14. Remarks:

Claim amended per Transfer 69928 approved 5/28/03.

Second amended transfer issued as a result of Petition for Reconsideration changing Condition #1.

Diversion and use of water under this right from the new well authorized under Transfer 69928 located in the NENE, Sec 22, T03N, R03W shall be subordinate to all ground water rights existing within the immediate area prior to the date of approval of this transfer upon determination of injury due to local well interference. Provided, (1) this condition does not intend to affect the rights priority date of 7/2/1948, which is expressly preserved except in case of injury as set forth by the following, and (2) "determination of injury" means an injury proven by a claimant to have occurred because of pumping from the new location in conjunction with any pumping from the original location and then only to the extent that the alleged cause (pumping) is something more than would be permitted had the pumping occurred only at the original location.

After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

The total instantaneous diversion of water from all points of diversion under Right 63-2706B shall not exceed 1.20 cfs and 360.6 afa.

This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.

The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

CONDITIONS OF APPROVAL

1. The Director maintains jurisdiction of this transfer up to five (5) years for the purpose of determining potential injury to existing rights, both junior and senior, in the vicinity of the transferred point of diversion.
2. After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
3. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

This right is a split from former right 63-2706B.

Failure of the right holder to comply with the conditions of Transfer 69928 is cause for the Director to rescind approval of the transfer.

After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
