In Re SRBA Case 39576	**Subcases: See Attached Exhibit "A"** **STANDARD FORM 4** **MOTION TO FILE** **☐ LATE NOTICE OF CLAIM** **X AMENDED NOTICE OF CLAIM**

X I have read ***SRBA Administrative Order 1, Rules of Procedure*** (amended Sept. 30, 1996).

The various Claimants' names are set forth in attached Exhibit "B"

I am an attorney representing the various Claimants in attached Exhibit "B" to the various Subcases in attached Exhibit "A"

My name is Jerry R. Rigby

My address is: 25 North 2nd East, P.O. Box 250, Rexburg, Idaho 83440

My phone number is: (208) 356-3633

MOTION TO FILE AN AMENDED NOTICE OF CLAIM

A *Motion to File and Amended Notice of Claim* may require a hearing before the Presiding Judge or Special Master or may be granted by leave of the court or by written consent of the parties and the Idaho Department of Water Resources. Leave to amend a claim shall be freely given when justice so requires.

X Claimants (set forth in Exhibit B) to the various Subcases (contained in Exhibit A) must amend their individual Notice of Claims to the use of the water in the SRBA because: In 2006, the various Claimants objected to their individual recommended water rights, citing in chief that the diversion of groundwater resulting from irrigation of water under the irrigation works of an irrigation entity authorized to divert surface (natural flow or storage) water for use and benefit of its shareholders/electors was authorized pursuant to rights granted under I.C. §42-1425 and/or I.C. §42-228 (see Standard Form 1 Objection filed in each of the various Subcases). Several third party water users then filed responses to said objections.

Since 2006, the various parties to the various subcases have been in numerous mediations and negotiations which have not resulted in any substantial settlement of the issues. In the mean time, there have also been certain decisions rendered by the SRBA Court and Special Masters which help address the Claimants' entitlement to the additional rights. Therefore, in order to further pursue the above described rights, surface water Claimants now seek to have their individual claims amended to authorize the water rights of the various surface water irrigation entities to such additional rights of "recharge for irrigation" and/or recovery of water resulting from irrigation by its shareholders/electors within its authorized place of use. This claimed right would include adding such additional points of diversion or re-diversion to the location of each qualifying well of such irrigation entity's shareholder/elector.

In conjunction with the above (although not necessarily required should the above surface water Claimants rights be granted which entitle any qualified well to recover the authorized water from its individual well), and in order to further pursue the above described rights, certain ground water Claimants also seek to have their individual claims amended to authorize the water rights of said ground water Claimants to such additional rights of recovery by each qualifying well of water authorized as "recharge for irrigation" and/or water resulting from irrigation by the irrigation entity's shareholder/electors within its authorized place of use.

This claimed right would include modifying the priority date of each qualifying well to the same date as the original water supply being diverted by the irrigation entity within whose borders the qualifying well is located and appurtenant. This then results in there being two sources of water for each well: The recharge or reclaimed water of the irrigation entity and the groundwater source under the well license, which would allow the well to continue to pump under its license if there is no qualifying right of recovery for the surface water source.

Qualifying Wells are those owned by stockholders/electors within the irrigation entity's authorized place of use and which are recovering ground water resulting from recharge for irrigation and/or water resulting from irrigation under the irrigation entity's irrigation works for use on lands within the irrigation entity's authorized place of use.

Claimants did not seek to amend their claims in 2006 to conform to the intent of their objections due in part to the fact that the pending mediation of the various parties, if successful, may have required Claimants to amend their claims in a manner differently than as they would have amended them in 2006 without the mediation. However, the proposed Amendments have always been "on the table" among the parties who have been involved in the mediation and negotiations.

X I am providing legal and factual documentation to support my amended Notice of Claim. You must describe these documents and attach a readable copy.
The substantial documentation, IDWR water diversion reports and spreadsheets supporting the various rights claimed by Claimants in this amended claim have been supplied to Respondents/Objectors on multiple occasions and in multiple fashions over the five (+/-) years of negotiation and mediation among the parties. Nevertheless, Claimants will supply the same to the Court upon its request and again supply such information and documentation to any Respondent/Objector who requires the same.

I have attached:

X An Amended Notice of Claim (available from IDWR). This motion does not have attached to it the "Amended Notice of Claim" for each of the various Claimants' rights. However, pursuant to the oral instruction by the Court, each amended claim for each Claimant has been separately filed with IDWR and a copy of all amended claims shall be mailed to all parties burned onto CDs in Adobe PDF format.

☐ Payment of the following additional fees required by IDWR:

X Fees have been paid when the claims were originally filed.

This motion will be heard on: October 14, 2010 at 10:00 a.m. at the SRBA courthouse, 253 Third Avenue North, Twin Falls, Idaho. Parties may participate by phone by dialing 1-215-446-0193 and when prompted enter participant code 654400.

TETON RIVER NESENE Sec. 30 Township 07N Range 42E MADISON County

All Qualified Wells of the stockholders/electors as described in Remarks below.

Place(s) of use: Within the area served by this irrigation entity

Remarks: Diversion of this right for the purpose of recharge for irrigation is authorized for a maximum acreage equivalent to the authorized place of use for this right. This right includes an accomplished change in place of use pursuant to Section 42-1425, Idaho Code.§ I.C. 42-1425 and/or I.C. 42-228. This right includes an accomplished change in point of diversion pursuant to Sections 42-1425 and/or 42-228, Idaho Code.

Qualified Wells are those owned by stockholders/electors within the authorized place of use and which are recovering ground water resulting from recharge for irrigation and/or water resulting from irrigation under this entity's irrigation works for use on lands within this irrigation entity's authorized place of use.

1. S38 The use of water for irrigation under this right may begin as early as April 1 and may continue to as late as October 31, provided other elements of the right are not exceeded. The use of water before April 15 and after October 15 under this remark is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date a partial decree is entered for this right.

2. Totalizing measuring devices shall be maintained at all points of diversion.

3. K06 This right is limited to the irrigation of 1720 acres within the place of use described above in a single irrigation season.

4. 135 The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

5. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

6. Six pumps are located at the point of diversion described above.

7. Place of use is overlapped by non-SRBA water permits 22-7490 and 22-7508.

8. 004 This right does not grant any right-of-way or easement across the land of another.

9. E56 The rights listed below are limited to the irrigation of a combined total of 3650.9 acres in

a single irrigation season. Combined Right Nos.: 22-163A, 22-7253, 22-7276, 22-13738, and 22-13739.

10. R04 Use of water under this water right will be regulated by the watermaster of State Water District No. 1.

11. E52 The rights listed below are limited to a total combined diversion rate of 29.04 cfs. Combined Right Nos.: 22-163A, 22-7253, 22-7276, 22-13738, and 22-13739.

12. C05 Right includes accomplished change in place of use pursuant to Section 42-1425, Idaho Code.

13. K01 Right No. 22-13739 is an enlargement of this right pursuant to Section 42-1426, Idaho Code.

14. F06 The following rights are (re)diverted through point of diversion described above: 22-163A, 22-7253, 22-7276, 22-13738, and 22-13739.

15. E51 Right Nos. 22-163A, 22-7276, and 22-13739 are limited to a total combined diversion rate of 24.03 cfs.

Describe any other water rights used at the same place and for the same purposes as describe above: Those water rights recommended as of the date of this amended claim.

This right includes an accomplished change in place of use pursuant to Section 42-1425, Idaho Code.§ I.C. 42-1425 and/or I.C. 42-228. This right includes an accomplished change in point of diversion pursuant to Sections 42-1425 and/or 42-228, Idaho Code. In the event recharge or recovered water is not available, the priority date shall revert to the previously licensed priority date.

1. R30 This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 3.5 afa per acre for irrigation of the lands above.

2. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

3. 902 Modifications to or variance from this license shall be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.

4. 901 This right is subject to all prior water rights and may be forfeited by five years of non-use.

5. 903 The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount that can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.

6. 904 This water right is appurtenant to the described place of use.

Describe any other water rights used at the same place and for the same purposes as describe above: Those water rights recommended as of the date of this amended claim.
