Dear Bob,

Enclosed are eight water right applications Form No. 42-1409(2)a, along with 2 checks to cover filing fees.

I have enclosed one complete copy of "The East Fork" subdivision map and attached an abbreviated version of same to each respective application with the individual lot highlighted. I hope the extra maps will help with your review of the applications.

As we discussed I would appreciate your help with Question Numbers 2,4,5, and 15 on each application. The forms are returned with the yellow, applicants copy, attached because the answers to these questions are not complete.

If I can help with any questions, please call me at (702) 784-5242.

Thankyou very much for all your help in completing these applications.

Sincerely,

Jeff Boyer

Dear Mr. Cowles:

Your letter dated February 11, 1994 was recieved here on February 14, 1994 and the Certified Mail receipt signed for return.

The information recited clarifies how the incomplete claim forms were filled out. Your mention of the Water Rights Proof Reading Reports dated 9-22-1987 documenting the answers to the incomplete fields in your claims forms indicates that you are satisfied with Mr. Worstell's work in completing your claims.

Thank you for your effort in clarifying the source of the information inserted into the forms after they were recieved by us.

Yours Truly,

Dear Mr. Hitchcock,

In response to your letter of 1/31/94, SRBA Claims: A72-00176F, 00230J, 00230K, 00230L, 00230M, 00230N were completed with considerable help from Mr. Worstell of the IDWR staff. The cooperative relationship between Mr. Boyer (acting as my agent) and Mr. Worstell is documented by 1) Mr. Boyer's letter of 1/4/90 to Mr. Worstell, 2) five or more telephone conversations to Mr. Worstell logged by Mr. Boyer between 10/31/89 and 6/29/90, and 3) certified mail receipts dated 1/7/90 and 1/12/90. At our request, Mr. Worstell completed questions 2,4,5 and was to plot the point of diversion in order to complete question #15 on the "Notice Of Claim" forms prior to the filing deadline. This is documented by draft forms in our possession, by his initials on the certified mail receipt dated 1/7/90, and his logged phone call to Jeff Boyer on 1/9/90 in which he suggested that we file a second claim on an alternate source for the water right on Lot 6, Block 1.

The competent help of Mr. Worstell was very much appreciated and was necessary on those questions that involved local inspections of physical features (i.e., #4, #5 and the P.O.D. for #15) and on questions relating to existing water right decrees (i.e., #2). Since completion of the filings, we verified the information provided by Mr. Worstell. I have copies of the "Water Rights Proof Reading Reports" dated 9/22/87 that document answers to Questions #2 and #15, and have confirmed answers to Questions #4, #5, and #15 with Mrs. Baker (one of the local irrigators) by telephone.

In order to clarify your broader questions regarding these filings, it was our clear understanding (based on several conversations between Mr. Boyer and Mr. Worstell before and after the filings were made) that it was the intent of the Department to help complete these filings where knowledge of local decrees or specific physical features was required. On several occasions Mr. Boyer was assured that the applications could be completed WITHOUT our direct observation. We were given the distinct impression that this type of assistance was absolutely normal and customary.

We believe this should answer the questions raised in your letter and would appreciate a written response to that effect.

Sincerely,

A handwritten signature in cursive script, reading "Robert Cowles". The signature is written in dark ink and is positioned above the printed name and company.

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

Lot 32 Block 2 East Fork Subdv.
Source: East Fk Salmon River

9/11/98
V. Hancock

<<<< East

West>>>>

Photo taken from a knob overlooking lots 32 and 32. Photo looking nearly direct south.

Lot 31 is in the foreground. It is triangularly shaped, extending roughly from the green area in the lower right hand corner of the picture; along the wooden fence that borders the dirt road below us; to a boundary line that cuts east/west through the field from the dirt road to the fenced area marked with an X; then directly north to the point of beginning. The green line looping along the contour of the hill to the left is the main ditch that serves the subdivision. There is no indication that this lot has been actively irrigated, but that the green areas are spill over from the ditch that runs through it.
