HISTORY of FRANKLIN ELEMENTARY SCHOOL

In the late 1800's the area that is currently south and east of Cole School started to grow. Large cattle ranches and a few farmhouses filled the landscape. The children of these farmers and ranchers attended Scott School, School District #45's only school. By 1900, ninety students were crowded into this one- room schoolhouse. These extreme conditions precipitated the building of an addition to Scott School in 1901.

Franklin Grade School in 1905
Boise, Idaho
Moyers©1975

In 1903, District #45 was divided into two districts: #45 and #19; the latter district was named Whitney School District. Even with the building addition and the expansion into two districts, the student population of Scott School was too large. A decision was made to build a new schoolhouse made of stone, to accommodate the increasing number of students.

Even before the cornerstone of the new school was laid, at the current site on the corner of Orchard and Franklin, the school board met and chose the name by which it is still known today: Franklin School. This much needed building was completed in the summer of 1905. The school bell was added in 1907 and, having survived almost a century of building renovations, is currently displayed near the school's front doors. High school classes were taught beginning in 1908 and in 1911 Franklin

School graduated its first high school student.

Once again the school was overcrowded. Fortunately, in 1914, a construction bond was successful and a two-room frame structure was added to the stone schoolhouse. In 1915 a manual training and domestic science building was built just south and west of the stone schoolhouse. An addition was made to the stone building in 1920. Between 1924 and 1934 four additional acres were added to the school grounds.

From 1911 to 1917 there were no high school graduates from Franklin School; most students attended Boise High School. However, Franklin awarded high school diplomas every year from 1917 until 1949; it became an accredited high school in 1934.

1936 saw a large expansion for Franklin School: three classrooms, a gymnasium, boys and girl's dressing rooms, new space for the domestic science and manual training programs, and a social room for community affairs. Three additional acres were also added to the school grounds this same year.

Two major events happened in 1946: Class A District #2 was formed, comprised of Cole, McKinley, and Franklin Districts and, due to the increase in population surrounding Franklin School, a building was moved from Gowen Field to add five more classrooms.

District #45, to include Franklin School, was annexed into the Boise School District in 1949 and thus ended Franklin School's "career" serving high school students. In this same year, a permanent twelve-room, two-story structure was added to the west end of the main building. This construction included a new entrance to the school and a new office area.

In 1974 a six-room satellite building was constructed on the northwest portion of the playground to accommodate the schools expanding population. Two "portables" were added to the Franklin School Campus at some point after 1974. These buildings are the last additions to the physical plant of Franklin School.

This positive evolution of Franklin School over a period of almost 100 years is quite a legacy of community commitment to educate children of the past, the present, and the future.

Dear Mr. Carlson:

I have received your letter of February 8, 1994 requesting waiver of the late filing fees for the school district's claims in the Snake River Basin adjudication. The basis of your request seems to be "... it is my belief that we did not receive proper notice under the adjudication ..." and you are therefore requesting the late fees be waived.

A review of the department's records shows notice of the adjudication was mailed to the BOISE INDEPENDENT SCHOOL DIST., 1207 WEST FORT, BOISE, ID 83702 on April 28, 1989. I understand this is the proper address for the office of the superintendent of the Boise Independent School District.

The Snake River Basin adjudication is a judicial procedure for the determination of all water rights in the Snake River Basin in Idaho. Section 33-513(2), Idaho Code, lists the superintendent of schools as the authorized representative for the receipt of service of process. A check with the school district office confirmed that you had not been designated the authorized representative for service of process for the Boise Schools.

This analysis leads me to believe that service of the notice of the adjudication was proper and your request for waiver of late fees is denied.

Yours truly,

David B. Shaw

Dear Mr. Shaw:

The Independent School District of Boise City is filing it's adjudication claims under the Snake River Basin Adjudication for water necessary for operation of the school's within the Boise Valley. I realize that the Department has, in the past, notified some of the administration in the School District of the Snake River Basin Adjudication but unfortunately notice was never sent to me as the Administrator of Maintenance for the District. Since it is my sole responsibility to administer the water resources of the District, it is my belief that we did not receive proper notice under the adjudication and therefore I am requesting a waiver of late fee requirements. As required by your agency, we have paid the late fees with the submission of our adjudication claims but would urge you and the Department to favorably consider refund of those late fees. It is a significant outlay for the School District and reduces monies available for maintenance of our school system.

Sincerely yours,

Roger Carlson

RE: Investigation of Water Right Claims in the Snake River Basin Adjudication, Basin 63

Dear Claimant:

As you may be aware, the Idaho Department of Water Resources (IDWR) is commencing its Snake River Basin Adjudication (SRBA) investigation of water rights in the Boise River Basin (Basin 63). This investigation is a major effort, and IDWR has hired a contractor, Intrepid Engineering Services, to assist us with this task.

The purpose of this letter is to advise you that Intrepid might be contacting you to conduct a field investigation of your water use. This investigation is meant to provide important information to the IDWR Senior Water Resource Agent who will be making a recommendation for your water rights. Accordingly, we request that you provide Intrepid with access to your water diversion system so that their personnel can conduct this field examination. Intrepid will be gathering information on the rate of flow, diversion location and place of use of your water rights, and will be reporting this information to IDWR.

If you have sold your property in the Boise River Basin, we request that you forward this letter to the purchaser, so that the purchaser can report the new name and address to our office. If you are unable to forward this letter, please send any information regarding a new owner to our Western Regional Office located at 2735 Airport Way, Boise, 83705, (208) 334-2190.

The process of adjudicating your water rights is straightforward for most people, resulting in the issuance of decreed water rights on your property. Experience has shown that water users who work with our agency early in the process to ensure that their recordings are correct have a better experience than those who wait until IDWR has filed its findings with the SRBA Court. Thus, we encourage you to work with our staff and with Intrepid to ensure that the results accurately reflect your water uses.

Sincerely,

Jan Shurte
Adjudication Section Supervisor
Western Regional Office
