Investigator's Notes

File: A37-4369
Name: Donna Kelsey and Jim Stone dba Sun Valley Land and Minerals Inc.
Investigator: Robin Wells
Field Date: August 26, 2005

To Reach: At the north end of In Hailey, Idaho beginning from the stop light on McKarcher, proceed north on Highway 93 2.3 miles to Deer Creek Road. Turn west and drive 4.8 miles to the Clarendon Hot Spring Ranch headquarters on the south side of the road.

Jim Stone (309-1359) and Donna Kelsey (726-4113) were on site the morning of August 26th, 2005. Also on site was custodian "Cam Hair" (578-0014) who lives on the Clarendon Hot Spring Site. After documenting the hot well sites on the ranch, Investigator Wells proceeded to the stream-supplied claim on Deer Creek adjacent to the ranch headquarters.

The photo supplied in file A37-4369 shows a proposed layout of constructed ponds. From a vantage point above the ranch headquarters Photo 19 looks east and down Deer Creek, three ponds are visible. Pond #3 and the dam are in the foreground and pond 4 and 5 in the distance.

Photo # 20 shows the west end of Pond 3 in the foreground. Pond #1 may be seen on the right (west), and Pond #2 is in left above Pond #3. Between Pond #1 and Pond #2 that are in series, there is a dike on which a service road lies. The detail particularly between Pond #3 and the series ponds of -2 and -1 are not clear in the photos. Investigator Wells, walked the shore lines with a GPS unit and recorded the shoreline of all five ponds; shape files may be generated from those data points. The details of those circuits follow:

Pond #3 circuit begins with GPS #33 and includes through GPS #65 with close on GPS #33. The Pond #3 control structure that supplies Pond #4 (below the dam) is at GPS #40. The overflow from hot water use at ranch headquarters flows in Pond #3 at GPS site #48. Warm water from an unused hot spring flows into Pond #3 at GPS #53. The north side of control structure for stream inflow from Deer Creek to Pond #3 is at GPS #57. GPS#58 through 65 defines the south side of Pond #3. GPS #33 and #65 are on either sides of the concrete control structure for the flow from Pond #2 to Pond #3.

Pond #2 circuit (north side) begins at GPS #68 and breaks at the control structure between Pond #1 and #2 at GPS #76. The north side of Pond 1 is outlined between GPS #77 and GPS #84 and closes with GPS #58 where the south side of the control structure on Deer Creek lies (common with Pond #3).

Pond #1 circuit (south side) begins at GPS #76, then continues from GPS #87 through GPS #98 (end of south west finger) then continues along the southwest side of Pond #1 between GPS # 103 to 116 with close on #58.

Pond #2 circuit continues on the south side of the control structure between Pond 1 and 2 and ends at the control structure between Pond 2 and 3. At GPS# 123, "Jim the Harp Creek" flows into Pond #2 (5gpm).

There was a capped well with a 12 inch casing at GPS #128.

There is buried pipe between the control structure on the dam (GPS #182) and the delivery of water to Pond 4. A plum of water disrupts the surface of Pond 4 and identifies the subsurface delivery point of water at the bottom of this pond. Pond #4 circuit begins with GPS #129 near the delivery point within the pond and ends with GPS 147 with close on GPS #129.

Pond #5 circuit begins with GPS #148 at the north side of the control between Pond #4 and 5, and breaks at the outflow of Pond #5 at GPS #164. There is a measurement structure (all flow from Pond 4 and 5) at GPS #166. The south side of Pond #5 begins with GPS #164 and continues with GPS #167 through 181 and close with GPS #148.

Again at the end of the day, Investigator Wells was referred to Dr. Charles Brockway for any further site information, including evidence of priority.

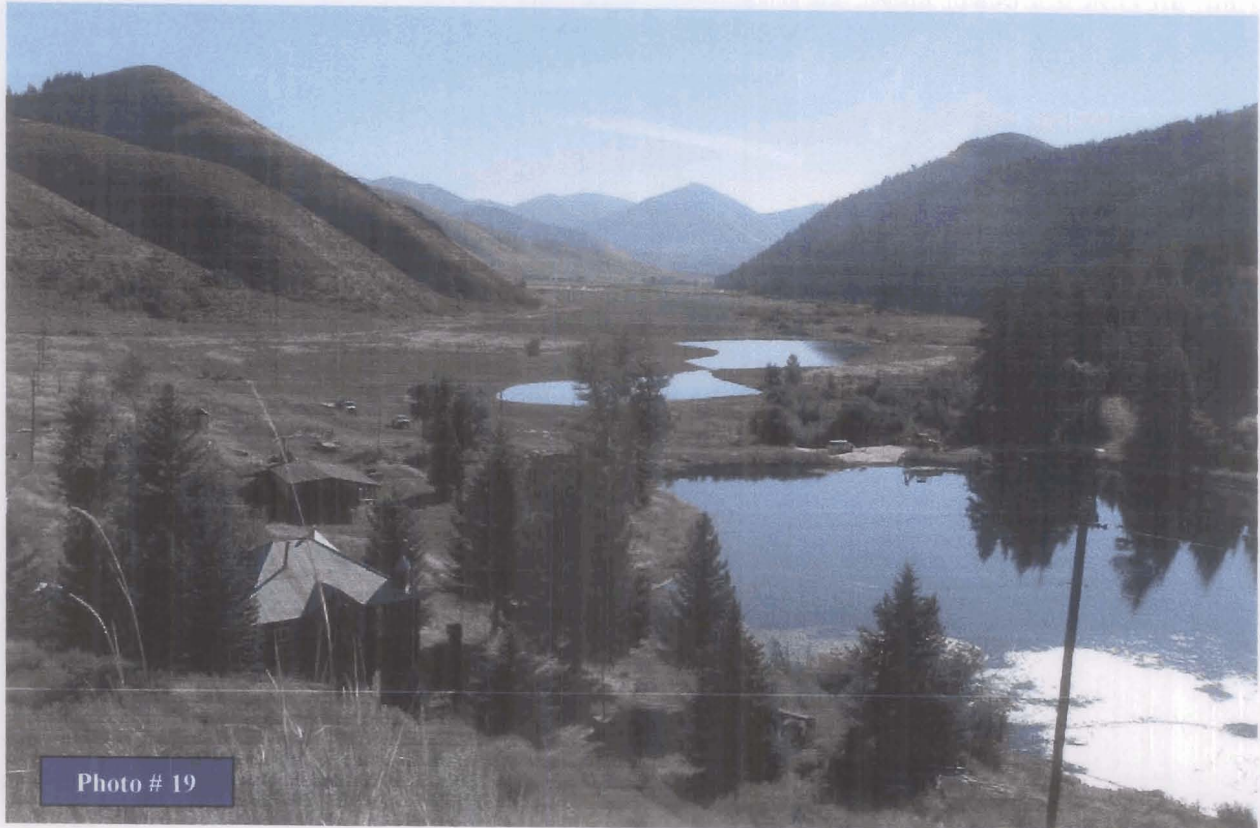

Photo # 21

Photo # 22

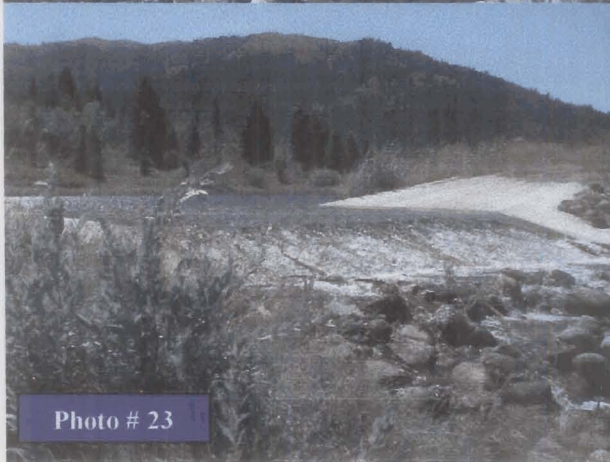

Photo # 23

Photo # 24

Photo #21 shows the rubble control structure at GPS#57 and 58 that diverts Deer Creek into Pond #1 and controls stream through-flow into Pond #3. Photo 22 shows concrete control structure between Pond #1 and Pond #2. Photo #23 shows concrete control structure between Pond #2 and Pond #3.

Photo # 25

Photo # 26

Photo #25 and #26 shows newly completed fish ladder on the south end of the dam. The main discharge through the dam is the concrete pipe next to the ladder.

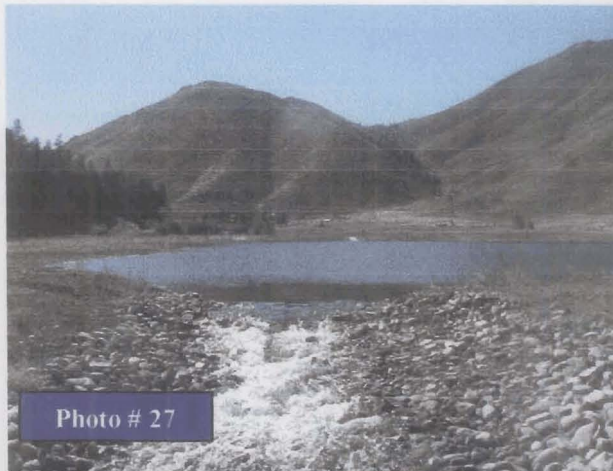

Photo # 27

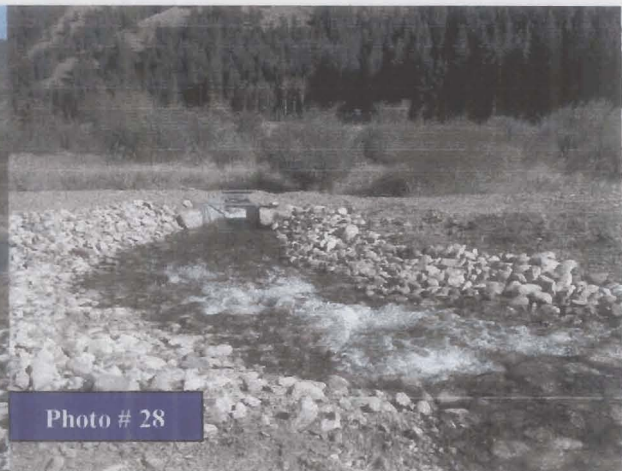

Photo # 28

Photo # 29

Photo #27 shows the discharge (no concrete) from Pond #5 in the foreground and from Pond #4 in the background. Photo #28 shows the water path from Pond #5 to a measurement flume and then Photo #29 shows discharge from the measurement flume into Deer Creek.

RE: RESUMPTION OF USE  AND A37-04369 – SUN VALLEY LAND AND MINERALS, INC.

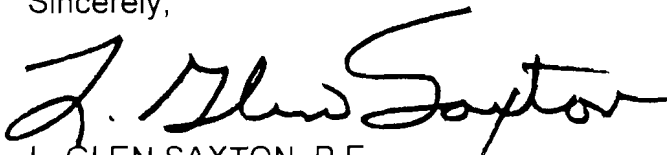

Dear Mr. Brockway:

In your letter dated September 20, 2000, to Corey Skinner, you advise of the status of reconstruction of Clarendon Dam and of the construction of additional storage impoundments in the Deer Creek drainage tributary to the Big Wood River. In your letter you ask the department to "confirm" that the Sun Valley Land and Mineral Company has met the requirements for resumption of use of its water rights ask the department to advise you as soon as possible whether additional delays in filling of the reservoir(s) due to downstream impacts can be allowed without jeopardizing the water right.

If the water right holder has stored water in compliance with the water rights referenced above prior to the resumption of use date, it appears to me that it would be difficult for anyone to show that resumption of use had not occurred. While the department can not authorize additional delays in the resumption of use of water, it appears reasonable to consider the effect on downstream water rights when filling the authorized storage impoundment(s).

If you have questions, please feel free to contact the department.

Sincerely,

L. GLEN SAXTON, P.E.
Chief, Water Allocation Bureau
