MEMORANDUM

TO: JAN SHURTE *JS 6-30-03*
FROM: DANIEL A. NELSON
DATE: 6/30/03
SUBJECT: TRANSFER 69662 FOR RONALD BLICKENSTAFF

This memo is to confirm our conversation with Gary Spackman concerning transfer 69662 for Ronald Blickenstaff. This transfer proposed to split 5 acres off of 63-7610A for a separate system. There has been a problem with this transfer due to the way that 63-7610A was licensed and the way a transfer creating water right 63-7610B was approved.

HISTORY

Water right 63-2724 was licensed for 220 acres with a diversion rate of 1.90 cfs from groundwater. Some time later water right 63-7610 was licensed for 3.90 cfs and 200 acres. Water right 63-7610 is deceiving because only 2.00 cfs was developed with the drilling of a new well, however, the well developed under 63-2724 was added onto the water right. Therefore, a condition was placed on the water right that when 63-2724 and 63-7610 are combined they would be limited to a maximum diversion rate of 3.90 cfs.

A transfer was later filed that split 5 acres off of 63-7610. In this split the department gave 0.097 cfs for the 5 acres being split or a proportionate share of the 3.90 cfs. This new portion of the water right was given the number of 63-7610B. The transfer incorporated the condition that when 63-2724, 63-7610A, and 63-7610B are combined they will be limited to a total diversion rate of 3.90 cfs. The remainder of 63-7610 (now 63-7610A) and 63-2724 remained under the original owners name, which would make this condition feasible.

Water right 63-7610A has since been sold to new ownership and been split a few more times. A portion of 63-2724 has also been sold and split into separate ownerships.

CONCLUSION

The number of times these two water rights have been split, make monitoring all of these wells to ensure there is not an expansion of the diversion rate is impossible. Therefore, it has been proposed that we split the diversion rates into the well capacities developed with these rights. In order to do this we will need the cooperation of the Adjudication Staff to ensure all of the rights are distributed equally.

The well capacity developed under 63-2724 is 1.90 cfs, well capacity developed under 63-7610 was 2.00 cfs. Therefore the following calculations show the amount of water that can be allocated per acre:

$$1.90 \text{ cfs} / 220 \text{ acres} = 0.008636364 \text{ cfs/acre for water right 63-2724}$$

$$2.00 \text{ cfs} / 200 \text{ acres} = 0.01 \text{ cfs for water right 63-7610}$$

There are few acres that are overlapped by both water rights. The amount of water allowed on those acres would be a combination of the two per acre rates.

The only problem faced with this scenario is how can we deal with the existing transfer for 63-7610B in the SRBA. The solution to this problem is to combine the above diversion rates for a portion of both rights for the 5 acres and reduce the diversion rate for the remaining lands under 63-2724. The following are the calculations for this exercise:

$$0.008636364 \text{ cfs/ac} + 0.01 \text{ cfs/ac} = 0.018636364 \text{ cfs/ ac} \times 5 \text{ acres} = 0.09 \text{ cfs for water right 67-7610B.}$$

$$0.008636364 \text{ cfs/ac} \times 5 \text{ acres} = 0.04 \text{ cfs should be removed from 63-2724}$$

$$0.01 \text{ cfs/ac} \times 5 \text{ acres} = 0.05 \text{ cfs should be removed from 63-7610}$$

Therefore 63-2724 will be reduced by 0.04 cfs for the 220 acres of ground.

$$1.90 \text{ cfs} - 0.04 \text{ cfs} = 1.86 \text{ cfs for water right 63-2724}$$

$$1.86 \text{ cfs} / 220 \text{ acres} = 0.008454545 \text{ cfs/acre for 63-2724}$$

Water right 63-7610B is listed at a diversion rate of 0.097 cfs; therefore, we may have to recommend this right for 0.097cfs with a condition similar to the following:

Due to splits in the original irrigation system, the maximum amount of water that is available for appropriation of this water right is 0.09 cfs.

Therefore, each split should be recommended with a diversion rate equal to the rate per acre proposed above. The annual volume should not be affected by the splits. The only change would be an adjustment of the amount of water diverted from each water right.

63-2724 was licensed with a capacity of 1.90 cfs. 63-7610 added a well with the capacity of 2.00 cfs and included the well licensed under 63-2724 for a total diversion rate of 3.90 cfs. The department then conditioned 63-7610 that when combined with 63-2724 it is limited to a combined diversion rate of 3.90 cfs. The properties have been split and the wells are no longer connected to the same system. Therefore, regulating the combined rights would be impossible.
