DEPARTMENT OF
WATER RESOURCES

This is a Letter to Challenge
the Denial of our letter to alter or
amend, decisions all on any ~~part~~ to alter
the ditch which the State of Idaho
gave ~~use~~ my grandfather a water
right - - - - which was the original
water right number. Then we were
forced to go to Boise and Persuade
a new # which cost \$360⁰⁰ dollars
this is a shame, and I do not
agree with this behavior or any of
the other behavior taken in this
water problems, such as being able
thought words that will allow Water
Irrigation to Retain position to
make my water right disappear.

This must be taking place
or I would not be being addressed
as the Claimants.

I ask at this time to see
the Judge that will preside over this
So, at that time we can figure out if
I can have a jury to hear this
Case of some day that my water right
might disappear, with out me being able
to protect this and more.

And again, I do feel that I can't be treated fairly with out a Jury to decide if all the doings of this matter are just. they need to see that if this wright gets taken, or altered such as tiling the ditch or what every, that we can figure out, how this 6.75 acre parcel will remain to receive water as Granted By the State of Idaho in 1933 hold merril.

Note:

I have many times ask to have this look at for Decision but no one seem to show up to discuss the ditch its spring and My Einar Wright on this ditch.

Thank you
 Marie L. Morley
 Joe Allen
 Mother Allen
 William Allen

And I still see no written proof that has been presented soon he agreed to any such stipulation My original water write which carry through ownership. And many other factors such as signed documents, that this water wright shall be granted. this I need to present, as no one objected to this and then State of Idaho granted this wright for water.
