5. ☐ **Point(s) of Diversion**
Should be: _____
6. ☐ **Instream Flow Description**

10. **I object because:**

- ☐ This water right should not exist.
- ☐ This water right was not recommended, but should be recommended with the elements described above.

REASONS SUPPORTING OBJECTION(S): A portion of decreed water right no. 47-39 was transferred under IDWR Transfer No. 2664 to convert the nature of use for a portion of the water right from Irrigation to Stockwater. The entire amount of water needed to operate the large stock water system that was developed comes from the transferred right. The subject transfer was necessary to provide enough water to operate this large system and is not subject to a de minimis limitation. The Amended Director's Report dated June 28, 2010 contains a de minimis quantity limit which is not applicable. Consequently, the de minimis quantity limit

needs to be removed from the water right before a partial decree is entered.

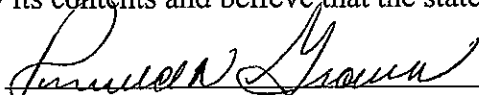

The place of use also needs to be revised to accurately describe the locations for the stock water troughs that receive water through the system covered under this water right.
