Remarks: Pump and motor are mounted on the top of the casing. There is no curbing, no well house, no protection from the elements except a canvas tied over the pump and motor. Delivery is to the West into an 8" pipe through a 6" valve, thence into the aprinkler system. A 2" pipe also takes off from the delivery and leads to a storage tank or cistern, which is located 6' to the South and East of the Well. The cistern is made of concrete and concrete blocks and holds sufficient water to last the household approximately one month at each filling. Following is a list of the aluminum pipe for the sprinkler system: 27 pieces of 3" diameter by 36' long, 6 pieces of 4" by 36' long, 12 pieces of 4" by 24' long, 15 pieces of 6" by 24' long. There are 32 sprinkler heads with nozzle openings of 11/64 and 3/32. The ground irrigated is the ground laying in the field to the West plus a small amount in the area of the house. A total of approximately 34.7 acres is irrigated from the sprinkler system.
This examination was made on the 3rd day of February, 1951.
