Claim Number 72-00230C:

Dear Claimants:

Please accept my apologies for this untimely late reply to the letter received by the Department from J. Dunfee on February 16, 1999. The letter was routed incorrectly, just surfaced, and given to me this morning.

You are correct in your assumption that claim number 72-00230C represents a water right claim for Lot 2, East Fork Subdivision. There are written remarks to that effect on the original claim which were not printed on the Director's Report recommendation. I am enclosing a computer print-out of the claim as originally filed, which includes this remark, so you may have it for your records. I also want to refer you to the GIS map you should have received of claim number 72-00230C, which has outlined Lot 2 as the irrigated *Place of Use*.

I hope that this ends any confusion, and is sufficient for your records. We appreciate your cooperation in the SRBA. If I can be of any further help regarding your East Fork claims, please don't hesitate to contact me directly, and I'll try to be a bit more prompt with an answer.

Sincerely,

Vikie Hancock

RE: Water Rights in Reporting Area 4, Basin 72
Snake River Basin Adjudication (SRBA)

Dear Water Right Claimant(s):

Please find enclosed the Idaho Department of Water Resources recommendations for your water right(s) in part of basin 72 (Upper Salmon River area). We have also enclosed instructions for reviewing (1) your recommended water right(s), and (2) other recommended right(s) in your area. Water rights for nearly all domestic and/or stockwater rights were recommended separately in an earlier report, and most of those now have been decreed by the SRBA Court.

Note you have 120 days in which to review the water rights of other claimants and to file any objection to our recommendations. Information on the other water rights can be found at the county courthouse in Challis and at all of the Idaho Department of Water Resources offices (see addresses in enclosure).

If the SRBA Court does not receive an objection to our recommendation from you and no other party objects to your water right, your water right will be decreed later this year as recommended. You will receive your decree from the SRBA Court.

Completion of the SRBA is important for the future of water management in Idaho. We invite you to contact our regional offices with any questions you have about your water right(s) or this adjudication process.

Sincerely,

Karl J. Dreher
Director

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

Section 24: S2NW4, NE4SW4

The decree of 2-14-1938, Rosa A. Gossi, et al., vs. Paul Giampedraglia, et al. decreed rights on the East Fork Salmon River and named tributaries. Fridolin Leuzinger and his lands in the two prior decrees on East Fork Salmon River were enjoined in this decree:
