Every person, including but not limited to an individual, partnership, association, public or private corpora-

tion, city or other municipality, county, state agency or the state of Idaho, and the United States of America, when claiming water rights established under the laws of the state of Idaho, is hereby notified that all water rights or claimed water rights relating to the withdrawal or diversion of public surface or ground waters of the state for uses other than domestic purposes as defined in section 42-230(d), Idaho Code, except those water rights based upon authority of permit or license issued by the department of water resources or one of its predecessors or water rights which have previously been adjudicated by a court having jurisdiction of such matters, must be registered with the department of water resources, Boise, Idaho, not later than June 30, 1983. Such claim shall be in affidavit form on forms furnished by the department of water resources and shall set forth:

- a. The name and post-office address of the claimant.
- b. The quantity of water claimed to have been used.
- c. The source of the water supply.
- d. The location of the point or points of diversion.
- e. The nature of the use and the period during each year when the water is used for such purposes.
- f. The priority of the right claimed which shall be determined by the date when the water was first applied to a beneficial use provided there has been no period of abandonment or nonuse or forfeiture of the water right since that date.
- g. If water is claimed for irrigation, the legal description of the lands irrigated.
- h. Such other information as shall be required by the

blank form furnished by the department.

Such claim may be accompanied by maps showing the place of use, affidavits of witnesses familiar with the uses claimed, measurements of the water diverted and used, and such other information as the claimant may wish to submit.

SECTION 7. That Section 42-225b, Idaho Code, be, and the same is hereby amended to read as follows:

~~42-225b 42-244. RECORDING OF CLAIMS BY DEPARTMENT --~~ CORRECTIONS. Upon receipt of any claim submitted under this chapter, together with the statutory filing fee of \$10.00 as set forth in section 42-221, Idaho Code, it shall be the duty of the department of water resources to file and to maintain a record of such claim, which shall be available for public inspection during all normal office hours. The department shall also cause a notice to be published once a week for two (2) consecutive weeks in a newspaper published and of general circulation in the county where the water is claimed to be diverted, if there is such a newspaper, otherwise in a newspaper of general circulation in the county, which said notice shall set forth such information as shall apprise the public of the nature of the claim which has been filed. At any time after the filing of a claim under the previous section, any person who disagrees that a right has been established as set forth in said claim may file an exception thereto in duplicate, in affidavit form, accompanied by such proof as said person deems appropriate. An exception filed shall be made a part of the file of the claim in the department of water resources and shall be considered the same as other evidence in said file. A copy of an exception filed shall be forwarded to the claimant by the department of water resources. Such claims may be corrected by the claimant only by filing of an amended claim in the same form as the original, which shall be recorded and numbered by the department the same as the original, and for which no additional filing fees shall be required.

SECTION 8. That Chapter 2, Title 42, Idaho Code, be, and the same is hereby amended by the addition thereto of a NEW SECTION, to be known and designated as Section 42-245, Idaho Code, and to read as follows:

42-245. FAILURE TO FILE CLAIM WAIVES AND RELINQUISHES

SECTION 9. That Chapter 2, Title 42, Idaho Code, be, and the same is hereby amended by the addition thereto of a NEW SECTION, to be known and designated as Section 42-246, Idaho Code, and to read as follows:

42-246. FILING OF CLAIM NOT DEEMED ADJUDICATION OF RIGHT -- EVIDENCE. The filing of a claim does not constitute an adjudication of any claim to the right to use of waters as between the water use claimant and the state, or as between one (1) or more water use claimants and another or others. A statement of claim filed pursuant to section 42-243, Idaho Code, shall be admissible in a general adjudication of water rights as evidence of the times of use and the quantity of water the claimant was withdrawing or diverting as of the year of the filing, if, but only if, the quantities of water in use and the time of use when a controversy is mooted are substantially in accord with the times of use and quantity of water claimed in the claim. A claim shall not otherwise be evidence of the priority of the claimed water right.

SECTION 10. That Chapter 2, Title 42, Idaho Code, be, and the same is hereby amended by the addition thereto of a NEW SECTION, to be known and designated as Section 42-247, Idaho Code, and to read as follows:

42-247. NOTICE OF CHAPTER PROVISIONS -- HOW GIVEN -- REQUIREMENTS. To ensure that all persons referred to in sections 42-242 and 42-243, Idaho Code, are notified of the provisions of this chapter, the department of water resources is directed to give notice of the provisions of this chapter as follows:

(1) It shall cause a notice in writing to be placed in a prominent and conspicuous place in at least one (1) newspaper published and of general circulation in each county of the state, if there is such newspaper, otherwise in a newspaper of general circulation in the county, at least once each year for five (5) consecutive years.

SECTION 11. That Title 42, Idaho Code, be, and the same is hereby amended by the addition of a NEW CHAPTER to be known and designated as Chapter 15, Title 42, Idaho Code, and to read as follows:

CHAPTER 15

42-1501. LEGISLATIVE PURPOSE - MINIMUM STREAM FLOW DECLARED BENEFICIAL USE. The legislature of the state of Idaho hereby declares that the public health, safety and welfare require that the streams of this state and their environments be protected against loss of water supply to preserve the minimum stream flows required for the protection of fish and wildlife habitat, aquatic life, recreation, aesthetic beauty, transportation and navigation values, and water quality. The preservation of the water of the streams of this state for such purposes when made pursuant to this act is necessary and desirable for all the inhabitants of this state, is in the public interest and is hereby declared to be a beneficial use of such water. The legislature further declares that minimum stream flow is a beneficial use of water of the streams of this state for the purpose of protecting such waters from interstate diversion to other states or by the federal government for use outside the boundaries of the state of Idaho. Minimum stream flows as established hereunder shall be prior in right to any claims asserted by any other state, government agency, or person for out of state diversion. It is, therefore, necessary that authority be granted to receive, consider, approve or reject applications for permits to appropriate water of the streams of this state to such beneficial uses to pre-

serve such water from subsequent appropriation to other beneficial uses under the provisions of chapter 2, title 42, Idaho Code.

42-1502. DEFINITIONS. Whenever used in this act, the terms:

(a) "Appropriate" or "appropriation" mean the identification of a beneficial use and place of in-stream use of the waters of a stream. It shall not be construed to require any kind of physical structure or physical diversion from the stream;

(b) "Board" means the Idaho water resource board;

(c) "Department" means the Idaho department of water resources;

(d) "Director" means the director of the Idaho department of water resources;

(e) "Stream" means any lake, spring, creek, stream, river or other natural body of standing or moving water which is subject to appropriation under the laws of the state of Idaho;

(f) "Minimum stream flow" means the minimum flow of water in cubic feet per second of time or minimum lake level in feet above mean sea level required to protect the fish and wildlife habitat, aquatic life, recreation, aesthetic beauty, navigation, transportation, or water quality of a stream in the public interest;

(g) "Unappropriated water" means water which is not subject to diversion and use under any prior existing water right established by diversion and application to a beneficial use or by application, permit or license on file or issued by the director under the provisions of chapter 2, title 42, Idaho Code, with a priority of water right date earlier than an application for appropriation of minimum stream flow filed under the provisions of this act.

42-1503. APPLICATION TO APPROPRIATE - PROCESS - JUDICIAL REVIEW. Whenever the board desires to appropriate a minimum stream flow of the unappropriated waters of any stream, it shall submit an application to the director. Such application shall be made upon forms to be furnished by the director and shall include:

(a) The name of the stream and legal description of the point on the stream where the minimum stream flow is proposed to be appropriated and determined;

(b) The minimum stream flow proposed;

(c) The purpose for which the minimum stream flow appropriation is proposed to be made;

(d) The period of time or season of the year during which said appropriation is proposed; and

(e) Such other information as shall be required by the form furnished by the director.

Upon the receipt of an application filed under the provisions of this act, the director shall forward a copy thereof to the departments of fish and game, health and welfare, parks and recreation, and any other public entity likely to have an interest or knowledge in the matter. The director shall also prepare a notice describing the proposed appropriation of minimum stream flow and cause said notice to be published once each week in two (2) consecutive weekly issues of a newspaper published within the county where the appropriation of minimum stream flow is proposed, if there is such newspaper, otherwise in a newspaper of general circulation within the county. The director may also give other notice of the proposed appropriation in such manner and to such persons or organizations as he may determine. Such notice shall specify the time and place for a public hearing to be held concerning the proposed appropriation of minimum stream flow. Such hearing shall be held under rules and regulations promulgated under provisions of chapter 52, title 67, Idaho Code. The director shall have power to administer oaths and to require the attendance of such witnesses and the production of such books, records, and papers as he may desire at the hearing and for that purpose the director may apply to the district court for a subpoena for any witnesses or a subpoena duces tecum to compel the production of any books, records, or papers which shall be served and returned in the same manner as a subpoena in a civil case. In case of any disobedience or neglect to obey a subpoena or subpoena duces tecum it shall be the duty of the district court in any county of this state in which such disobedience, neglect, or refusal occurs, or any judge thereof, on application by the director, to compel obedience by proceedings for contempt as in the case of a subpoena issued by a regularly constituted court. Upon the conclusion of the hearings and completion of any investigation conducted by the director, he shall enter his findings in writing approving the application in whole, or in part, or upon conditions or rejecting said application. Approval of any such application must be based upon a finding that such appropriation of minimum stream flow:

(a) will not interfere with any vested water right, permit, or water right application with priority of right date earlier than the date of receipt in the office of the director of a complete application for appropriation of minimum stream flow filed under the provisions of this act;

(b) is in the public, as opposed to private, interest;

(c) is necessary for the preservation of fish and wildlife habitat, aquatic life, recreation, aesthetic beauty,

navigation, transportation, or water quality of the stream; (d) is the minimum flow or lake level and not the ideal or most desirable flow or lake level; and (e) is capable of being maintained as evidenced by records of stream flows and water levels and the existing or future establishment of necessary gauging stations and bench marks.

A copy of the director's findings shall be mailed to the board and to each person or organization who gave testimony in support of or in opposition to the proposed appropriation. The board or any person testifying at a hearing who is aggrieved by a decision of the director shall have the right to have that decision reviewed by the district court in the county where the appropriation of minimum stream flow is proposed. Except as otherwise provided in this act, judicial review shall be accomplished in the manner provided in sections 67-5215 and 67-5216, Idaho Code. Approved applications shall be submitted to each legislature by the fifth legislative day of each regular session, and: (i) shall not become finally effective until affirmatively acted upon by concurrent resolution of the Idaho legislature; or (ii) except that if the legislature fails to act prior to the end of the regular session to which the application was submitted, the application shall be considered approved.

42-1504. REQUEST TO FILE APPLICATION. Any person, association, municipality, county, state or federal agency may, in writing, request that the board consider the appropriation of a minimum stream flow of the unappropriated waters of any stream. Said request shall be in writing and provide the same information required in the form provided for by section 42-1503, Idaho Code. The board shall consider said request within six (6) months after it is filed and may proceed to reject or accept the proposal. There shall be no right of review of any board decision rejecting a request under this section. If the board decides that the request has merit, the board shall proceed as provided in this act. The board may hold hearings in reaching its decision and shall notify the requesting party of its decision.

42-1505. PRIORITY DATE -- ADMINISTRATION. In his direction and control of the distribution of water from the streams of this state under the provisions of chapter 6, title 42, Idaho Code, the director shall consider any approved application for appropriation of minimum stream flow filed under the provisions of this act as a water right with priority date as of the date of receipt in the office of the director of a complete application. Water shall not be deemed to be available to fill any water right of later

priority date if diversion of such water would result in decrease in the flow of the stream or level of the lake below the minimum stream flow or minimum lake level specified in said approved application for appropriation of minimum stream flow at the locations described in said approved application.

SECTION 12. That Section 42-1756, Idaho Code, be, and the same is hereby amended to read as follows:

42-1756. LOANS FROM FUND ACCOUNT -- APPLICATION -- INVESTIGATION -- APPROVAL -- REPAYMENT -- STATEMENT -- FILING -- DEFAULT. (a) Any irrigation district, canal or irrigation company, water users' association, municipal corporation, municipality, private corporation, or, in special cases approved by the board, an individual may file an application with the board for a loan from the revolving fund account for the purpose of financing project costs. Such application shall be filed in such manner, and shall be in such form and be accompanied by such information as may be prescribed by the board; provided, however, that any such application filed with the board under the provisions of this act, shall:

- (1) Describe the nature and purpose(s) of the proposed project.
- (2) Set forth or be accompanied by a plan for development of the proposed project, together with such engineering and economic feasibility data and estimated costs of construction as may be required by the board.
- (3) State whether money other than that for which application is made to the board will be used for project costs, and whether such money is available or has been sought for this purpose.
- (4) Show that the applicant holds or can acquire title to all lands or has the necessary easements and rights-of-way for the project and related lands, and has or can acquire all water rights necessary for the construction, operation and maintenance of the proposed project, or that there exists sufficient water available for appropriation by proof of a permit issued by the director of the department of water resources.
- (b) Upon receipt of an application, the board shall evaluate and, if it deems it to be necessary, investigate all aspects of the proposed project and the proposed construction thereof. As a part of such investigation, the board shall determine whether the plan for development of the project is satisfactory. If the board determines that the plan is unsatisfactory, it shall return the application to the applicant and may make such recommendations to the

applicant as are considered necessary to make the plan satisfactory.

(c) The board may approve a loan for project costs if after investigation (if this is deemed necessary,) and evaluation it finds that:

- (1) The plan does not conflict with any extant Idaho state water plan;
- (2) The proposed project is feasible from an engineering standpoint and economically justified, with studies showing a favorable benefit to cost ratio;
- (3) The plan for development of the proposed project is satisfactory;
- (4) The applicant is qualified and responsible;
- (5) There is reasonable assurance that the borrower can repay the loan;
- (6) That money in the revolving fund account is available for the loan; and
- (7) That the loan does not exceed \$100,000 five hundred thousand dollars (\$500,000) unless legislative approval has been obtained.

(d) If the board approves a loan, the board and the applicant or applicants shall enter into an agreement for repayment to the revolving fund account of money loaned therefrom, together with interest thereon at reasonable rates as determined by the board. The agreement shall further provide that repayment of the loan, together with interest thereon, shall commence no later than one (1) full year after construction of the project is completed, and that repayment shall be completed within the time period specified by the board. The repayment period shall not exceed sixty (60) years, except that the board may extend the time for making repayment in the event of emergency or hardship. Such agreement shall also provide for such assurances of, and security for, repayment of the loan as are considered necessary by the board.

(e) The state shall have a lien upon a project constructed with money from the revolving fund account for the amount of the loan, together with the interest thereon. This lien shall attach to all project facilities, equipment, easements, real property and property of any kind or nature associated with the project and all water rights associated in any way with the project. The board shall file a statement of the loan, its amount, terms and a description of the project with the county recorder of each county in which the project or any part thereof is located. The county recorder shall record the lien in a book kept for the recording of liens and it shall be indexed as other liens are required by law to be indexed. The lien shall be valid until paid in full or otherwise discharged. ~~The lien shall be valid until~~

~~paid-in-full-or-otherwise-discharged.~~ The lien shall be foreclosed in accordance with applicable state law governing foreclosure of mortgages and liens as set forth in chapter 1 of title 6, Idaho Code, chapter 13 of title 45, Idaho Code, and related provisions of the statutes of this state.

(f) If an applicant fails to comply with the repayment contract, its interest in the project may be conveyed to a successor upon approval by the board, which may contract with the qualified successor in interest of the original obligor for repayment of the loan, together with the interest thereon, and for succession to its rights and obligations in any contract with the board.

(g) The state shall have a lien on any or all projects which the board improves or renovates with money from the revolving fund account, and such lien shall be valid and continue in effect until such funds, together with interest thereon, have been paid in full and the lien discharged. The board shall file a statement of the lien, and the lien shall be foreclosed upon all project property and rights as provided in subsection (e) above.

SECTION 13. The provisions of this act are hereby declared to be severable and if any provision of this act or the application of such provision to any person or circumstance is declared invalid or unconstitutional for any reason, such declaration shall not affect the validity of remaining portions of this act.
