REPORT OF ENGINEER

Permit No. 19820

This proof is for Beneficial use In Water District No.

1. Name of applicant Mrs. E. May Starr, Route 2, Caldwell, Idaho.

2. Source of water supply: Subterranean flow from a dug ditch.

3. Location of point of diversion: Is in the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 23

T. 4 N. R. 4 W. County of Canyon

4. Describe works as they exist, giving dimensions and capacities of same: This is a spring that has been developed. Might actually be called a horizontal well. Water flows from it by gravity and is picked up in a ditch that gathers additional water from the bench on the S. and is conducted half way across the 40 to the E. where it crosses large drain ditch in 12" culvert type pipe size 12" by 22 yds. long. From there the ditch divides, one branch extending along the East side of the 40, the full length of the 40. The other branch extending along the N. side of the drain ditch. There is also another point of diversion that has come into existence and been developed quite recently and irrigates the land on the S. side of the drain ditch. (See the map). This is out of a drain ditch that has been recently constructed to drain some of the land to the Southwest.

5. Water is used for: Irrigation and domestic purposes.

6. State whether or not water has been turned into works of diversion: Yes

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):

MW $\frac{1}{4}$ SE $\frac{1}{4}$ Section 23, Twp. 4 North, Range 4 West, B. M.

See Map

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach? Boise River

Remarks: This particular 40 was not included in the irrigation district, and thus had no water right.
