4128 ACRES TOTAL

The rights listed below are limited to the irrigation of a combined total of 800 acres in a single irrigation season within the 4,128 acre land base. Combined Right Nos.: 2-2260, 2-7019B, 2-7019D, 2-7022B, 2-7023B, and 2-7102B.

This right is limited to the irrigation of 21 acres within the place of use described above in a single irrigation season.

After specific notification by the Department, the department must be notified in writing if a change occurs in the location of irrigated land, prior to diverting the water and must be provided a map showing the location of acres to be irrigated within 40 acre tracts.

A second crop cannot be grown and/or harvested from the new lands during the same growing season that a crop has been grown on the old land. "Crop" in this case also includes irrigated pasture.

Once water is diverted on the new lands, water cannot be used on the previously irrigated lands during the remainder of the irrigation season.

If the 4,128 acres listed in the place of use are split into multiple ownerships, the water right shall be appurtenant to the 504 acres listed in the last Notice, if any, submitted to the department unless otherwise provided for in the instrument of conveyance.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

After specific notification by the Department, the right holder shall install a suitable measuring device to record the total volume diverted or shall enter into an agreement with the Department to determine the volume of water diverted from power records and shall annually report the volume diverted to the Department.

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.
