 3.0 acres of land would be awarded 0.06 cfs of water for irrigation, with any diversion amount for stockwater inclusive, and that is my recommendation. Your claim for 0.2 cfs would not be possible, as that would be one half of the total decreed amount for use on only 15% of the property originally irrigated.

72-00201F: The *place of use* for this claim includes the area below (north of) the ditch that winds from the East Fork, along the base of the ridge, and delivers water to the series of lots located in the bottomland. It does not include that part of the lot that appears to be sand bar and marshy ground that subs up from the riverbank. If you disagree with my findings, please provide details showing ditches closer to the southern lot line, or information verifying that the land along the riverbank is being actively irrigated, and we can further discuss the *place of use* recommendation.

The preliminary recommendation for *period of use*, was determined using the same method as for claim number 72-00176E, for both irrigation and stockwater.

Also explained to Susan, on December 17th, was that this claim for lot 20 Pine Creek Subdivision, is based upon the 1938 East Fork Decree, which specifically intended to award 1½ inches (or 0.03 cfs) per irrigated acre. Using that figure, the 3.9 acres I found irrigated would be awarded 0.12 cfs of water, with any diversion amount for stockwater inclusive, and that is my recommendation.

If you have specific information that would disprove any of the Department's findings on either of the above claims, please bring it to my immediate attention, as the actual Director's Report to the SRBA Court is scheduled for mailing the middle of January 1999. If I can be of any further assistance, please do not hesitate to call.

Sincerely,

IDWR Employee/Agent Tong Jones Date 12/17/98Contact Person(s) Susan at Goicoechea Law Offices, Interfacing for Jerry GoicoecheaNature of Contact Inquires about acres and flow rate.

Substance of Communication Discussed GIS layouts & which areas were included (reply w/in bright yellow line). No issue was raised about size or exclusion. We then talked about flow rate and I explained the duty of water in original decrees. On E.FK it was 1 1/2" / ac (Goss vs Grampiedraglio) & on Reed Cr it was 1" (Bradshaw vs Leezinger) at least for 176 which was apparently awarded 20" (0.40 cfs) for 19.5 ac. She indicated she'd present info to claimant & may be back in touch.
