Re: Modified condition for United Water Idaho, Inc. water right no. 63-2892

Dear Diana:

I am enclosing a revised version of the corrected Director's Report for the water right referenced above. The corrected Director's Report for this right that was mailed to the SRBA Court in August contained a quantity condition carried over from a previous transfer. The transfer was filed to add a point of diversion to right no. 63-2892, and it had been approved prior to the filing of three SRBA claims by United Water Idaho based on beneficial use for water that had been diverted at the same pumping facility where right no. 63-2892 had been developed. The condition has now been modified to recognize the three additional water rights that have been recommended in the SRBA as being diverted from the pumping facility located in T03N, R02E, S14, Lot 7, SENE.

Additionally, Lot 7 was added to the point of diversion in Section 14 for right no. 63-2892 in order to be consistent with the description of the point of diversion listed in right nos. 63-31797, 63-31798 and 63-31879.

Sincerely,

Carter Fritschle
Section Manager
