Hi Judy,

Please take care of a last copy request by Jay Neider who was in the office today getting copies of some documents here. For claims A71-10117 and A71-10631, please send certified copies of the signed last originals (I think he amended them in '92.) to him before the end of the week

Jay Neider
5821 Morning Dove Dr
Nampa ID 83686

Thanks and let me know please when you have the copies ready for the mail.

DISTRICT COURT - SRBA
TWIN FALLS CO., IDAHO
FILED

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE
STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re SRBA

Case No. 39576

A. Subcase 71-10631

STANDARD FORM 1

OBJECTION

Please fill in the following information:

B. NAME AND ADDRESS OF PERSON OBJECTING

Name: Jay Carrol Neider
Connie A. Neider

Address: 5821 Morningdove Drive
Nampa, ID 83686

Daytime Phone: (208) 774-3521

Name & Address of Attorney, if any:

Norman M. Semanko
Rosholt, Robertson & Tucker
P.O. Box 1906
Twin Falls, ID 83303-1906

C. CLAIMANT OF WATER RIGHT AS LISTED IN DIRECTOR'S REPORT

Name: Jay Carrol Neider
Connie A. Neider

Address: 5821 Morningdove Drive
Nampa, ID 83686

D. I object to the following elements as recommended in the Director's Report. (Please check the appropriate box(es)).

1. ☐ Name and Address:
Should be:
2. ☐ Source:
Should be:
3. ☒ Quantity:
Should be: Remark should allow irrigation of 287.1 acres, as claimed.
4. ☐ Priority Date:
Should be:
5. ☐ Point(s) of Diversion:
Should be:
6. ☐ Instream Flow Description:
Should be:
7. ☐ Purpose(s) of Use:
Should be:
8. ☐ Period of Year:
Should be:
9. ☒ Place of Use:
Should be: 287.1 acres (if combined with 71-10117, the total place of use should be 481.1 acres).
11. - I object because:
 - ☐ This water right should not exist.
 - ☐ This water right was not recommended, but should be recommended with the elements described above.

- E. REASONS SUPPORTING OBJECTION(S): The number of acres allowed under the recommendation (261 acres within 393 acre place of use) is less than the number of acres that has historically been irrigated.

VERIFICATION (Must be Completed)

State of Idaho)
)ss.
County of Twin Falls)

Norman M. Semanko, duly sworn, upon oath, deposes and says:

That I am the party/claimant filing this objection, as defined by I.C. § 42-1401A(1) and (6), or that I am the attorney for the party/claimant objecting and that I have read this objection, know its contents and believe that the statements are true to the best of my knowledge.

(Signature of person filing objection)

N. M. Semanko

(Attorney signing in representative capacity)

Subscribed and sworn to before me on: **January 14, 1999**

Brenda L. Hinnenkamp

NOTARY PUBLIC FOR IDAHO
Residing at: *Twin Falls, ID*
My commission expires: *9/11/2004*

INSTRUCTIONS FOR MAILING

You must mail the objection, including all attachments, to the Clerk of the Court. FAX filings will not be accepted. You must also send a copy to all of the parties listed below in the Certificate of Mailing.

CERTIFICATE OF MAILING

I hereby certify that on January 14, 1999, I mailed the original and copies of this objection, including all attachments, to the following persons:

1.

Original to:
Clerk of the District Court
Snake River Basin Adjudication
253 Third Avenue North
P.O. Box 2707
Twin Falls, Idaho 83303-2707

2. One copy to the owner of the water right at the following address:

Jay Carrol Neider
Connie A. Neider
5821 Morningdove Drive
Nampa, ID 83686

3. Copies to:

IDWR Document Depository

RE: Amended preliminary recommendations for 71-10631 and 71-10117

Dear Mr & Mrs Neider:

Amended recommendations have been prepared for the SRBA claims filed on this property. Enclosed are printouts of the information proposed to be recommended. I have also attached a GIS map representing the place of use and points of diversion included the recommendations.

You can expect the Director's Report to the court, including these rights, to be submitted by the end of October. If you have any questions or need other assistance please contact this office.

Sincerely,

A handwritten signature in black ink, appearing to read 'Douglas Jones'.

Douglas Jones, P. E.

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

30.9 CFS

Claim reevaluation was done after the initial review was completed 5 years ago. This was necessitated by claim amendment and results from notice of error reply on the preliminary recommendation. Claimant demonstrated an interest in the USFS land by providing documentation of special use considerations. He then amended claims A71-10631 & A71-10117 to identify a PPU on his & Fed land for both rights. As a result IDWR is proposing to disallow USFS competing claim A71-10725.

Neider amended the claims to specify 481.1 acres on 8/19/98. GIS analysis found a total of 393 acres within the tracts identified by Neider. Neider had initially filed claim A71-10631 under the license 71-02072 for 530.85 & 265 acres. He then amended the claim to establish the original priority date of development (1919 patent) & identified 287.1 acres. The patents appear to total 339.2 acres. Within the tracts of the patent it was found that about 261 ac are irrigated.

In 1993 Neider again amended his claims to identify a div. rate of 25.0 cfs on -10631 & an acreage of 287.1.

Claim A71-10117 was originally filed in '89 w/ a div rate of 3.88 & acreage of 194. In '92 the date was amended to '53. In '93 he amended the div. rate up to 12 cfs.

In response to the large diversion rates IDWR conducted excess flow analyses. Based on border analysis (wild flooding) the entire 393 acres requires 30.9 cfs under present practices. Allen Merritt's conveyance loss analysis is still valid. He calculated that there would be 5.12 cfs required to deliver water the length of the farm.

For claim A71-10631 (the senior right) the acreage proportional flow rate attributable for irrigation purposes is $\frac{261}{393} \times 30.9 = 20.52$ cfs. A direct calculation based on acres within the privately owned land yields a value of 21.23 cfs. Since the claim is for 25 cfs I attribute 3.77 cfs of the claimed flow rate to conveyance loss ($25.00 - 21.23 \text{ cfs} = 3.77 \text{ cfs}$). This leaves $5.12 \text{ cfs} - 3.77 = 1.35$ cfs for conveyance loss.

under claim 71-10117.

Claim 71-10117 would have a field
irr. requirement of $30.9 - 21.23 = 9.67$ cfs
for use on 132 acres. Combined
with the above-derived conveyance
loss the total recommended would
be 11.02 cfs.

Re-evaluation for recommendations
71-10631 & 71-10117

Although claim A71-10631 includes 1 acre belonging to the USFS it is being recommended solely as private land and the 1 acre in the NWNE S10 is being included in the recommendation 71-10117 which is intended to be the water for the federal USFS lands leased by Mr. Neider.

During the F.E. on 6/28/93 Mr. Neider indicated that for the lower portion of the ranch he used 12 hr. sets and got over the land in about 6 1/2 days and then water was off for 3 days then started back again. This would be a rotation time of 9 1/2 days. The upper portion of the ranch had a 7 1/2 day rotation with 12 hr. sets, but these lands had to be continually irrigated since the soil is poorer than the lower portion of the ranch.

MICROFILMED

Review of the soils on the ranch ^{OCT 28 1994} there is two major soil types. (WV1 & WG1)

The soil types vary greatly and account for the necessity to set water differently on the upper & lower portions of the ranch.

Using the wild flooding analysis soil WVI was analyzed using an 19 day rotation & 8 hr sets.

$$19 \text{ days} \approx \frac{3.24 \text{ inches}}{0.17 \text{ in/day}}$$

Fn of Soil
from area weather -
crop info

∴ The required rate for WVI is 0.036 cfs/acre
See attached Graded Border Evaluation.

Using the same method for soil WGI it was analyzed using 7½ day rotation & 8 hr sets.

Note that $\frac{0.67 \text{ in}}{0.17 \text{ in/day}} = 4 \text{ days}$

but since this is less than the practice the practice of 7½ days was used in the analysis.

∴ The required rate for WGI is 0.1624 cfs/acre

MICROFILMED

OCT 28 1994

Using these calculated rates it is then calculated that the two claims justify the following:

Soil	A71-10631	A71 10117
WGI	49 Ac $\times$ 0.1624 $\frac{\text{cfs}}{\text{Ac}}$ 7.96	13 Ac $\times$ 0.1624 $\frac{\text{cfs}}{\text{Ac}}$ 2.11
WVI	214 Ac $\times$ 0.0360 $\frac{\text{cfs}}{\text{Ac}}$ <u>7.70</u>	132 Ac $\times$ 0.0360 $\frac{\text{cfs}}{\text{Ac}}$ <u>4.75</u>
	263 Ac	145 Ac
	Total 15.66 cfs	6.86 cfs

The seepage losses calculated in Aug 3, 1993 still appear to be valid. The estimate of which is based on an average value for measured C values in the valley of 4.5 still seem appropriate. The total seepage loss then for Neider's portion of the lower ditch is 1.48 cfs and for all of the upper is 3.64 cfs. I decided to put all of Neider's share of the loss on 71-10631 since it is his earliest priority and for the lands furthest downstream on the ditch. Reference will be made in 71-10117 that the conveyance loss is in 71-10631.

MICROFILMED

OCT 28 1994

9/4

On 6/28/93 both ditches were measured @ capacity. The lower ditch's capacity is 43.89 cfs and the upper ditch's capacity is 40.77 cfs. Note that each ditch has 2 fish screen with return flow back to the river in the range of 1-2 cfs each. The lower ditch serves 71-02111 & 71-10104 owned by Woolley & 71-04033 owned by Chivers. The sum of these three recommended rights is 9.46 cfs which includes their share in the ditch loss in the lower ditch.

With a total capacity of 84.66 cfs
 — est. fish screen — 4.00 cfs max.
 — other rights — 9.46 cfs
 71.2 cfs avail.
 capacity.

Since available cap is more than
 $(15.66 + 6.86) + (5.12) = 27.64$

∴ 71-10631 recommended for
15.66 cfs irrig. requirement
5.12 cfs conveyance
 20.78 cfs on 263 Ac

71-10117 recommended for
 6.86 cfs on 145 Ac.
