Subcase 75-4341

Case No. 39576

I, Thomas McFarland affirm that I have used and or know of irrigation water being applied to the land described in water right number 75-4341 from April 1 until November 15, the approximate freeze-up date as water was available. This water use provides a visible increase in forage production the following year. In very dry years it seems to actually protect the viability of certain of our forage species. The land in question has been owned by my father and/or one of his brothers since 1924. I moved to the property in 1991 and continued the practice of irrigating the land until freeze-up. I can remember this water use as far back as the early 1970's.
