Comments:

1. kwalker 9/28/2006 Field examination

Comment: The field examiner was asked to locate domestic use under this license. The house had been torn down and was no longer needing domestic water under this right. Examiner also found the place of use had been changed since claim was filed and exam indicates where irrigation currently exists. I am recommending the licensed place of use since I have no idea when this change occurred. Claimant can file a notice of error and then submit documentation of when change occurred. Exam conducted 5/30/06 and I received it on 9/27/06 to prepare recommendations.

2. kwalker 11/8/2006 NOE

Comment: Mr. Van Slyke came into the office to discuss this water right. He stated that the well had been used to irrigate lands in the S1/2NE1/4, Section 6 which is closer to the location of the well. The lands licensed under this right have been sold to Rose Cottage, LLC and the water rights were not retained. Rather than change the location of the place of use under this right Mr. Van Slyke decided to leave the right where it is and discuss with the new property owners.

RE: Notice of Claim to Rights 63-2857 and 63-3390

Dear Mr. Van Slyke:

In review of the Notice of Errors submitted for the above referenced claims I offer the following:

Claim 63-2857 was filed for the irrigation of 55 acres within the S1/2SW1/4, Sec. 5, Twp. 3N, Rge. 4W. The claim mirrored the license issued in June of 1957. I have enclosed a copy of your claim and a copy of the license for your convenience. If the place of use of this right has changed, you should come into the office and either amend the claim (if you can document the change took place prior to 11/19/1987) or file an application for transfer (if the change took place after 11/19/1987) to change the place of use of this right.

Claim 63-3390 was filed for the irrigation of 78 acres. The license for this right was issued for the irrigation of 78.6 acres. The claim once again mirrored the license. I have enclosed copies of the claim and license for your information. If you are now irrigating an additional 22 acres you need to amend your claim or file an additional claim to reflect the increase of the acres. You will also need to provide some documentation to show when this increase in acreage occurred.

If you have any questions, or would like to come in to discuss the changes you requested, please feel free to contact me at 287-4953. If I don't hear from you before November 6th, we will recommend your claims as shown on the preliminary recommendations.

Sincerely,

A handwritten signature in black ink that reads "Kay Walker". The signature is written in a cursive, flowing style with a large loop at the end.

63-04761, 63-9132, 63-02857, 63-3390, 63-20568 Van Slyke Farms Inc.

Date of Inspection: 5/30/2006

Inspector: Sandy Hemenway

Description of Diverting Works:

63-04761: 100' deep well, 4" casing, 1 Hp submersible, 1 ¼" discharge, well 6" above ground level, 100 gallon challenger pressure tank, static 45', 38 psi

63-9132: (a) 17491 Van Slyke Rd., Wilder, Idaho 83676 (needs location verified) 302' deep well, 198' static, 75 gpm listed on well log (0.17cfs), 58 psi, 6" casing, 37" above ground level, 1 ½" discharge, 1 Hp submersible, well mate pressure tank, filtration system (odor and taste).

(b) Glen Mossel's 2295 A.P. Rd. Wilder house: 3Hp Red Jacket submersible pump (no tag), 30 psi, challenger pressure tank, 1 ½" discharge, 93' static, 8" casing, 325' deep well, 34" above ground level. **NOTE:** Domestic internal/external for immediate yard and garden only. Not used for irrigation in any manner. Property with this well was sold to Glen Mossel in 2005.

NOTE : (2-PODs with 2 different owners and locations) (a) 17491 Van Slyke Rd, Wilder, Idaho 83676 (need to verify location), and (b) Glen Mossel 2295 A.P. Rd., Wilder, Idaho 83676 (T3N, R4W, Sec 5, SWNW). Recommend a split. Property south of Mossel's house is still owned by Van Slykes. No longer have any livestock, and requested that "stock water" be removed from this WR.

63-02857: 325' deep well, 12" casing, 5 Hp turbine GE Model #5k6522xa3a pump, 8" discharge

NOTE: Wilder Irrigation is the main source with a head gate to the south of the POD. POD for 63-02857 is only a supplemental source that is co-mingles with Wilder Irrigation, except for the field north of 17553 Van Slyke (by the tower in the picture) where for this field it is the sole source. **Main Source of Water Supply for irrigation is: Wilder Irrigation (ground water that is supplemental to surface water "implied permitted volume"**

63-3390: 325' deep well, 12" casing, 60 Hp GE turbine pump, model #5k6266xc641, 8" discharge

NOTE: Wilder Irrigation is the main source, with 63-3390 POD being only a supplemental source that is co-mingled. **Main Source of Water Supply for irrigation**

is: Wilder Irrigation (ground water that is supplemental to surface water “implied permitted volume”

63-20568: 25 Hp pump, 20' lift, 4 " discharge, co-mingles with Wilder Irrigation, and has never run by itself since there has never been enough water. *******Pump has not been used for 10 years, since it has been covered with mud. The only source used has been Wilder Irrigation.**

Delivery System Narrative:

63-04761: 1 ¼" discharge to 1 ¼" buried PVC south to domestic home at 17553 Van Slyke Rd. (internal/external use), 1 ¼" buried PVC east to shop (1 restroom), and nozzle outside shop for commercial use (filling tanks for spraying rigs).

NOTE: Howard Van Slyke indicated on 9/22/06 that they spray all of their root crop fields with this system on a rotating basis (picture of spray rig was taken at POU WR# 63-3390, which is located southeast of this WR on Homedale Rd). They no longer have any livestock (previously 500 head), and requested that item be removed.

Commercial Background Information:

Commercial Use: spray row crops (apple orchards torn out). They spray row crops 6x/yr.

Size of Tanks the sprayers have: 150 gallon

How many times does he fill the tank per spray? 10

Where are the 3 houses located? One torn down, one at 17553 Van Slyke, one house had a private well drilled for it, and the shop directly east from 17553 Van Slyke.

63-9132: (a) 17491 Van Slyke Rd. house: 1 ½" discharge, to 1 ½" buried PVC to house (internal/external use for immediate yard and garden area only). NOTE: Not used for any irrigation purposes or as supplemental water to irrigation system.

(b) Glen Mossel's 2295 A.P. Rd. Wilder house: 1 ½" discharge to buried 1 ½" PVC to house (internal/external use for immediate yard and garden area only). NOTE: Not used for any irrigation purposes or as supplemental water to irrigation system.

NOTE:(2-POUs with 2 different owners and locations) (a) 17491 Van Slyke Rd, Wilder, Idaho 83676 (need to verify location), and (b) Glen Mossel 2295 A.P. Rd., Wilder, Idaho 83676 (T3N, R4W, Sec 5, SWNW). Recommend a split. Property south of Mossel's house is still owned by Van Slykes. No longer have any livestock, and requested that "stockwater" be removed from this WR.

63-02857: 8" discharge to buried 8" PVC running directly west to east to the top of the hill where the tower is, then 3" aluminum hand line, 1/8" nozzles. Or the well open

discharges directly south then turns east to a pond where it co-mingles with Wilder Irrigation, is piped to a holding tank to the south through 8" PVC buried (directly in northwest of 17491 Van Slyke Rd (Howard's mom's house) where it is pumped via (2)-50 Hp Berkeley booster pumps, each with 4" discharge, 2' lift, 40 psi, pumped to the field located south of the house (17491 Van Slyke Rd) through buried 6" PVC that reduces down to 4" PVC. 3" aluminum hand line runs east and west, (200) 1/8" nozzles run at one time.

Along the north boarder, there are both aluminum pipe to transport water, and concrete ditches (which can be used to gravity flow north to south with 1" siphon tubes, or hook up 3" hand line on the aluminum pipe, with (200) 1/8" nozzles that run at one time).

NOTE: Wilder Irrigation is the main source with a head gate to the south of the POD. POD for 63-02857 is only a supplemental source that is co-mingles with Wilder Irrigation, except for the field north of 17553 Van Slyke (by the tower in the picture) where for this field it is the sole source. These fields are sprayed with the spray rigs mentioned in WR# 63-04761. Mr. Slyke stated that these have always been the acres they have irrigated with this system.

63-3390: well (secondary source) open discharges into a holding pond. Wilder Irrigation (main source) also open discharges water into the same holding pond (pipe located on south end of pond). There is an overflow in the holding pond that routes water back to Wilder Irrigation. There are 2 Berkley booster pumps, both with 4" discharge, #1 Booster Pump (30 Hp) pumps water to the north where there is a control valve, then buried 4" PVC with risers run west to east along the north property line to attach 3" aluminum hand line (running north to south) with 1/8" nozzles (110 nozzles run at one time). This mainline was installed over 15 years ago with hand line and wheel line being the sole sources prior to the pivot being installed. #2 Booster Pump (40 Hp) pumps through 6" buried PVC to the Pivot, average 80psi, with regulator on the pivot to control the pressure over the hill. 6 towers, with a big gun on the end.

NOTE: Mr. Van Slyke stated that the acres indicated on the map have always been the acres they have irrigated. The Pivot was installed in the Fall of 1993, and prior to that they irrigated the system with the same mainline they have running across the north boarder (runs west to east) with some branching off to wheel line and hand line. The sprayer rig in the photograph was spraying at this POU. Mr. Van Slyke stated that they rotate around the field (this commercial use originated from WR# 63-04761). Wilder Irrigation is the primary source for this system, with groundwater being supplemental.

63-20568:

Recommend disallowing this WR due to the system not being used for the past 10 years, and Wilder Irrigation having been the sole source.

GROUNDWATER THEORETICAL ANNALYSIS

FILE: 63-02857

DATE: 9-20-2006

BY: Sandy Hemerway

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8 \times (HP) \times (EFF.))}{TDH}$

Q = CFS

HP = Total Brake Horsepower of pumping plant (including booster) 5 Hp

Eff. = Pumping plant efficiency (assume 70% or 0.70)

TDH = Total dynamic head = [(LIFT) + (PSI X 2.31)]

LIFT = Depth to water in FEET from land surface to pumping water level 93' static + 10 = 103'

PSI = Pumping pressure measured in PSI near pump (if open discharge assume [0]) 40 psi

$$Q = \frac{(8.8) \times (\underline{5}) \times (0.70)}{[(\underline{103}) + (\underline{40} \times 2.31)]} = \frac{30.8}{145.4} = 0.157 = \boxed{0.16 \text{ cfs}}$$

REMARKS: This well is the sole source for the field on the top of the hill, north of 17553 Van Slyke Rd shown in photograph with a "tower" in the background on top of the hill. Otherwise this well is only a supplemental source to Wilder Irrigation, since it does not nor could not produce enough to be the sole source for the acres south of this POC & south of 17491 Van Slyke Rd (Howard's Mom's house).

Wilder Irrigation is the main source, except 1 field.

63-4761 & 63-20568 Field Exam Request:
Van Slyke Farms Inc.

Contact:

04/25/2006

Contact **Everett Van Slyke** at 337-3437 to set up a field exam.

Property Address:

Get directions from Mr. Van Slyke when you call to set up an appointment.

Requests:

*Please verify **all the elements** of these rights along with finding out about some issues on licenses 63-2857, 63-3390 and how 63-9132 relates to 63-4761.

In addition, please verify:

- GPS the location of the diversion points.
- For right 63-2857 a domestic use is claimed but I cannot find a house to attach it to. Please find out where the house under this right is located. I have attached a layout of the irrigation place of use and the point of diversion for you to draw the location of the house on. Also please ask if there is a lawn associated with the house that is irrigated from the well.
- For right 63-3390 we need the claimant to show us where the place of use is located. They were licensed for 78 acres of irrigation but the field is much larger. Please ask where they are using the water from this well. Layouts are attached for you to draw on.
- Right 63-4761 is for commercial use at an apple orchard, 3 homes and stockwater use. Need to know:
 - How many times per year do they spray the orchard?
 - What size tank does the sprayer have?
 - How many times does he fill the tank per spray?
 - Where are the 3 homes located?
- Right 63-9132 uses the same well, and one additional well, as 63-4761 for spraying, 1 home and stockwater.
 - Are these the same 500 head of cattle under both claims?
 - Where is the house located?
- Right 63-20568 is for use of water from a drain. Need to have the point of diversion GPS'd and the acres that can be irrigated from the drain plotted on the attached aerial photo. We also need to know how much water can be diverted from the drain.

- **1987 Aerial Photo:** Please draw the **acres** that have been irrigated under each source on the enclosed **1987 aerial photographs**. Draw the **diversion works** on the 1987 aerial photos, along with the **points of diversion**.
- **Capacity of System:** Please try to measure the point of diversion under 63-20568. Verify that the claimed **amount** is possible/applicable.

Apparently the district is against permitting water
to be used outside the district, but in this case
they are doing it. This is stored water and the
owner asks delivery of whatever amount he
wants at any heading.

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho, No. 22069.
That the point of diversion is described in said permit as being located 400 ft. South and 50 ft. West from the NE corner of NW. Sec. 5, T.3 N., R.4 W. C.
That he now requests that the point of diversion be changed to a point 1200 ft. West and 75 ft. South of NE corner of SW. Sec. 6, T.3 N. R.4 W., County of Canyon, Idaho.
That his reasons for desiring to make such change are as follows: Hole at original location proved to be dry, making it necessary to change drilling to new location.
That no one will be injured by such change, and that such change will be made at Permit Holder's own risk.
