HOW YOU WILL RECEIVE NOTICES IN THE SNAKE RIVER BASIN ADJUDICATION

All documents filed in the Snake River Basin Adjudication other than notices of claims are filed with the court. Notices of claims to water rights filed in the Snake River Basin Adjudication are filed with the Idaho Department of Water Resources. Copies of all documents filed in the Snake River Basin Adjudication will not be mailed to all parties (claimants) in the adjudication.

By order of the court, any document filed with the court will be mailed only to those parties who may be directly affected by it. A monthly docket sheet will be prepared by the department which contains a summary of all documents filed with the court in the previous month and the dates and locations of hearings scheduled for the following three months. The docket sheet will be filed with the district court clerk in each county within the Snake River Basin in Idaho. Copies of the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying. If you wish to receive a copy of the docket sheet each month, you should mark the appropriate place on your notice of claim form. You will be charged a small annual subscription fee to cover the cost of copying and mailing. Copies of any document listed on the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying.

Copies of all notices of claims filed with the department will be available for inspection from all offices of the department. Copies of the notices of claims may be obtained in person or by mail, but you will be charged for the cost of copying and mailing. (A claimant will not be charged for a copy of his or her own notice of claim, and a person who acquires property with water rights for which a notice of claim was filed will not be charged for a copy of the notice of claim filed by the previous owner.)

After the notices of claims have been reviewed, the director will prepare and file a report with the court. Part 1 of the report will contain the director's recommendations as to each water right claimed under state law. Part 2 of the report will list each federal reserved water right claimed. A number of reports will be prepared, one or more for each sub-basin in the Snake River Basin. When the report for your sub-basin is filed with the court, you will be mailed a notice informing you that the report for your sub-basin has been filed. The notice will be sent to the most recent address shown by the department's files. Attached to the notice will be a copy of those portions of the report describing the water rights you have claimed. If you do not agree with the way your water right is described, you may file an objection to the report with the court. You can also file an objection if you disagree with the way other claimant's water rights are described, and the notice will tell you where a copy of the full report is available for inspection. The notice will tell you when and where to file your objection. The notice of filing for each sub-basin report will also be published state-wide in local newspapers.

11. In which county (ies) are lands listed above as place of use located? Owyhee

12. Do you own the property listed above as place of use? Yes X No _____
If your answer is No, describe in Remarks below the authority you have to claim this water right.

13. Describe any other water rights used at the same place and for the same purposes as described above.
57-00265, 57-01108, 57-01109, 57-01111 or None ()

14. Remarks:

Use of this right with the rights listed above is for the irrigation of 119 acres with a combined diversion rate of 3.60 cfs. This water right is based upon the historical diversion and use of the high flows that normally occur, briefly, each year in the Upper Reynolds Creek basin. Use of this right may occur prior to the beginning of the normal irrigation season since the water user must take advantage of the high flows as they occur. This right is for the diversion and use of up to 3.5 acre-feet per acre annually.

It is very important that you inform the department in writing of any change in your address. This is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

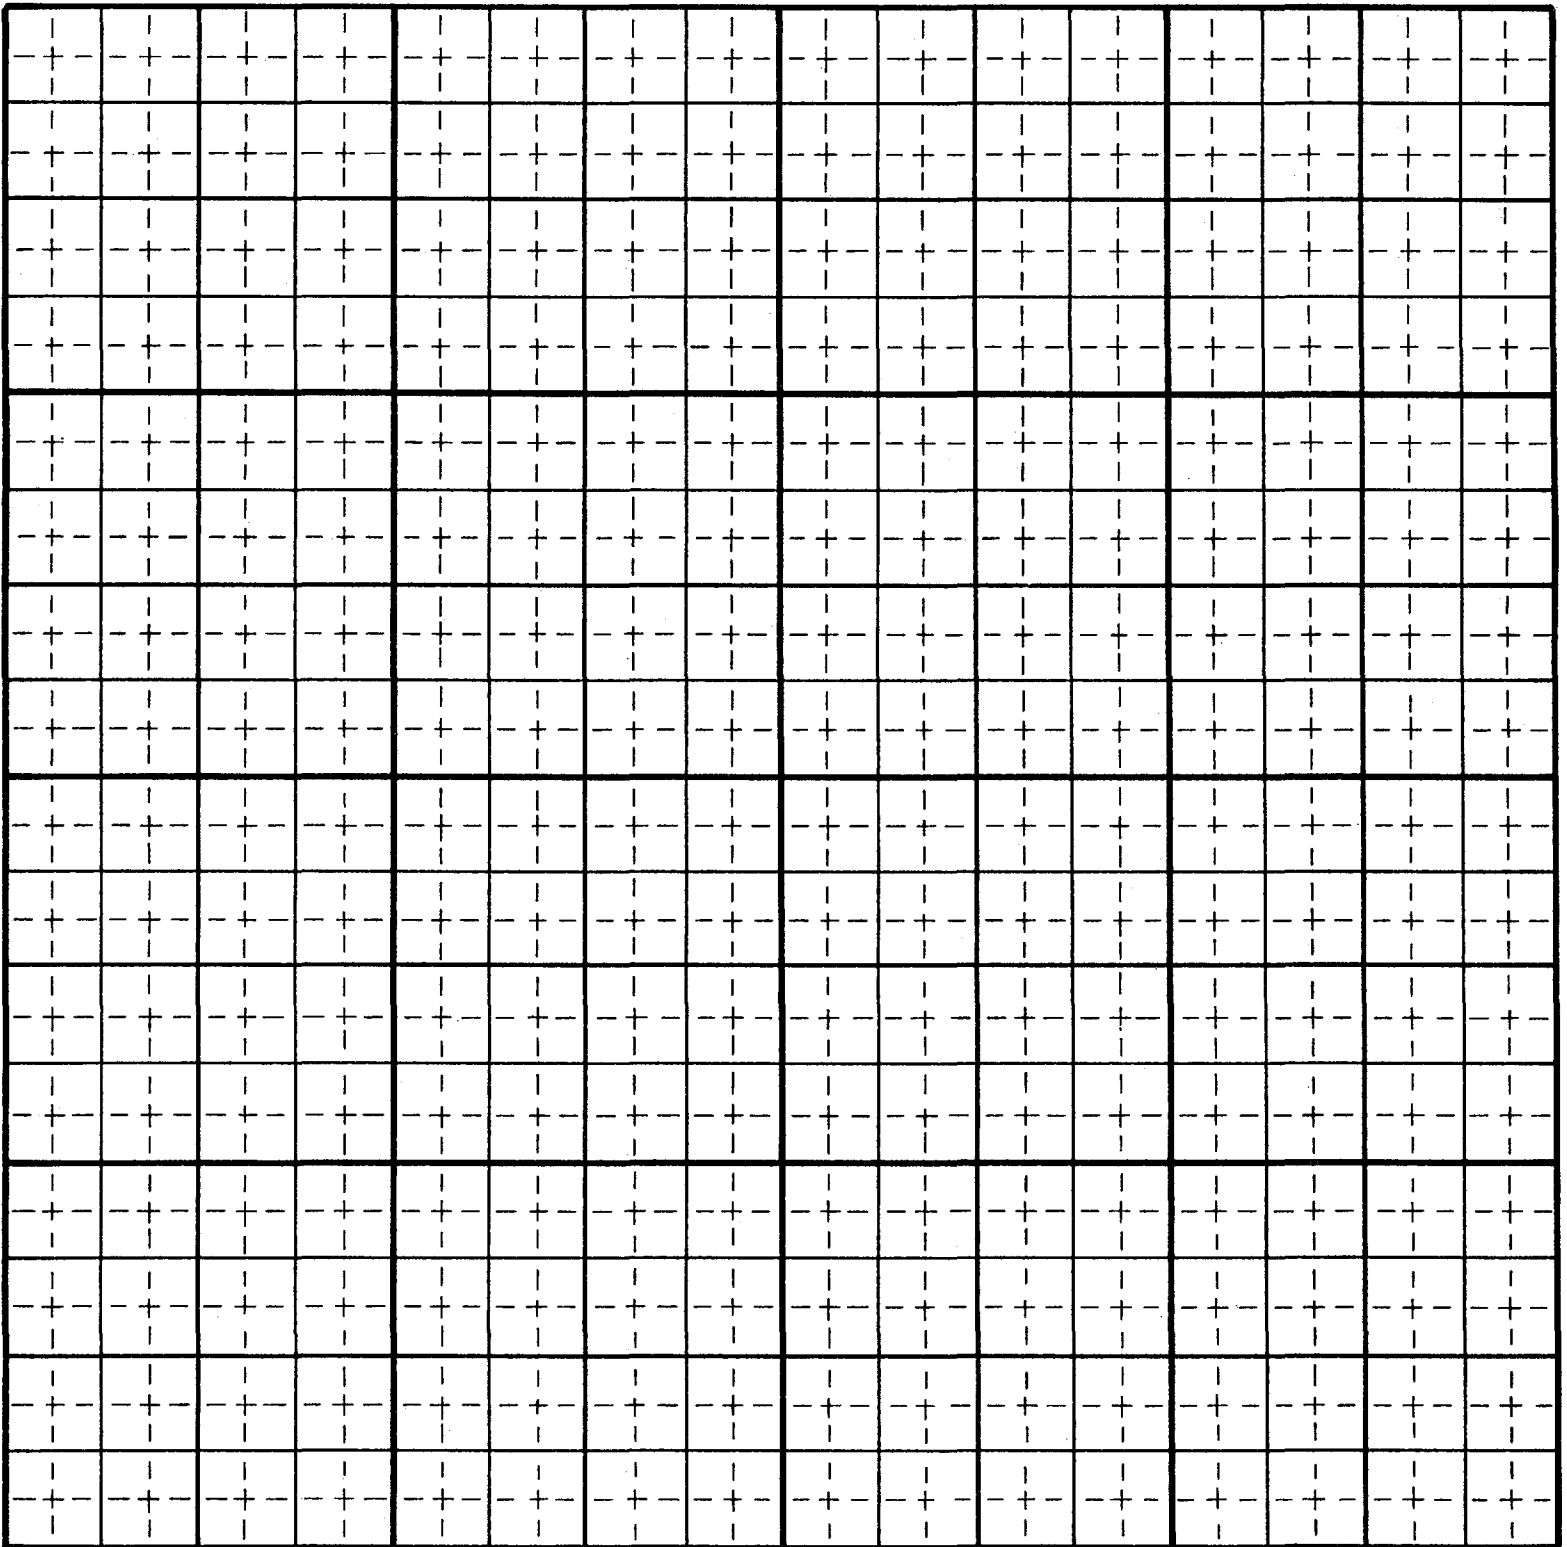

If you are acquiring property with water rights in the Snake River Basin water system in Idaho (either by purchase, gift, inheritance, or other means), it is very important that you inquire of the department whether a notice of claim has been filed. If not, you must file a notice of claim or the water right may be declared by the court to no longer exist. If a notice of claim has been filed, it is very important that you file a written notice of change in ownership with the department. The notice of change in ownership must be accompanied by some evidence of the change in ownership, such as a copy of the deed or a property tax statement showing the name of the new owner. Again, this is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

The cost of the subscription to the docket sheet is \$7.50 for calendar year 1988. The cost of the subscription may increase a small amount for calendar year 1989 if the cost of copying and/or mailing should increase.

If you are planning to file a motion or other pleading (not a notice of claim) with the court (not IDWR), the court has issued an order setting a special procedure that is different from the usual civil rules. A copy of the order may be obtained from any office of IDWR; you may be charged for the cost of mailing and/or copying.

IN THE MATTER OF THE APPLICATION)
OF THE WATER USERS OF REYNOLDS)
CREEK FOR THE CONSOLIDATION OF) --DECISION--
WATER DISTRICTS NO'S 13-A & 13-B.)

Upon receiving a petition from the Water Users in Water District No. 13-A asking for the consolidation of Districts No's 13-A and 13-B., a protest against carrying out the proposed plan was received from Water Users in District No. 13-B on Upper Reynolds Creek.

A hearing, which was attended by a number of Water Users from both Districts was held on June 10, 1942, at which time the various points involved were discussed.

The principal contention of the Lower Creek Water Users was that regulation in the Upper District in the early spring was delayed to long, with the consequence that more water was diverted by the Upper Users than their rights called for cutting the Lower Users short. It was admitted by the protestants that large amounts of early water was actually applied to the Upper lands, but that on account of the porous nature of the soil and the nearness of the irrigated lands to the bed of the creek that a very large proportion of the water was returned to the creek above any diversion in the lower district and thus did not materially affect the creek in so far as the lower users are concerned. Since the matter of return flow in the creek was a very important consideration and much conflicting testimony was given it was

A57-11565

decided by the Commissioner to make certain water measurements in Reynolds Creek to determine the facts. These measurements were made on July 1st, and it was found that with a total diversion into the Water Users ditches in No. 13-B greater than the total surface inflow into the creek from all sources there was a return flow measured at the head of District No. 13-A equal to 75% of the total water in District No. 13-B. i. e. of all the water used to fill the decrees in the Upper District only 25% of it was actually used the remainder appearing in the creek below for use in District No. 13-A.

This would indicate that ground conditions are such that no great harm can be done the lower users by applying an excess of water to lands in the Upper District, in fact this ground storage actually might be beneficial. In the early or run off period, however, before the return flow gets back to the stream, excess water on the Upper lands may short the Lower Users for a brief period of time.

In view of the incomplete stream records and the lack of information as to operating conditions it is hereby decided that the position for the consolidation of Districts No. 13-A. and 13-B., be denied, however with the following provision for the year 1943; that District 13-B call its watermaster for duty on or about the date Watermaster in No. 13-A assumes his duties in the spring, both Watermasters to be under the direct supervision of the Commissioner of Reclamation.

Howard Lawlis, being first duly sworn, on oath, deposes and says:

That he is now of the age of eighty-three (83) years, and upwards, and fully competent to execute this affidavit; that said affiant is a resident of Nampa, Canyon County, Idaho, and has lived in said County for upwards of thirty-two years; that he is a citizen of the United States of America;

That this affiant came into Owyhee County, Idaho, in the year 1915, settling in the Reynolds Creek area where he was employed by ranchers and stockmen as a range rider and hand; that this affiant then worked for one Hicks on the old Keller Ranch and subsequently purchased the Dr. Noble Ranch where he ran his own stock and ranched;

That said affiant was well and personally acquainted with Lorenzo Uberauga and Elias Gabicaand, on occasion, was employed by them beginning in the year 1915; that they operated a ranching operation on Reynolds Creek and that this affiant is fully familiar with the manner in which they applied waters from Reynolds Creek as well as snow-melt run-off waters and flood waters to the lands upon which the aforesaid parties ranched and farmed;

That the application of flood water was always consistent in that every year and by whatever means were available, said waters were appropriated and applied, and that this practice continues to date;

Said affiant further states that he is knowledgeable regarding the history and operation of the Gifford Ranch (Bass), Uberauga Ranch (Gabica), Adams Ranch (Hoagland) and Joe Mitchell Ranch (Nettleton), that these places all have 1864 water rights and that flood waters from all available sources have been consistently applied to these properties throughout the period 1915 to the present time.

To whom it may concern,

I purchased an interest, with my brother, in the Adams ranch on upper Reynolds Creek in 1943. In 1950 I bought his interest and moved with my family to the ranch and operated the place through 1972. Then I formed a family corporation with my wife, my son, and my daughter under the name- Seven High Ranch Inc. We have since purchased other lands in the Reynolds Creek area and continue our ranching operation.

Upper Reynolds Creek watershed extends about 9 miles south of the ranch and ranges 7000 ft down to 3500 ft. Our only source of irrigation water is from this Creek. The spring runoff varies with the weather conditions from high to low snowfall and wet or dry seasons. This makes very uncertain stream flows from high flooding to minimal water. We have to plan our irrigation when the water is available.

Some years we start to irrigate in late February and the first of March if the water is available. Normally the main highwater flows occur in March, April, and early May. In late May and early June the stream flow is decreasing and water is divided by decreed priority water rights. In July the irrigation is very minimal. It is critical to get the early watering to recharge the soil for the later crops when the water is gone.

To whom it may concern:

We lived on the Lobbington Ranch in Reynolds Creek, Owyhee Co. - from 1952 to 1972 and used the Reynolds Creek water for irrigation. Some years we began to clean ditches and irrigate very early in the spring time. There were years we were irrigating in early February.

Every ranch depended on Mother Nature to supply enough water for their crops.

May the water users on that water shed continue to have access to the waters in future years to come.

Sincerely

Evelyn Cummings
