RE: Amending claim

Mr. Deakins visited office yesterday to discuss amending claim to show actual 1.4 Acres irrigation instead of recorded 1.9 Acres.

I thought it was about an ownership change but actually involves claim filed by DEAKINS.

To change claim, it should be amended either on original (=amended one signed 1-13-92) or by filling out fresh form & labelling as Amended. No fee needed.

Get info to claimants for them to decide what to do.

FROM: DANIEL A. NELSON *DAN*

DATE: 11/29/99

RE: **RONALD WOLFE TRANSFER, RIGHT 63-02833**

The transfer proposes to split the right and add a point of diversion for the applicant's portion.

DOCUMENTS AND APPLICATION PREPARATION

The application consists of 6 pages and 3 attachments. Note the location of the following application items:

Attach. A – Snake River Basin Adjudication claim for applicant's portion of water right 63-02833

Attach. B – Subdivision map of the property copied from adjudication files.

Attach. C – Warranty deed copied for adjudication files (2 pages C – C1).

The applicant prepared the application with assistance from Lori Graves.

Other information used in this review includes an adjudication split tree, CSFA aerial photo copied from adjudication files showing original acres and SRBA splits, scanned 1987 Aerial photo showing irrigation in 1987, scanned IDWR aerial photo showing irrigation in 1994, Place of use Comparison report, and volume determination sheet. All of these sheets are attached to this memo.

CURRENT RECORDS & PROPOSED CHANGE

63-02833 is a licensed right for domestic and irrigation uses for 1.2 cfs for 70 acres (see attached CSFA photo). Approximately 61.9 acres have been claimed in the SRBA under claim numbers A63-02833B, A63-02833C, A63-02833D and A63-02833E (see adjudication split tree). This transfer would affect the A63-02833E portion of these split adjudication claims (see attach. A). The license and the SRBA claims are similar, except for the acres and the diversion rates. The SRBA claims show 61.9 acres have been claimed of the 70 acres originally licensed. The SRBA claims also show a total diversion rate of 1.234 cfs or approximately .02 cfs per acre. This right was originally licensed for 1.20 cfs or .017 cfs per acre.

The 1987 and 1994 aerial photos show that 10 acres of the originally licensed acres have been subdivided or have not been irrigated (see attached aerial photos). Since people in the subdivision have the option to claim a portion of this water right, I would recommend that the SRBA claims reflect the original license and only allow .017 cfs per acre to avoid future expansion problems.

VERIFICATION & OTHER ANALYSIS

A copy of the warranty deed was copied from the adjudication file for this property (see attach. C). The applicant originally owned 10 acres of this license, but has since sold 5 acres of the 10 acres and is only requesting that this transfer apply to the 5 remaining acres under his ownership.

The 1987 NAPP aerial photo and the 1994 IDWR scanned photo (see-attached photos), both shows that approximately 61.9 acres have been irrigated for farming purposes. The portion being transfer has been irrigated throughout the process. There seems to be subdivision in the 10 acres described in the license that is no longer being used for farming. The remainder of the 10 acres not covered by the subdivision seems to be a gravel pit or other non-irrigated property.

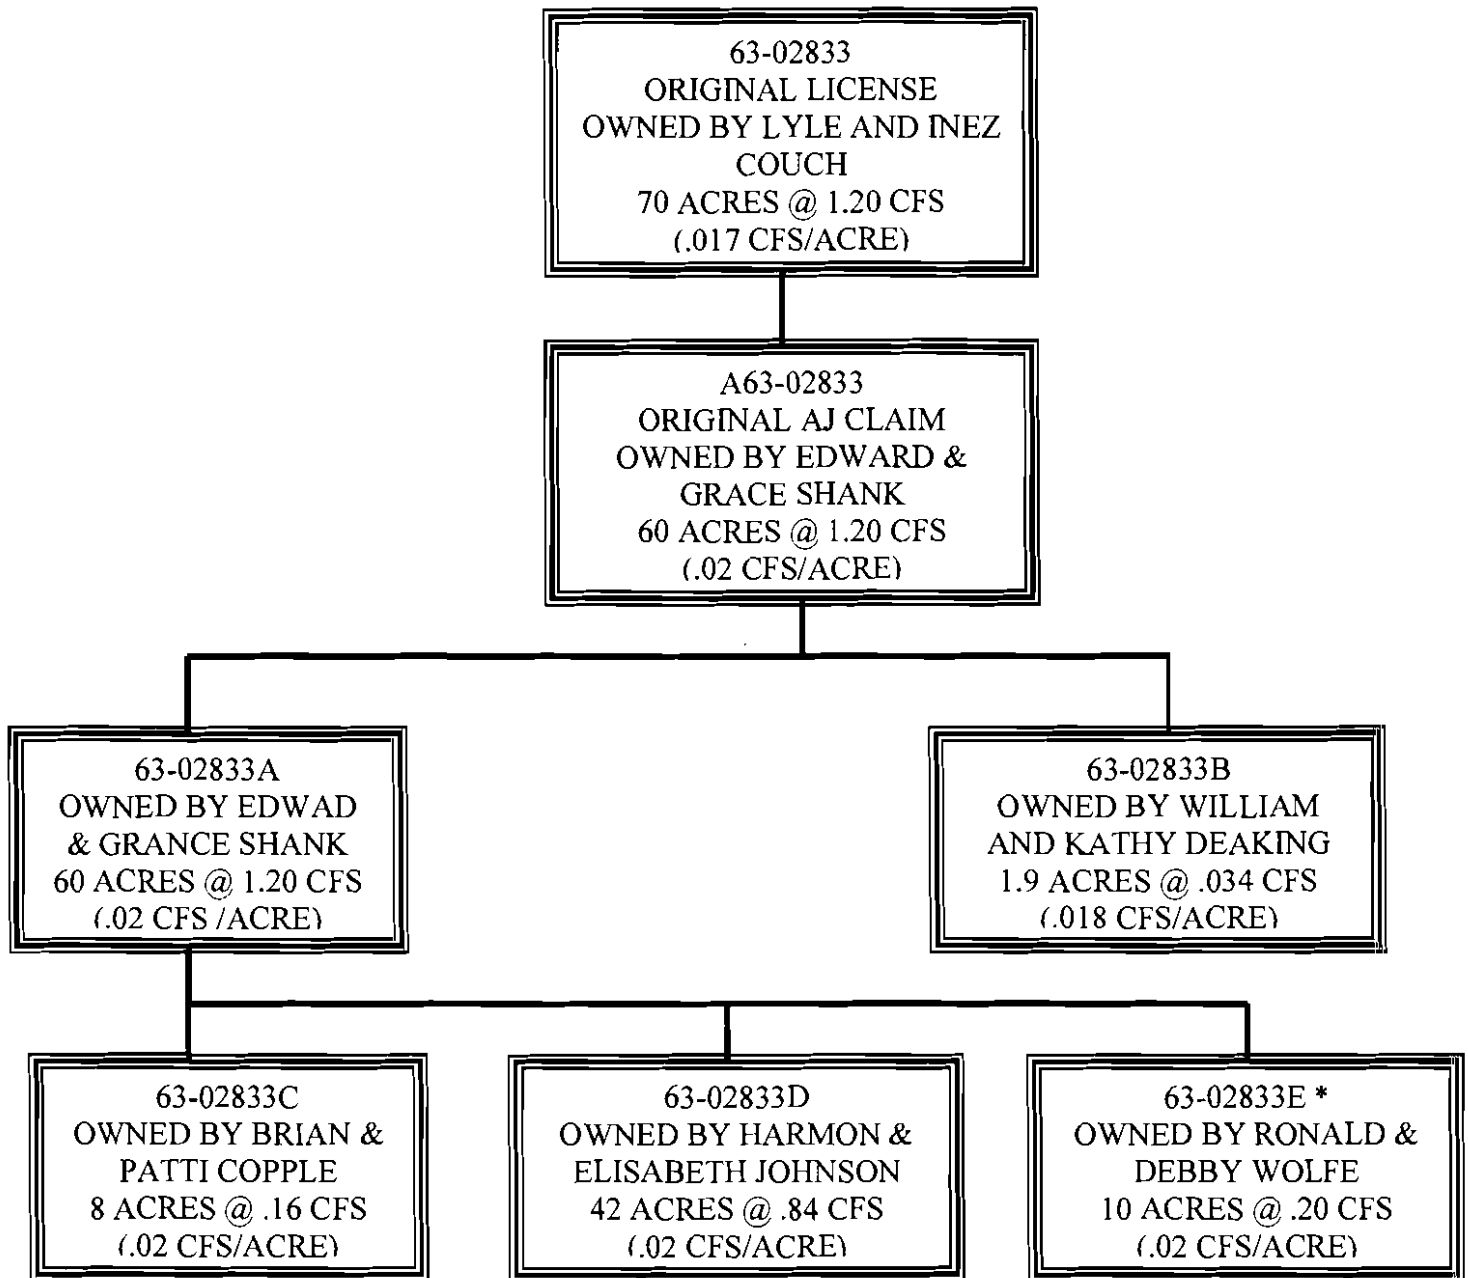

No overlapping water rights could be found for the place of use or point of diversion except for the adjudication claims that were split from this water right (see Place of Use Comparison Sheet).

The original license and adjudication claims do not reflect an annual volume. I performed annual volume calculations and determined that the total volume for 63-02833 should be 315 afa or 4.5 afa/acre. Therefore, this water right should have an annual volume of 22.5 afa for the 5 acres described in this transfer. The diversion rate should be .017 cfs or a total of .09 cfs for the 5 acres (see attached volume comparison sheet).

RECOMENDATIONS

I recommend that this transfer be approved .09 cfs and 22.5 afa for 5 acres of irrigation and a new point of diversion in the NWNE $\frac{1}{4}$ $\frac{1}{4}$ of S6, T2N, and R2W for the 63-02833B. 63-02833A should cover the remaining 65 acres at 1.11 cfs and 292.5 afa pending SRBA review. Since the subdivision could claim a portion of the original right it would be prudent to allow the SRBA to determine the final status of the 63-02833A in the their recommendations.

ADJUDICATION SPLITS FROM WATER RIGHT # 63-02833

* THIS 10 ACRE LOT HAS BEEN SPLIT AND THIS TRANSFER IS TO HAVE THE WATER RIGHT REFLECT THE SPLIT IN THE WATER RIGHT AND TO ADD A NEW POINT OF DIVERSION FOR THE 5 ACRES OWNED BY THE WOLFES.

RE: Notice of Claim to a Water Right No. A63-02833B

Dear Ms. and Mr. Deakins:

IDWR's initial investigation of the Notice of Claim listed above indicates that there has been a point of diversion and purpose of use as described below:

Previous point of diversion:	Twp. 02N, Rge. 02W, s. 6, NWNE
New points of diversion:	Twp. 02N, Rge. 02W, S. 6, NENWNE, NWNWNE
Previous purpose of use:	Irrigation
New purposes of use:	Irrigation and Domestic

A water right owner who has made a change in use of a water right prior to commencement of the SRBA without prior IDWR approval may claim the change in the SRBA. However, IDWR may recommend a right as changed only if the change meets certain requirements. One of those requirements is that the change not result in injury to other water rights, or that the change be conditioned to prevent injury to other water rights.

Before IDWR may recommend your claim, you must provide IDWR with the date the change was made and some evidence tending to support that date. If the change was made before November 19, 1987, then the date provided must include the month, day and year. If the change was made after November 19, 1987, then the evidence need only support that the change occurred sometime after November 19, 1987. An information sheet is enclosed that describes the types of evidence that can be submitted for showing the date of the change.

Your response must be received by this office by the response date shown above. If no response is received, then your claim to water from the new point of diversion will not be recommended to be decreed.

If you need additional information, please contact this office.

RE: Amended Claim No. A63-02833B

Dear Mr. and Mrs. Deakins:

Enclosed is the your amended notice of claim, which reflects an accomplished transfer of a portion of the existing irrigation water right to a domestic use. This action will take the place of the traditional transfer process which Bill and I discussed. The result is the same: a domestic use with an effective priority of 1950. An accomplished transfer implies:

1. The change was made within a five year time frame, so that no forfeiture of the water right occurred due to nonuse. From my discussion with Kathy, it appears that this is not a problem, as crop irrigation continued on the entire parcel until the house was constructed.

2. The change occurred prior to 1987. Your well log and/or home deeds will verify this. A change analysis to determine possible injury may have to be conducted by IDWR; you will be notified if we need additional information.

Please have the claim signed before a notary (only one signature is required) and return it to me. No additional fees are necessary.

Sincerely,

Cindy Hodges
Sr. Water Resource Agent
