City of Hailey Water System – The Early Years

January, 1885 – Sanborn map describes water supply as 30000 gallon reservoir elevated 110 feet above town level, filled by mountain streams.

June, 1888 – Sanborn map describes water supply as 150000 gallon reservoir elevated 110 feet above level of Main Street 1½ miles distant from court house filled by creek.

August, 1890 – Sanborn map describes water facilities as earth reservoir capacity 150000 gallon situated 1½ miles NE of court house and elevated 110 feet above level of Main Street. Supply obtained from creek.

August, 1897 – Sanborn map describes water facilities as earth reservoir capacity 150,000 gallon situated 1½ miles NE of court house and elevated 110 feet above level of Main Street. Supply obtained from creek.

December 24, 1900 – Caldwell v. Tucker: Nancy Tucker receives all of the water of Indian Creek, with the exception of water diverted through a pipeline by Alturas Water Company under 37-1216 during the non-irrigation season.

October 27, 1905 – Hailey Water and Power conveys the Tucker land to Leo Cramer. (Deed is not recorded until May 8, 1909.

November, 1907 – Sanborn map describes two separate water systems, Alturas Water Company and the Cramer Water Company.

“The Alturas Water Company – Earth reservoir capacity 150,000 gallon situated 1½ miles NE of court house and elevated 110 feet above level of Main Street. Supply obtained from creek. The Cramer Water Company – 330,000 gallon reservoir situated 2000 feet west of and 180 feet above Main Street supplied by well with two triplex electric pumps of 20 HP and 30 HP.”

October 6, 1909 – Frost Decree: Alturas Water Company decreed sufficient water to fill 10 inch pipeline during the non-irrigation season above the 45 inches (37-1216) decreed to Alturas Water Company in Caldwell v. Tucker under 37-717. And, Hailey Water & Power Company decreed all of the water from Indian Creek as successor to Nancy Tucker under 37-296. This would limit 37-296 to the irrigation season.

October 11, 1913 – Idaho State Life Insurance Company to Dave G. Devine deed: Conveys Tucker land except for 131 inches of water from Indian Creek to be used to supply the City of Hailey. The deed further describes the 131 inches of water as coming from the springs. And, any water from the springs not used by the City of Hailey may be diverted at the springs and used by the second party. This deed also describes the conveyance system and calls for the preservation of the spring area by fencing it to exclude livestock from entering the spring area and polluting it.

September 1, 1915 – Correction Deed from Idaho State Life Insurance Company to Hailey Water Company: States the 131 inches conveyed to the Hailey Water Company is the same 131 inches that was reserved in the Idaho State Life Insurance Company to Dave G. Devine deed.

October, 1920 – Sanborn map describes water facilities as privately owned by Hailey Water Company, with two sources of supply.

“Primary supply is a gravity system with water from living springs on Indian Creek, 5½ miles N.E. of court house and elevated 500 feet above same. A concrete intake box, size 8' x 8' x 4' deep collects flow from several springs, average flow about 131 miner's inches.

Secondary supply is a direct pumping system from auxiliary pumping plant located near foot of Silver Street close to river bottom consisting of an Aldrich 7" x 9" triplex power pump, capacity 320 gallons per minute driven by 20 HP electric motor. Pump takes suction from a 9' x 14' stone lined well 12' deep with an inexhaustible seepage from Wood River “

September, 1931 – Sanborn map describes water facilities as privately owned by West Coast Power Company.

“Primary supply is a gravity system with water from living springs on Indian Creek, 5½ miles N.E. of court house and elevated 500 feet above same. A concrete intake box, size 8' x 8' x 4' deep collects flow from several springs, average flow about 131 miner's inches.

Secondary supply is a direct pumping system from auxiliary pumping plant located near foot of Silver Street close to river bottom consisting of 1 Fairbanks-Morse electric centrifugal pump capacity 750 gpm and 1 Aldrich 7" x 9" triplex power pump, capacity 320 gallons per minute driven by 20 HP electric motor. Pumps take suction from a 9' x 14' stone lined well 12' deep with an inexhaustible seepage from Wood River “

Summary: By 1915 Hailey Water Company or its predecessor had the right to the first 131 inches of water from Indian Creek Spring for year round municipal use. While the 131 inches water diverted in the irrigation season could be from right 37-296, and the 131 inches of water diverted in the non-irrigation season could be from right nos. 37-1216 and 37-717, all of these rights were originally from the Indian Creek rather than Indian Creek Spring. The October, 1920 Sanborn map verifies system from Indian Creek Spring was installed and operational as of 1920, with the spring diversion a significant distance upstream from the original creek diversion.

Possible unclaimed ground water rights for the City of Hailey:

A well was supplying water to the city at least as early as November of 1907.

20 HP triplex pump produced 320 gpm

30 HP triplex pump produced 480 gpm?

Possible 800 gpm Ground Water right with November 1907 priority date. (320 gpm + 480 gpm)

By September of 1931 the 30 HP triplex pump (480 gpm) has been replaced with a 750 gpm centrifugal pump.

Possible 270 gpm Ground Water right with a September 1931 priority date. (750 gpm – 480 gpm)

FROM: AMANDA FOLSOM

DATE: June 16, 2000

I met with Tom Hellen on May 25, 2000. Tom is the city engineer for the city of Hailey. We journeyed out to the Indian Creek Springs where we met up with Bob who also works for the City of Hailey Water Department.

There are several head boxes that collect the water from the Indian Creek Spring. The water is all combined together in a collection house before traveling 2.3 miles south to the generator and one million-gallon tank for city use. The spring is located in the SWSENW ¼ of Sec 23, Twn 03N, Rng 18E. There is a flow meter inside of the collection house, which was measuring 2809gpm. No pumps are used to collect water from the springs or to send it to the generator, it's all artesian and gravity flow.

The generator and tank are located in the NWNE ¼ of Sec 33, Twn 03N, Rng 18E. There is another flow meter inside of the generator house. It was measuring 1519gpm entering into the system after traveling from the spring. The water travels up a 12 inch pipe that narrows to 6 inches and then to the generator. As the water passes through the generator it spins it and causes it to power up. From there the water passes to the chlorinator and then to the million-gallon tank. The water in the tank is then used by approximately 3,000 service connections in the city of Hailey. The overflow from the tank flows out of a pipe at the far west of the tank and back into Indian Creek Spring.

My recommendation is based on the flow meter in the generator house and seeing the past records of the flow rates. My recommendation is as follows:

Claim, please describe who made each admission, what the admission is and whether there are any documents which purport to reflect that an admission occurred.

ANSWER NO. 10: To date, such a contention has not been made.

REQUEST FOR PRODUCTION NO. 5: Please produce all documents that you assert support or may support your Claim.

RESPONSE NO. 5: Claimant objects to this request on the grounds that it is overly broad, too general, unduly burdensome in that the respondent is unable to determine what the proponent may consider supporting a claim. A request for production must identify documents or other things sought with reasonable particularity. Seeking anything that might support a claim does not identify what is being sought with reasonable particularity, and certainly not with the particularity needed for the respondent to identify and produce what is being sought. Without waiving the objection, the proponent is referred to the Court records and IDWR's claim file which reflect communications about the claim.

INTERROGATORY NO. 11: In your Claim, you contend that the Water Right should be in the name of the City of Hailey. Please describe all the facts that support this contention.

ANSWER NO. 11: Claimant objects to this interrogatory to the extent it purports to require the respondent to decide any and

everything that supports the contention. Interrogatories are permitted to elicit basic facts, not a compendium of every fact ranging from the use of every water user within the City of Hailey for the last century to the payment of a bill by each of those users to prove who owns the right. Without waiving the objections, Claimant contends the water right should be in the name of the City because

the City owns the right and is the sole user of the right.

REQUEST FOR PRODUCTION NO. 6: Please produce all documents relating to your answer to Interrogatory No. 11.

RESPONSE NO. 6: See the Court's and IDWR's records with respect to this claim, all of which are equally available to the proponent. Claimant objects to the production of documents for the reasons set forth in Answer No. 11, above, and because this request does not identify items with reasonable particularity. The production of every document or item related to any fact regarding use, payment and consequent recognition of ownership for more than a century is not reasonable.

INTERROGATORY NO. 12: In your Claim, you contend that the priority date of the Water Right is "April 1, 1880." Please describe all the facts that support this contention.

ANSWER NO. 12: Please see Frost Decree.

REQUEST FOR PRODUCTION NO. 14: Please produce all documents relating to your answer to Interrogatory No. 19.

RESPONSE NO. 14: See Answer No. 19.

REQUEST FOR PRODUCTION NO. 15: Please produce all documents that contain any measurement records of Indian Creek and/or Indian Springs flows or diversion quantities.

RESPONSE NO. 15: Please see attached flow records.

REQUEST FOR PRODUCTION NO. 16: Please produce all documents referenced in, relating to or supporting any of your answers to the Interrogatories above that are not otherwise being produced in response to another Request for Production herein.

RESPONSE NO. 16: All responsive documents are being produced, except as noted above.
