NAME OF PARTY _____

~~T.~~ D.P. Applicant

0EMPLOYEE RRE: Drilling Permit Appl. for Robert Svedin

This d.p. is for new well added in T. 5470, which split rights 63-03369 & 63-07532 into A & B portions. The B portions were for Svedin.

Subsequent to that, Drake filed T. 5633 application to split B into C & D since Svedin sold to 2 new parties, Heuser (will be C) & Drake (will be D). T. 5633 is pending at Regional office. Part of the plan has to be corrected in the pending split.

A well agreement was included in T. 5633 that requires Svedin to put in the new well as part of the SAKS Agreement. The new well (additional pt. of division originally approved in T. 5470 & reconfirmed in Appl. T. 5633) might be able to be drilled per T. 5470 Agreement (Nov. 1999), although it should not be well outside of Svedin S.S. until T. 5633 is issued.

The best course of action is probably to wait until T. 5633 is issued, then approve the d.p. in name of Svedin. D.P. approval will not confer any WR ownership or use of water for Svedin.

SUBJECT: APPLICATION FOR TRANSFER

I spoke with Martha Drake today concerning her application for transfer. I discovered that Robert Svedin had already filed a transfer for the well and property. Therefore, all the Drakes would need to do is change the ownership of the property into their name to add a point of diversion. |

In reviewing this application I also discovered that the original license did not correctly describe the acres and the transfer filed by Mr. Svedin did correct the acres. So I told the applicants that they could withdraw the application for transfer and do a change of ownership or they could use the money from this transfer fee and correct the place of use for this water right.

Ms. Drake said she would need to discuss what to do with her husband and would contact me after the first of the year.

WATER RIGHT SPLITS FROM WATER RIGHT #63-03369

* The Adjudication files show the ownership of the original water right in the name of Susan and Curtis Howell.

PLEASE NOTE: This water is combined with water right 63-07532 and when combined with this water right the maximum diversion rate is .60 cfs. This would split the maximum diversion rate for these two rights to .20 cfs for the 63-03369B portion and .40 cfs for the 63-03369C portion.

The transfer proposes to split the ownership and clarify acre description.

DOCUMENTS AND APPLICATION PREPARATION

The application consists of 8 pages and 6 attachments. Note the location of the following application items:

Attach. A – Copy of latest CSFA aerial photo of property.

Attach. B – Copy of ASCS aerial photo and diagram used for licensing of these two water rights (B and B1).

Attach. C – Copy of Applicant's Warranty Deed.

Attach. D – Copy of Water Agreement between Applicant and other lot owner.

Attach. E – Copy of Warranty Deed for other lot owner.

Attach. F – Plat map of Boyer Heights Subdivision (applicants property).

Applicant prepared the application with assistance from Lori Graves and Dan Nelson.

Other information used in this review includes Place of Use Comparison report, Water right split tree for 63-03369 and associated water right and adjudication profile reports, Water Right Split Tree for 63-07532 and associated water right and adjudication profile reports, Copy of approved transfer # 5470 including memos from Pam Skaggs and Lori Graves, 1987 NAPP Aerial Photos, 1994 IDWR Scanned Aerial Photo, and Lot Calculation sheet. All of these are attached to this memo.

CURRENT RECORDS & PROPOSED CHANGE

Originally Gerald and Lorene Guentz owned the two water rights involved in this transfer. Water right 63-03369 was for 2.15 cfs and 166 acres and water right 63-07532 was for 2.53 cfs for 234 acres (see attached adjudication profile report). Transfer 5470 was filed by Robert Svedin to split the ownership and add a point of diversion in the SWSW T1N R1W S5 for Mr. Svedin's portion of the water right now known as 63-03369B and 63-07532 B (see attached transfer). The A portion of both rights remained in the name of Guentz.

After transfer 5470 the right 63-03369B was recorded as .47 cfs, 162 afa for irrigation of 36 acres in the SWSW T1N R1W S5 and right 63-07532B were recorded as .39 cfs, 162 afa for irrigation of 36 acres in the SWSW T1N R1W S5. The legal description for the point of diversion was the same as the irrigation for both rights. The conditions stated that when 63-03369B and 63-07532B were combined they were limited to the irrigation of 36 acres, diversion rate of .60 cfs and annual volume of 162 afa (see attached transfer).

The Snake River Basin Adjudication (SRBA) claims were amended to reflect the above transfer (see attached adjudication profile reports).

Mr. Svedin has since split the property associated with 63-03369B and 63-07532B into 3 lots, all of which have been sold. The applicant's have purchased 2 of these lots and wish to have their portion of the water right (approximately 24 acres) put into their name. They also want to have the legal description clarified to show the correct acres in the proper $\frac{1}{4}$ $\frac{1}{4}$ per the original license's maps and historic use.

VERIFICATION & OTHER ANALYSIS

The applicants have supplied a warranty deed as proof of ownership of the property (see attachment C). They also included a copy of the well agreement made with the new owners of the property for which the well is located and a copy of their warranty deed to proof that they are the current owners of that property (see attachments D and E).

The 1987 NAPP aerial photo and 1994 IDWR Scanned Aerial photo reveal that the property has been irrigated and forfeiture is not an issue (see attached aerial photos).

The applicant's also supplied a copy of the original ASCS aerial photo used during the licensing of the original water right and the most current CSFA aerial photo to demonstrate that the property was incorrectly described during the licensing of this water right (see attachments A and B through B1). I have reviewed this information and the information supplied does show that a portion of the 36 acres described in the original water right was in the SESW of S5 T1N R1W.

There is a question in reviewing the old records of how much of the original property has actually been irrigated. I reviewed the old records and it looked as though the eastern tip of the property may have been irrigated (see attachment B). However, after reviewing the 1981 Orthophoto Quadrangle map (page 7) supplied by the applicant and all of the aerial photos (see attached aerial photos), it looks as though this portion of land is a bog created by the canal and has never been irrigated. I then did a rough calculation of the surveyed plat map supplied by the applicant and came up with 37.2 acres of land owned by the applicant and the other lot owner (see attachment F and Lot Calculation Sheet). The CFSA map supplied by the applicant indicates that 34.5 acres were irrigated (see attachment A). The 37.2 acres calculated by the plat map did not include road and canal easements and the 34.5 acres calculated by CSFA could also have some degree of error depending on the planimeter used and its operator. Therefore, it is reasonable to assume that the 36 acres described in the original license did not include the eastern tip of the property and only the lands associated with the three lots were irrigated.

I used a dot grid to determine the acres of the place of use and which $\frac{1}{4}$ $\frac{1}{4}$ section they were located in. My determination using the dot grid was that 32 acres were irrigated in the SWSW $\frac{1}{4}$ and 4 acres were irrigated in the SESW $\frac{1}{4}$. This coincides with the applicant's request of 20 acres in the SWSW and 4 acres in the SESW.

RECOMENDATIONS

I recommend that this transfer be approved in the name of Scott and/or Martha Drake for 20 acres in SWSW and 4 acres in the SESW for a total of 24 acres (known as the D portion of both rights). The diversion rates should be recorded as shown on the transfer with the condition of "when both rights are combined they should be limited to .40 cfs and 108 afa". The C portion should be recorded as shown on the transfer with the condition of "when both rights are combined they should be limited to .20 cfs and 54 afa when both rights are combined for a total of 12 acres". The 12 acres for the C portion of the water right would be in the SWSW $\frac{1}{4}$.

RE: Svedin Transfer, Rights 63-03369, 63-07532

This transfer proposes to split the water rights to reflect separate owners and, with the addition of a new well, separate systems.

ATTACHMENTS:

- A. Ownership Documentation
- B. 1987 CFSA Photo

The application was prepared by myself and initially reviewed and submitted for advertising by Steve Lester.

CURRENT RECORDS & PROPOSED CHANGE:

Although surface water (63-02388) appears in sections 5 and 8, on the p/u comparison report, Steve found that the p/u for both rights appears to be outside the delivery co./district service area per basin 63 local service area maps produced by IDWR.

The SRBA claims were filed as licensed.

VERIFICATION:

1987 CFSA photo verified irrigation along with IDWR's 1994 scanned airphoto.

RECOMMENDATIONS:

With the attached ownership information, this transfer should be approved as part A and part B designating each separate owner, system, and acres.

LEGAL NOTICE NOTICE OF PROPOSED CHANGE OF WATER RIGHT, TRANSFER NO. 5470.

Notice is given that ROBERT SVEDIN of 7605 S. Robinson, Kuna ID 83434 has applied to the Department of Water Resources to change the Point of Diversion pursuant to I.C. § 42-222 for the following licensed irrigation ground water rights in TIN RTW, Ada County:
#63-03349, priority 10-7-1963, 2.15 cfs, diverted in NWNW 34 to irrigate 166 acres in SWSW 34 and parts of W 1/2 34.
#63-07532, priority 12-17-1971, 2.53 cfs, same diversion to irrigate 234 acres in about the same tracts described above.
Combined rights allow 3.98 cfs to irrigate 234 acres.

PROPOSED CHANGE
Split both rights and add a new well to irrigate Svedin's 34 acres, all in SWSW 34. Applicant will divert .60 cfs from new well. Unchanged portions of rights will still be served from original well (3.30 cfs for 198 acres in S8). Applicant's portions of rights will be 63-03349B and 63-07532B.

Any protest against approval of the proposed change must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, ID 83705-5082, together with a protest fee of \$25 for each application on or before July 6, 1999. The protestant must also send a copy of the protest to the applicant.

NAME OF PARTY _____

D.P. Appl.
63-99 W-1EMPLOYEE RRE: Drilling Permit Appl. for Robert Svedin

This d.p. is for new well added in T. 5470 which split rights 63-03389 & 63-07532 into A & B portions. The B portions were for Svedin.

Subsequent to that, Drake filed T. 5633 application to split B into C & D since Svedin sold to 2 new parties, Henson (will be C) & Drake (will be D). T. 5633 is pending at Regional office. Part of the plan has to be corrected in the pending split.

A well agreement was included in T. 5633 that requires Svedin to put in the new well as part of the SAKS Agreement. The new well (additional pt. of division originally approved in T. 5470 & reconfirmed in Appl. T. 5633) might be able to be drilled per T. 5470 Agreement (Nov. 1999), although it should not be used outside of Svedin's S.S. until T. 5633 is issued.

The best course of action is probably to wait until T. 5633 is issued, then approve the d.p. in name of Svedin. D.P. approval will not confer any water ownership or use of water for Svedin.
