14. Remarks:

THIS RIGHT IS A SPLIT FROM FORMER RIGHT 63-9972.

The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Approval of this transfer does not preclude the opportunity for review of the validity of this water right in the ongoing Snake River Basin Adjudication.

Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.

After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

The total instantaneous diversion of water from all points of diversion under Rights 63-31782 and 63-31784 shall not exceed 0.41 cfs, nor total combined annual volume of 75.7 af.

Prior to the diversion and use of water under this approval, the right holder shall comply with applicable water quality standards of the Department of Environmental Quality.

Right 63-31782 is also diverted through the points of diversion described above.

2. Quantity and quality of return flows and location of discharge: The dairy facility is considered 100 percent consumptive and therefore no discharge will occur. All manure is exported from the facility. No wastewater is spread on property. Some wastewater is evaporated.
3. Describe effects on other water uses resulting from the proposed change: The water users nearby the FROM well will benefit for having less ground water diversion at the Stone Creek Turf Farm. Water users at the TO well will not experience any change since this is an existing dairy and that ground water levels are known to be stable in this area.

I hereby assert that no one will be injured by such change and that the change does not constitute an enlargement in use of the original right. The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in voiding its approval.

REMARKS

Stone Creek Turf Application for Transfer of Water Right Nos.

63-8796 and 63-9972

Applicant wishes to transfer a portion of water right nos. 63-8796 and 63-9972 to stockwater and commercial uses at a new Place Of Use (POU). The new POU (the Van Ess dairy) is in the W1/2NW Sec. 19 T5N R2W. The requested transfer will dry up 23.8 irrigated acres from 63-8796 and 2.2 irrigated acres from 63-9972.

Sections 3 and 7 of the applicant's affidavit (Tab 1 – attached) states that the property was a turf-growing operation. Based on the Allen & Brockway (1983) pasture (assumed to closely resemble turf grass) in the Boise area has an irrigation requirement of 2.91 acre-feet/acre. Therefore, to obtain the required 75.7 afa for commercial and stockwater operations, a total of 26 acres are being retired.

Idaho Code 42-222 requires IDWR to address the following components. The applicant's response follows each component.

Will There Be Injury to Other Water Users?

This transfer provides the correct amount of commercial and stockwater to the existing facility. No expansion of the dairy will occur. No new diversions or increased diversions will result. The current owners of the dairy purchased the facility with deficient water rights. This transfer will correct the problem.

The FROM well is located in Meridian. Ground water elevation maps from the Department of Water Resources show that ground water in Meridian is tributary to the Boise River. The water level change map shows that this area has fairly stable water levels; the map indicates approximately a 2-foot decline.

The TO well is located north of Middleton. Ground water in this vicinity is also tributary to the Boise River. The water level change map shows stable ground water levels in the area with approximately a 1-foot decline.

Transferring water from Meridian to Middleton will not change the amount of water in the Boise River. Also, ground water levels near the FROM well are stable and are not in a condition of large decline. This transfer will not injure ground water users or surface water users.

Is This in the Local Public Interest?

Yes. The existing facility has been operating for years. This transfer is only an administrative effort to ensure that the water rights of the facility are correct and sufficient in preparation for the upcoming Snake River Basin Adjudication. No changes in operations will result and therefore no local public interest issues should exist.

Also, the ground water diversions at the FROM well will be reduced, which is to the benefit of the nearby water users and therefore should be in the public interest.

Will There be any Effect on Local Agricultural Base?

This transfer is an administrative effort to ensure that the existing facility has the appropriate amount of water rights. The facility has been operating for years and no operational changes are planned with the approval of this transfer. The approval of this transfer will ensure that the existing facility can remain in operation and therefore continue its demand for local agricultural products.

Re: Application for Transfer – Renata Ham & Van Ess Dairy

Dear Mr. Spackman:

As you know, we own the real property to which Renata Ham has proposed to transfer water right nos. 63-8796 and 63-9972.

The purpose of this letter is to advise the Department of Water Resources that we consent to and agree with the transfer and will cooperate in the transfer process. Upon completion of the transfer, the resulting water rights will change ownership to Van Ess Dairy, LLC.

Thank you for your kind consideration.

Sincerely,

WATER RIGHT PURCHASE AND SALE AGREEMENT

THIS WATER RIGHT PURCHASE AND SALE AGREEMENT ("Agreement") is entered into effective this 28th day of April, 2003 by and between Renata Ham, d/b/a Stone Creek Turf, a sole proprietorship (the "Seller"), whose address is 5125 Morningdale Dr., Boise, ID 83713, and VanEss Dairy, LLC (the "Buyer"), whose address is 26956 Cemetery Road, Middleton, Idaho 83644. In consideration of the sums to be paid by Buyer to Seller, and the mutual covenants herein contained, the parties hereby agree as follows:

RECITALS

1. Seller owns licensed ground water right nos. 63-8796 and 63-9972, more particularly described on Exhibit A. Water right nos. 63-8796 and 63-9972 are appurtenant to and have been beneficially used to irrigate 98 acres for which they are licensed in the NE $\frac{1}{4}$ of the NW $\frac{1}{4}$, the SE $\frac{1}{4}$ of the NW $\frac{1}{4}$, the NW $\frac{1}{4}$ of the NE $\frac{1}{4}$, and the SW $\frac{1}{4}$ of the NE $\frac{1}{4}$ (the place of use for 63-8796); and in the SW $\frac{1}{4}$ of the NE $\frac{1}{4}$ (the place of use for 63-9972), all in section 31, T4N, R1E, Boise Meridian in Ada County (the "Property"). The Property is more particularly described on Exhibit B.
2. Seller desires to sell to Buyer: a) the approximately 35 percent (23.8/68) portion of water right no. 63-8796 that is appurtenant to a total of 23.8 acres in the NE $\frac{1}{4}$ of the NW $\frac{1}{4}$ (1.8 acres), the NW $\frac{1}{4}$ of the NE $\frac{1}{4}$ (15 acres), and the SW $\frac{1}{4}$ of the NE $\frac{1}{4}$ (7 acres); and b) the approximately 7.3 percent (2.2/30) portion of water right no. 63-9972 that is appurtenant to 2.2 acres in the SW $\frac{1}{4}$ of the NE $\frac{1}{4}$, all within the Property. These portions of the respective ground water rights are collectively referred to as the "Water Rights."
3. Buyer desires to purchase the Water Rights and transfer their points of diversion and places of use to Buyer's property in Canyon County, or otherwise use the Water Rights in a mitigation or similar plan to allow such water use on Buyer's property.

AGREEMENT

NOW THEREFORE, in consideration of the foregoing recitals, and the covenants and conditions set forth below, Seller agrees to sell the Water Rights to Buyer, and Buyer agrees to purchase the same.

4. Purchase Price. The Purchase Price for the Water Rights is [REDACTED].

a. Non-refundable Earnest Money payment. Upon execution of this Agreement by Seller and Buyer, Buyer shall pay Seller [REDACTED] as a non-refundable earnest money payment ("Earnest Money"), which Earnest Money shall be applied to the Purchase Price at Closing. The Earnest Money shall be retained by Seller unless i) Seller refuses to close this transaction; or ii) any of Seller's representations contained in paragraph 10.a below are determined to be false and as a result thereof, Buyer terminates this Agreement.

b. Balance of purchase price. [REDACTED] being the Purchase Price less the Earnest Money, shall be due and payable to Seller at Closing.

5. Buyer responsible for water right transfer. Within thirty days after this Agreement is signed, Buyer shall file, with the Idaho Department of Water Resources ("Department"), an application to change or transfer the Water Rights to Buyer's place of use, proposed nature or time of use, and point of diversion or, in the alternative, an application for a new ground water permit in which the retirement or other approved use of the Water Rights will serve a mitigation or similar purpose (collectively, "Transfer") and thereafter shall diligently pursue the Transfer at Buyer's sole cost. Buyer shall provide Seller a copy of the Transfer application promptly upon its filing. Upon filing the Transfer, the Water Rights no longer will be diverted from the well on Seller's property or placed to beneficial use by Seller unless Buyer agrees in writing that it can be so used on an interim basis during the pendency of the Transfer.

6. Seller to cooperate with Buyer's Transfer efforts. At Buyer's request, Seller shall cooperate with Buyer in Buyer's pursuit of such Transfer, and shall provide Buyer with any information Seller has concerning the Water Rights that Buyer may reasonably request in pursuit of the Transfer; provided, that if responding to such request will require Seller to incur attorney or consultant fees or costs, the following conditions shall apply:

a. Seller shall provide Buyer a written estimate of such fees and costs and shall not be obligated to provide a response until Seller receives from Buyer a written approval of such fees and costs and a commitment from Buyer to pay them directly or reimburse Seller for Seller's payment of them. Once Seller has received such approval, Seller shall provide the response to the extent of the fees and costs covered in the approval.

b. Seller shall forward to Buyer all bills for such fees and costs within thirty days after Seller receives invoices for such expenses from a consultant or attorney, and shall inform Buyer whether Seller has paid these invoices or, in the alternative, is forwarding them to Buyer for payment.

c. Within thirty days after Buyer receives them, Buyer shall either pay such invoices directly or reimburse Seller for Seller's payment of them.

7. Closing. Closing shall occur no later than the earlier of: a) ten days after the final, unappealable approval of the Transfer ("Transfer approval"), or b) 12 months after the date of this Agreement. At the Closing:

a. Seller shall deliver to Buyer: i) an executed and acknowledged Water Right Grant Deed in the form of the specimen attached to this Agreement as Exhibit C; ii) all documentation, including appropriate deeds, leases, and assignments, confirming Seller's ownership of the Water Rights and its entitlement to convey them to Buyer; iii) an executed and acknowledged Notice of Change of Ownership confirming Buyer's ownership of the Water Rights and the assignment of the appropriate portion of the Snake River Basin Adjudication Claim for the Water Rights; and iv) such other documents as Buyer may reasonably request within thirty days prior to Closing to confirm Buyer's ownership of the Water Rights or their transferability. Seller shall make best efforts to provide all documents referenced in item ii of this paragraph within 10 days after the date of this Agreement.

b. Buyer shall deliver to Seller the balance of the Purchase Price by means of a cashier's check or other means of payment acceptable to Seller. Buyer shall have responsibility for recording or filing the Grant Deed and Assignment and other documents with the county recorder, the Idaho Department of Water Resources, or any other entities Buyer deems appropriate.

8. Failure to close; Buyer's and Seller's elections. If the Transfer approval does not occur within 12 months after this Agreement, Buyer at its option may either proceed to closing within 20 days after such 12-month deadline or terminate this Agreement by written notice and forfeit its Earnest Money. If Buyer fails to close the transaction within such 20 days after the 12-month deadline or otherwise breaches this Agreement, in addition to any other remedies Seller might have, Seller at its option may terminate this Agreement and retain the Earnest Money. If this Agreement is terminated by whatever means, Buyer, at its cost, shall forthwith withdraw and cancel the Transfer and take any steps necessary to ensure that the Department cancels, reverses or otherwise nullifies the Transfer application process and any Transfer approval, and such obligations shall survive the termination.

9. Extension of closing on certain conditions. If the transfer approval has not occurred within eleven months after the date of this Agreement, Buyer shall have

the option of extending the Closing for up to six additional months upon these terms:

a. Buyer shall, on or before five working days after such eleven-month date, notify Seller in writing of Buyer's intent to extend the closing date, in one-month increments, up to six additional months, and enclose with such notice the extension payment as set forth in subparagraph 9.b, below.

b. Buyer shall pay Seller [REDACTED] for each month of extension, one-third of which shall be considered an addition to the Earnest Money and shall apply to the purchase price, two thirds of which shall not apply to the purchase price and shall be retained by Seller as consideration for the extension. The extension shall not be effective unless Seller has received both the Buyer's notice and the extension payment within the time period specified above.

c. At the end of such extension period, the same provisions regarding closing as are specified in paragraph 8, above, shall apply, except that the "12-month deadline" specified in that paragraph shall be such deadline as extended, and the amount of Earnest Money credited to the purchase price shall be adjusted as set forth in this paragraph 9.

10. Representations and Warranties.

a. Seller hereby represents and warrants that:

i. The Water Rights have been beneficially used as the sole water source to irrigate the Property;

ii. The Property no longer will be irrigated by the Water Rights after the date of this Agreement, subject to the provision for interim use in paragraph 5, above;

iii. Seller is the owner of the Water Rights and has not conveyed, mortgaged, or pledged the Water Rights to any other person or entity;

iv. Seller has not engaged or dealt with any broker or finder in connection with the sale of the Water Rights;

v. Seller has the legal power, right and authority to enter into this Agreement and to perform Seller's obligations hereunder;

vi. Claims have been filed for the Water Rights in the Snake River Basin Adjudication, but Seller makes no representation or warranty regarding the outcome of that proceeding as it might affect the Water Rights;

vii. The Water Rights have been placed to continual beneficial use on the Property, and Seller has no knowledge of any continuous five-year period of nonuse of the Water Rights; and

viii. Seller makes no other guarantees or warranties as to the Water Rights, their yields upon transfer, or transferability. Buyer understands and agrees that the purchase price set forth above will remain the same regardless of the amount of water Buyer ultimately is allowed to divert and place to beneficial use under the Transfer; that the amount of water could be less than the face value of the Water Rights; and that, should it approve the Transfer, the Department may impose conditions on the use of the Water Rights.

b. Buyer hereby represents and warrants that:

i. Buyer has the legal power, right and authority to enter into this Agreement and to perform Buyer's obligations hereunder; and

ii. Buyer has not engaged any broker or finder in connection with the purchase of the Water Rights.

11. Remedies on Default. If either party breaches this Agreement, the non-breaching party shall be entitled to all remedies available at law or in equity.

12. Notices:

13. General Provisions.

a. This Agreement contains the entire agreement between the parties related to the purchase and sale of the Water Rights and all prior or

contemporaneous agreements, understandings, representations and statements, oral or written, are merged herein.

b. No modification, amendment, discharge, or change of this Agreement shall be valid unless the same is in writing and signed by both parties.

c. If either party commences litigation for the judicial interpretation, enforcement or rescission of this Agreement, the prevailing party shall be entitled to its reasonable attorney fees and costs.

d. Time is of the essence to this Agreement. In particular, the requirement that Closing must occur within 12 months (or within up to 18 months if Buyer purchases an extension pursuant to paragraph 9) is a central and material term, and either party's failure to close within the applicable time period, subject to the provisions of paragraphs 8 and 9, above, shall be a breach of this Agreement.

e. All obligations referred to herein that reasonably are to be performed, or may be performed, after Closing, and all representations and warranties contained herein, shall survive the Closing and delivery of Seller's Water Right Grant Deed and Assignment.

f. This Agreement shall be binding upon, inure to the benefit of, and be enforceable by the parties hereto and their respective heirs, representatives, successors and assigns.

g. All notices to be given to the parties shall be in writing, delivered in hand, or by U.S. Mail, postage pre-paid directed to such parties address as stated above unless such party shall have directed in writing that notice be sent to a different address.

h. This Agreement may be executed in counterparts.

IN WITNESS WHEREOF, this Agreement has been executed by the parties, in the State of Idaho, as of the date set forth above.

IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

THIS RIGHT IS A SPLIT FROM FORMER RIGHT 63-9972.

Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.

After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

The total instantaneous diversion of water from all points of diversion under Rights 63-31782 and 63-31784 shall not exceed 0.41 cfs, nor total combined annual volume of 75.7 af.

Right 63-31782 is also diverted through the points of diversion described above.

The right holder shall accomplish the change authorized by Transfer No. 70872 within <one> year(s) of the date of the approval.

Failure of the right holder to comply with the conditions of Transfer No. 70872 is cause for the Director to rescind approval of the transfer.

Prior to the diversion and use of water under this approval, the right holder shall comply with applicable water quality standards of the Department of Environmental Quality.

IDAHO DEPARTMENT OF WATER RESOURCES
Adjudication Claim Report 63-31784

Conditions of Approval:

1. 046 Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
2. WB4 The total instantaneous diversion of water from all points of diversion under Rights 63-31782 and 63-31784 shall not exceed 0.41 cfs, nor total combined annual volume of 75.7 af.
3. T07 The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
4. T17 Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
5. T09 Approval of this transfer does not preclude the opportunity for review of the validity of this water right in the ongoing Snake River Basin Adjudication.
6. X36 Right 63-31782 is also diverted through the points of diversion described above.
7. 01Q After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
8. P21 THIS RIGHT IS A SPLIT FROM FORMER RIGHT 63-9972.
9. T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
10. 106 Prior to the diversion and use of water under this approval, the right holder shall comply with applicable water quality standards of the Department of Environmental Quality.

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated January 21, 1983; and has submitted Proof of Beneficial Use on January 17, 1989. An examination indicates that the works have a diversion capacity of 2.490 cfs of water from a GROUNDWATER source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION	03/15 to 11/15	0.60 CFS	135.0 AF

LOCATION OF POINT(S) OF DIVERSION:

Total number of acres irrigated: 30

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.5 afa per acre for the lands above.

E. FLOW CALCULATIONS

☐ Additional Computation Sheets Attached

- Measured Method: Made from the pump in a straight section of pipe. Rotor on Grain Land meter inserted 1 inch into 8" pipe which is at mean velocity in a straight section of an 8 inch pipe. Interior diameter of pipe measured to be 7.5" or 0.635' R = 0.318 ft. Area = 0.318² = 0.101 sq ft. (0.461 inch per second) Area of 8" pipe for which meter is calibrated = 0.309 sq ft. Meter measured a near steady flow of 1.230 gpm from 3:15 pm to 5:30 pm. Multiplied by 2.31 = 2.83 gpm.
- Alternate Method for Checking Purposes:

F. PUMP EFFICIENCY DATA (Optional)

5. Total quantity to be appropriated:

a. .60 cubic feet per second and/or b. _____ acre-feet per annum.

6. Proposed diverting works:

a. Description of ditches, flumes, pumps, headgates, etc. well with pump and into sprinkler system

b. Height of storage dam _____ feet, active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet, materials used in storage dam: _____

Period of year when water will be diverted to storage _____ to _____ inclusive.
(Month/Day) (Month/Day)

c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.

7. Time required for the completion of the works and application of the water to the proposed beneficial use is 5 years (minimum 1 year - maximum 5 years).

8. Description of proposed uses:

a. If water is not for irrigation:

(1) Give the place of use of water: _____ $\frac{1}{4}$ of _____ $\frac{1}{4}$ of Section _____ Township _____
Range _____ B.M.

(2) Amount of power to be generated: _____ horsepower under _____ feet of head.

(3) List number of each kind of livestock to be watered _____

(4) Name of municipality to be served _____, or number of families to be supplied with domestic water _____.

(5) If water is to be used for other purposes describe: _____

11. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.
