MEMORANDUM

TO: FILE

FROM: DANIEL A. NELSON *DAN*

DATE: 11/29/99

RE: **RONALD WOLFE TRANSFER, RIGHT 63-02833**

The transfer proposes to split the right and add a point of diversion for the applicant's portion.

DOCUMENTS AND APPLICATION PREPARATION

The application consists of 6 pages and 3 attachments. Note the location of the following application items:

Attach. A – Snake River Basin Adjudication claim for applicant's portion of water right 63-02833

Attach. B – Subdivision map of the property copied from adjudication files.

Attach. C – Warranty deed copied for adjudication files (2 pages C – C1).

The applicant prepared the application with assistance from Lori Graves.

Other information used in this review includes an adjudication split tree, CSFA aerial photo copied from adjudication files showing original acres and SRBA splits, scanned 1987 Aerial photo showing irrigation in 1987, scanned IDWR aerial photo showing irrigation in 1994, Place of use Comparison report, and volume determination sheet. All of these sheets are attached to this memo.

CURRENT RECORDS & PROPOSED CHANGE

63-02833 is a licensed right for domestic and irrigation uses for 1.2 cfs for 70 acres (see attached CSFA photo). Approximately 61.9 acres have been claimed in the SRBA under claim numbers A63-02833B, A63-02833C, A63-02833D and A63-02833E (see adjudication split tree). This transfer would affect the A63-02833E portion of these split adjudication claims (see attach. A). The license and the SRBA claims are similar, except for the acres and the diversion rates. The SRBA claims show 61.9 acres have been claimed of the 70 acres originally licensed. The SRBA claims also show a total diversion rate of 1.234 cfs or approximately .02 cfs per acre. This right was originally licensed for 1.20 cfs or .017 cfs per acre.

The 1987 and 1994 aerial photos show that 10 acres of the originally licensed acres have been subdivided or have not been irrigated (see attached aerial photos). Since people in the subdivision have the option to claim a portion of this water right, I would recommend that the SRBA claims reflect the original license and only allow .017 cfs per acre to avoid future expansion problems.

VERIFICATION & OTHER ANALYSIS

A copy of the warranty deed was copied from the adjudication file for this property (see attach. C). The applicant originally owned 10 acres of this license, but has since sold 5 acres of the 10 acres and is only requesting that this transfer apply to the 5 remaining acres under his ownership.

The 1987 NAPP aerial photo and the 1994 IDWR scanned photo (see-attached photos), both shows that approximately 61.9 acres have been irrigated for farming purposes. The portion being transfer has been irrigated throughout the process. There seems to be subdivision in the 10 acres described in the license that is no longer being used for farming. The remainder of the 10 acres not covered by the subdivision seems to be a gravel pit or other non-irrigated property.

No overlapping water rights could be found for the place of use or point of diversion except for the adjudication claims that were split from this water right (see Place of Use Comparison Sheet).

The original license and adjudication claims do not reflect an annual volume. I performed annual volume calculations and determined that the total volume for 63-02833 should be 315 afa or 4.5 afa/acre. Therefore, this water right should have an annual volume of 22.5 afa for the 5 acres described in this transfer. The diversion rate should be .017 cfs or a total of .09 cfs for the 5 acres (see attached volume comparison sheet).

RECOMENDATIONS

I recommend that this transfer be approved .09 cfs and 22.5 afa for 5 acres of irrigation and a new point of diversion in the NWNE $\frac{1}{4}$ $\frac{1}{4}$ of S6, T2N, and R2W for the 63-02833B. 63-02833A should cover the remaining 65 acres at 1.11 cfs and 292.5 afa pending SRBA review. Since the subdivision could claim a portion of the original right it would be prudent to allow the SRBA to determine the final status of the 63-02833A in the their recommendations.

Dear Claimant(s):

We have recieved and processed a Change of Ownership for a portion of the original Claim to a Water Right Number as referenced above. This change of ownership required a split of the original claim resulting in renumbering this claim by adding alpha suffixes to represent each split. The new Notice of Claim to a Water Right number for your portion is referenced above and a copy is enclosed.

Your portion of this claim has a specified point of diversion, nature of use and place of use. If you plan on changing the nature of use, place of use or point of diversion under this right, including adding a new point of diversion, then an Application for Transfer on your portion of this right is required. Please contact this office for further information on the Application for Transfer form. If you do not plan on changing any items on your claim, then no further action is required at this time. You will be notified of any future action taken on this claim.

Please feel free to contact this office if you have any questions concerning your claim or this letter.

Sincerely,

Maria H. Nicucci

RE: Notices of Claim to a Water Right No: A63-02833A

Dear Mr. and Mrs. Shank:

Enclosed are copies of the "Notice of Change of Water Right Ownership" forms which have been submitted to this office. These forms identify you as the former owner of the above-referenced water right.

This letter is to notify you that the ownership of the water right has been changed to the names identified as the "New Owner/Claimant" on the enclosed forms. This change reflects the change in ownership of the land and appurtenant portion of the water right to each of the new owners.

If you have any questions regarding this matter, please do not hesitate to contact this office.

Sincerely,

Maria Minicucci

RE: Notice of Claim to a Water Right No. A63-02833A

Dear Mrs. and Mr. Johnson:

This office has received information that you are now the owner of a portion of the property represented in the above-referenced claim filed by Edward and Grace Shank in the Snake River Basin Adjudication (SRBA). A report which summarizes the Shanks' claim is enclosed with this letter.

In order to change to ownership on your portion of the claim, you must complete the enclosed form by adding your dated signature and returning the form to this office. Proof of ownership is not required, as the title company has already sent the warranty deeds to this office.

IDWR assumes that you are using the original well. If you are not using this well for irrigation, or are planning to drill a new well in the future, you must obtain an approved Application for Transfer with IDWR. The application form is available from this office.

Please complete the enclosed form by adding your dated signature and return the form to this office. The Shanks' claim will then be split and a copy of your portion of the claim will be sent to you.

If you have any questions or need additional information, please do not hesitate to contact me at this office.

Sincerely,

Maria Minicucci

RE: Notice of Claim to a Water Right No. A63-02833A

Dear Mr. and Mrs. Shank:

This letter seeks clarification of several items in the above-referenced claim. A copy of the claim is enclosed.

The first clarification needed is regarding the acres irrigated. On your claim you indicated that the land in the northwest corner of your property, near the well, is not irrigated with water from the well. According the 1987 ASCS map (enclosed), the ground in this area is irrigated. Please indicate on the enclosed copy of the 1987 ASCS map the acres which are irrigated from the well.

The total number of irrigated acres found by ASCS is 61.6. You have claimed 60 acres. If all of the irrigated acres are irrigated from the well you may amend your claim to include the total acres irrigated from the well. Please contact me at this office if you wish to add acres to your claim.

The second clarification needed pertains to ownership of land on the western edge of the irrigated fields. The Deakins of 11882 Nez Perce Road have indicated that they own one acre which they lease to you as a part of your farming operation. It is unclear if you have also claimed this acre. Please indicate on the enclosed map if any of the irrigated acres are leased from the Deakins.

Finally, I would like to confirm the location of the irrigation well. If you could mark the well in some manner (a piece of cloth, a pile of stones) I will stop by the well the next time I am in the area.

Thank you for your assistance. If you have any questions please do not hesitate to contact me at this office.

Sincerely,

Maria Minicucci

Dear Mr. and Mrs. Shank:

During normal review and filing of the Notice of Claim to a Water Right No. A63-02833, previously submitted during the Snake River Basin Adjudication, it was necessary to change the claim identification number on this notice. Your claim is still in good standing with the Department, and the number change was needed due to our numerical filing procedures.

Enclosed is a computer generated copy of your new Notice of Claim to a Water Right No. A63-02833A. Please review this claim for completeness and if you have any questions or problems, do not hesitate to contact us.
