Re: Snake River Basin Adjudication (SRBA)
Late Notice of Claim 65-23318

Dear Mr. and Ms. Fulton,

Last year we spoke about late claim 65-23318 (see enclosed letter). Since that time I have not received any correspondence regarding water being put to beneficial use from your well.

The Idaho Department of Water Resources will be submitting a supplemental director's report to the SRBA court in the end of June this year. If you have ran power to your well and have been putting the water to beneficial use, please supply me with evidence of use by **June 4, 2010**. Acceptable evidence can be photographs, power records, or anything that supports that water is being used for domestic and or stockwater purposes.

If I do not receive any correspondence from you, I will have to recommend your claim as disallowed to the SRBA court. The main problem we are running into is that the SRBA is really meant to record historical, or a water right that has already been developed. In your case, if development has not yet occurred, it is probably best to file for a permit which is the method you would use to develop a new water right. The application for permit form can be found at:

<http://www.idwr.idaho.gov/RulesStatutesForms/WaterRights/WaterRightForms.htm>

Please feel free to contact me at (208-287-4916 if you have any questions.

Respectfully submitted,

Craig L. Saxton
Water Right Supervisor

Re: Snake River Basin Adjudication (SRBA)
Late Notice of Claim 65-23318

Dear Mr. and Ms. Fulton,

I spoke with Mr. Fulton on April 21, 2009. 65-23318 claims domestic use, but from our conversation it sounds like the well hasn't actually been put into production yet as you don't have power ran to the well. However, Mr. Fulton told me that you planned on building this spring.

I am going to hold the recommendation of 65-23318 out of the next directors report that is due to be submitted to the court in early June. This will give you some time to develop the property and get power to the well so it can produce and be used for domestic purposes.

Once you can pump water from the well and use it for purposes in association with a home or stockwatering, send me a picture showing the system is in place. Then IDWR can look at recognizing a valid domestic right with the priority date of that when the well was first put to beneficial use.

If I do not hear from you by the time the next report is due to be submitted to the court (late fall of 2009), I will contact you and we can discuss your options at that time.

Please give me a call if you have any questions or concerns.
