The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

TO: Transfer File No. 4900
In the Name of: CHIVERS

SUBJECT: Review and Recommendation

The main purpose of this transfer is to change the point of diversion. This change results in elimination of two old ditches and concentration of diversion in another existing diversion which benefits the salmon recovery effort. As a side purpose the transfer is structured to create a PPU for the rights involved which could be argued already exists. The transfer was advertised without protest. A review of the rights by the SRBA staff has found that less acres have historically been irrigated and less water beneficially used than what the records of the rights shows and the application represents. The applicant has been made aware of the SRBA findings but no further effort has been made by the applicant to provide additional information to justify changing the SRBA preliminary recommendations.

RECOMMENDATION

I recommend the transfer be approved based on the SRBA findings. See the "Overlap Review for Chivers" and the "R" records for the rights involved which have been created by Steve Clelland and included in the file.

The following are the recommended acres:

Twp 13N, Rge 19E, Section 1		
NENE lot 4		16 acres
Twp 13N, Rge 19E, Section 2		
NENE lot 1		36 acres
NWNE lot 2		17 acres
Twp 14N, Rge 19E, Section 35		
SWSE		18 acres
SESE		25 acres
Twp 14N, Rge 19E, Section 36		
NESW		19 acres
NWSW		22 acres
SWSW		39 acres
SESW		13 acres
Total acres		205 acres

RECOMMENDED CONDITIONS:

-Subject to SRBA Review. (Since the rights are recommended to be limited by historical beneficial use

RE:
QUESTIONS ON D&S; TRANS.

THEY STARTED OFF WITH THE FOUR D&S CLAIMS RECENTLY LISTED WITH THE COURT; A72-10117, A72-10118, A72-10119 & A72-10121. BASICLY THEY NEEDED TO CLARIFY THESE RIGHTS AS TO WHERE THEY WERE AT AND WHAT THEY REPRESENTED.

FOUND: -10117 IS FOR THE HOME PLACE.

-10118 & -10119 ARE FOR THE LOWER PLACE AT TWO PRIORTIES.

-10121 IS FOR PROPERTY THEY SOLD, THEY WILL TRY TO INFORM
NEW OWNERS.

WE ALSO DISCUSSED THE STOCKWATER RIGHT, **A72-00146**, FOR WARM SPRING CREEK... MR. CHIVERS STATED THE RIGHT WAS DECREED TO HIM FOR KEEPING THE WATER FLOWING IN WINTER MONTHS FOR STOCK USES. I EXPLAINED THE RECENT COURT DECISION LIMITING INSTREAM STOCK USES TO 0.02 CFS. HE UNDERSTOOD AND SAID HE WILL HAVE TO OBJECT TO THE RECOMMENDATION. (I WILL SEND HIM THE PROPER FORMS SINCE THEY FORGOT TO GET THEM BEFORE THEY LEFT AS WE HAD PLANNED.)

TRANSFER 4900 - REVIEWED THE RECORDS THEY BROUGHT AND THE BAR-CODE STATUS EVENTUALLY SHOWS THE TRANSFER IS PENDING APPROVAL IN BOISE. **A72-00185A & A72-10120**

A72-00185A

CLAIM: 103 AC 10.00 CFS LOWER MCGOWAN
EXAM: 78 AC 4.39 CFS LOWER MCGOWAN
(Allows for 1.42 cfs conveyance losses.)
(FIR 2.97 + CL 1.42 = 4.39 CFS)

A72-04222A

CLAIM: 100 AC 4.00 CFS WARM SPRING CREEK
EXAM: 78 AC 2.97 CFS WARM SPRING CREEK
(No conveyance losses shown)
(FIR 2.97 + CL 0.00 = 2.97 CFS)

The 78.0 acres shown in the above two rights are the same parcels of land irrigated by two separate sources.

A72-10120

CLAIM: 268 AC 9.60 CFS UPPER MCGOWAN
EXAM: 205 AC 9.60 CFS UPPER MCGOWAN
(Allows for 0.21 cfs conveyance losses.)
(FIR 9.39 + CL 0.21 = 9.6 CFS)

The 205.0 acres shown above overlaps the 78.0 acres listed in the top two descriptions.

COMBINED USE LIMITS:

FIR 9.39 + CL 0.21 + CL 1.42 = 11.02 CFS
Place of Use limited to the 205 acres listed in reports.

REMARKS:

A72-00185A was originally proposed to be separated into parts -185C & -185D because of delivery systems and combined remark limits. During my on site visit with Mr. Chivers in fall of 1994 he demonstrated the use of Upper McGowan Ditch water and Warm Spring Creek water on the 15 acres west of the Warm Spring Creek channel. Right should now reflect again as A72-00185A; parts C & D are no longer necessary.

The other two rights have been revised to add the 15 acres west of Warm Spring Creek channel to the previously determined amounts. Field Irrigation Requirement (FIR) was calculated at 0.79 cfs for the 15.0 acres (0.053 cfs/acre). (63 acres at 2.18 cfs FIR and the balance of 127 acres FIR was 6.42 cfs.)

A72-10120 shows no increase in cfs amount, despite the additional 15.0 acres, since the proposed recommendation is equal to the claimed amount of 9.60 cfs.

Dear Mrs. Chivers:

Pursuant to your request, I have enclosed copies of the memorandums in your transfer application file that mention that both your Upper and Lower McGowan water is proposed to be transferred. As we discussed on the telephone, the original transfer application is based on both the Upper and Lower McGowan water being transferred, so there should be no problems with this matter.

However, the discrepancy in the irrigated acres and the total amount of water between your transfer application and the Snake River Basin Adjudication recommendations still exists. As we discussed, if you disagree with the adjudication recommendations, you should contact Steve Clelland, here in our office, to discuss these recommendations in further detail.

If you have any other questions, or if I can be of any further assistance, feel free to contact me at your convenience.

Sincerely,

Dear Mr. Chivers:

I have decided to proceed with the processing of the transfer application that you recently filed. The transfer application seeks to change the points of diversion of rights 72-00238, 72-00240, and your portion of 72-00185 from the McGowan ditches to the S-32 Challis Irrigation Company Canal.

As you are aware, the Snake River Basin Adjudication has commenced and the claims that correspond to the water rights that you are wanting to transfer have been reviewed by a representative from our department. As we discussed during our telephone conversations, the information that is recorded on your transfer application does not correspond to the Department's findings in the adjudication review process.

The transfer application that you submitted states that you desire to irrigate 268 acres with your water rights out of the S-32 Challis Irrigation Company Canal. However, as part of the Snake River Basin Adjudication review process, the Department found that the place of use for your water rights out of the McGowan Ditches consists of 205 acres of irrigated ground. In addition, the total amount of water determined to be appurtenant to your 205 acre place of use is 10.77 cfs (538.5 inches). Your transfer application states that the total amount of water to be transferred is 19.6 cfs (980 inches).

I have enclosed a copy of the map that was submitted with your transfer application and a map that shows the location of the irrigated acres that were found in the adjudication review. Reviewing these two maps may help to clarify the discrepancy between the irrigated acres on your application and the irrigated acres that were found in the adjudication review.

The adjudication findings are part of the review process for your transfer application and will have a bearing on its possible approval. You may want to discuss the adjudication review findings with Steve Clelland who is the agent from our office who conducted the adjudication review of your water rights out of the McGowan Ditches.

Once the public notice advertisement is prepared for your transfer application, you will receive an acknowledgement letter from our office. This letter will provide you with the dates that your transfer application will be advertised and detail the remaining steps in the processing of your transfer application.

If you have any questions or I can be of any assistance, feel free to contact me at your convenience.

NAME: MRS. GARTH CHIVERS CALLIN RE: TRANSFER TO CHALLIS CANAL

SHE CALLED TO ASK ABOUT THE ONGOING TRANSFER ACTIVITIES IN CHALLIS. HER RIGHTS ARE PART OF THE MOVE FROM THE UPPER MCGOWAN DITCH INTO THE MAIN CHALLIS IRRIGATION CANAL. SHE IS CONCERNED THAT IF SHE SPENDS THE TIME AND MONEY NOW TO TRANSFER THE RIGHTS AND THE PROJECT IS NOT COMPLETED THEN SHE WILL HAVE TO SPEND MORE TO MOVE IT BACK. I TOLD HER IF THE TRANSFER ACTUALLY OCCURS AND THE WATER IS DELIVERED FROM THE CHALLIS CANAL THEN, YES, IT WOULD TAKE A NEW TRANSFER PROCESS TO MOVE IT SOMEWHERE ELSE. HOWEVER, IF THE PROJECT IS NEVER ACTUALLY COMPLETED AND THE TRANSFER DOES NOT OCCUR, THE DEPARTMENT SHOULD BE NOTIFIED AND THE TRANSFER COULD BE WITHDRAWN.

WHEN ASKED WHERE THE WATER IS CURRENTLY GOING TO BE DELIVERED FROM SHE SAID IT WAS STILL BE CONSTRUCTED AND COULD STILL GO EITHER BY MCGOWAN DITCH OR THE CANAL. I TOLD HER IT TAKES SOME TIME FOR THE TRANSFER PROCESSING TO BE APPROVED AND ADVERTISED. BY THE TIME THIS HAS OCCURRED THE WATER SHOULD BE RUNNING.

SHE ASKED ABOUT THE EFFECT OF THE MOVE ON THEIR PRIORITY DATE. I TOLD HER IT SHOULD STILL BE AS VALID AND WOULD BE DELIVERED BEFORE OTHER JUNIOR RIGHTS. THE CANAL IS JUST THE METHOD OF DELIVERY FOR THOSE RIGHTS.

SHE ASKED FOR A WRITTEN DOCUMENTATION OF THIS CONVERSATION. I WILL SEND HER A COPY OF THIS DOCUMENT.

DIRECTIONS TO PROPERTY / REMARKS:

(see A72-10120 for more details)

Mr. Chivers indicated he didn't use this right alot but needed it at times. This was supported by field exam which found the lower McGowan ditch delivery to this place of use is possible but difficult compared to other sources available. There was concerns raised ~~to~~ if the lower McGowan can carry all the waters needed, that is why Hunt transferred their right from the ditch.

The 3 acres claimed herein belong to the Hunt not Chivers as shown.
