RE: Snake River Basin Adjudication (SRBA)
Claim number 72-00230B located on the East Fork, Salmon River
Dunfee Family Trust

Dear Mr. and Mrs. Dunfee:

I spoke to our legal staff about the objection by the BLM of the point of diversion recommended for this water right claim on the East Fork. I explained to them that the objection was the direct result of a clerical error on my part that identified the point of diversion in the wrong 40 acre tract.

I have corrected the legal description of the point of diversion for this claim so that it matches the legal description of your other claim, 72-00230C, and correctly describes the location of EF-5. Our legal staff is preparing to contact the BLM and stipulate to the correct location. This should resolve any objection that the BLM may have to this particular water right.

I apologize for the inconvenience this has caused you. As I explained to Mr. Dunfee, the court limited the Department's involvement in these objections between parties, however, when it is obvious that we are in error, we will do all that is necessary to rectify the situation. If the BLM or Forest Service have objected to any of your other claims on the East Fork, Morgan Creek or Salmon River, please feel free to contact me regarding your East Fork claims, or Kelly Christensen about your Morgan Creek claims and we will try to be of assistance.

Sincerely,

Vikie Hancock

COMMUNICATION DOCUMENTATION

From: Vikie Hancock

September 16,

Regarding:

72-00230B

Customer:

Jude Dunfee

Mr. Dunfee called regarding his various AJ claims on the East Fork and Morgan Creek. His specific question concerning the above claim is that the point of diversion legal is incorrect. I checked, and it looks like there was a typographical error that put the p/d in the wrong 40 ac tract. I believe this was my typographical error. I told him that we could probably take care of this as an administrative procedure, and would keep him informed.

He was concerned about the BLM objections on his claims. I explained that the Department was involved only to the point that we had made the recommendations that the BLM was objecting to. I assured him that if the Department had incorrectly recommended the place of use or pt. of diversion (as I did on 230B) that we would make the changes necessary to correct the situation, but if our recommendations correctly described the water right, the solution would have to be arrived at between the claimant and the BLM.

He said his wife usually takes care of these things, but is in California. I told him that when she comes back, she could call me if she had questions.

he allowed as how we had pretty good place of use. I asked
that if he has no problem now if he would sign for it return them
he could still object if something came to light later. He indicated he
leased Morgan Co/Calbank land & didn't know things yet. I asked if he
was going to be in touch w/ lease holder. He said he was going to
call is early Jan. I asked to please go over these w/ leases &
if there is something that needs work to get back w/ us ASAP -
better to correct now than after recommendation. Explain increased

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.
