Craig,

Sorry for the confusion! The claim is not for instream stockwatering from a stream created by the spring. It is for "instream" stockwatering from an undeveloped spring source. I used the term "instream" to distinguish the use from a springbox-pipeline-trough diversion...obviously a poor choice of words!

It is my understanding the spring does not develop a stream from which cows can drink. Now does it make sense?

Thanks,

Roxanne Brown

Hey Roxanne,

Per your request, here is where we last left off.

Thanks.

Have a good weekend ☺

Yeah, I did it and it sounds like there might be an error...I hate that! I'll look at it today and get back to you...

Hey Roxanne,

I don't suppose by chance you were the one that wrote up the late claim for Circle Pi, LLC (73-12144)?

The reason I am asking is it describes the diverting works as instream stockwatering, but only claims one POD and the source was claimed as a spring. If it is indeed instream stock, the source is going to probably be unnamed stream with a beginning and ending point.

If this isn't you, then I will just contact Circle Pi. I just saw SPF tracks on it and being B73, I figured you might know what is going on.

Later,
c
