Re: Hagadone Hospitality Co. / Notice of Claim to a Water Right
Claim No. 95-4394

Gentlemen:

Enclosed is a copy of the Notice of Claim to a Water Right which we have filed electronically on behalf of Hagadone Hospitality Co., together with a copy of the Claim Stub, and this firm's check in the sum of \$181.00 as the filing fee for the Notice. Please consider this letter and the enclosed documents as additional support for the Claim.

The Claimant owns and operates the Coeur d'Alene Resort Golf Course on the benefitted property. The Claimant purchased the property from the Potlatch Corporation in 1988, acquiring title by Grant Deed recorded as Instrument No. 1110055, records of Kootenai County, Idaho. The title acquired by the Claimant included "all and singular the tenements, hereditaments and appurtenances", including all water rights, relating to the property. The Potlatch Corporation had established a statutory claim to the right to divert 8.91 CFS from Lake Coeur d'Alene for industrial purposes under Water Right No. 95-4394, with a priority date of June 1, 1925 (the "Potlatch Water Right").

The nature of the use was changed by the Claimant from industrial to irrigation uses for the golf course, landscaping and related improvements then being developed on the property. In conjunction with those improvements, the Claimant had also secured licenses for water rights under Water Right No. 95-8593 and Water Right No. 95-8737, with priority dates of June 27, 1988 and June 3, 1992, respectively. These licenses were likely redundant to the existing rights under the Potlatch Water Right, but should be considered in full force and effect if for any reason the claim under the Potlatch Water Right is disallowed in any respect.

The Claimant is entitled to a priority date of June 1, 1925, based upon the priority date of the Potlatch Water Right, because of the "accomplished transfer" of that right under Idaho Code

45-1425. No other rights existing as of the date of the change (effectively 1988) would have been injured by the change in use, nor did the change in use result in an enlargement of the right. In fact, the amount of water used is actually less than what the Potlatch Water Right would allow. The Claimant's current facilities and beneficial uses allow for diversion of 4.9 CFS (2200 GPM), far less than the 8.91 CFS allowed under the original right.

Enclosed are copies of the following documents in further support of the Claim.

1. Claim to a Water Right by Potlatch Corporation, 95-4394.
2. Grant Deed from Potlatch Corporation to Hagadone Hospitality Co., recorded March 1, 1988 as Instrument No. 111055, records of Kootenai County, Idaho.
3. Water Right License, Water Right No. 95-8593.
4. Water Right License, Water Right No. 95-8737.
5. Description of diversion works, capacity and beneficial use.

If you have any questions, or if anything further is needed, please let me know. Thank you for your consideration.

Sincerely,

PAINE HAMBLIN LLP

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court.

Notice is hereby given that POTLATCH CORPORATION
(name of claimant)

of P.O. Box 1016, Lewiston, Idaho 83501, claims a right to the diversion and beneficial use of
(mailing address)

the public water of the State of Idaho

The extent and nature of said claim is as follows:

- (1) Describe source of water: (name of stream, lake, spring, etc., or ground water) Coeur d'Alene Lake
_____, tributary to, _____
- (2) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

Amount	<u>4,000 gpm</u>	Use	<u>Industrial</u>	Period of Use:	From	<u>Jan</u>	To	<u>Dec</u>
Amount	_____	Use	_____	Period of Use:	From	_____	To	_____
Amount	_____	Use	_____	Period of Use:	From	_____	To	_____
	(cfs, gpm or a/f)		(dom., irri., stock, etc.)					(both dates inclusive)

- (3) Total quantity of water claimed: _____ cubic feet per second, or _____ acre feet per annum, and/or 4,000 gallons per minute.
- (4) Priority claimed: (the date water was first applied to beneficial use) 1925

A claim is not acceptable on a ground-water source with a priority later than March 25, 1963 or on a surface-water source with a priority later than May 20, 1971. An exception to this rule is that a claim may be filed on domestic use from a ground-water source.

- (5) A) Point of diversion: (give location of point where water is diverted from its source)
NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 19 Twp. 50N Rge. 3W B. M. County of Kootenai
 Additional points of diversion:

B) Describe means of diversion of water: (pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.) Give sizes and capacities; be as specific as possible. pump and pipeline

- (6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

[illegible]

Total No. of acres _____

Scale: 2 inches equal 1 mile.

Map should show the location of the point of diversion and the place of use of the water by 40-acre subdivisions, section, township and range of the public land survey system.

COEUR D'ALENE RESORT GOLF COURSE

Description of Diversion Works and Capacity

Diversion Works:

One (1) complete Flowtronex Brand skid mounted pumping plant consisting of:

- 2 ea. 75HP 480 Volt Variable Speed Drive Turbine Irrigation Pumps
- 1 ea. 5HP Submersible Jockey Pump
- Hydraulic and electric control valves
- Flowtronex electrical control panels

Capacity:

- Total System Capacity range of pumping – 50 to 2,200 GPM*

Location:

- The Lake Water Irrigation Pumping Plant is located on the South West region of the Golf Course, just west of the Pro Shop and South of the 3rd Tee near Lake Coeur d'Alene.

*Please note that Flowtronex Pumping Station is rated at 1,700 GPM; however, the actual pumping condition allows the system to flow at 2,200 GPM. This is accomplished by lowering the operating pressure of the sprinkler heads from the design pressure of 110 psi to an operational pressure of 90 psi.

To summarize: The extent of our pumping capacity and use at the golf course is 2,200 GPM.
