OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

No demand on upstream prior rights or existing prior exchanges can be made and no interference with prior rights located between the diversion pump and the exchange wells will be allowed even if the exchange wells are pumping water into the Teton River.

Totalizing measuring devices shall be maintained at the exchange wells and redirection pumps from the Teton River.

The exchange wells must inject water into the Teton River whenever water is being diverted from the river under this water right, and the injection must continue after the diversion from the Teton River ceases until the water not diverted reaches the point of injection.

The right holder shall accomplish the change authorized by transfer 74650 within one year of the date of February 20, 2009

The rate of diversion from the Teton River shall not exceed the rate of injection into the Teton River from the exchange wells.

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. As of February 20, 2009, this water right is within State Water District No. 01.

Exchange well diversion capacity is owned half by Schwendiman Farms and half by M & B Enterprises for a total capacity of 56.36 cfs.
