NOTES: E. 11/29/1995: Field exam found no irrigation occurring. Vegetation did not look different than that in N $\frac{1}{2}$ SW $\frac{1}{4}$ S.13, which is not irrigated (has no water rights). However the power appeared to be still to the well. * 11/30/1995: Field exam confirms well location in S $\frac{1}{2}$ SW $\frac{1}{4}$, but also found well in N $\frac{1}{2}$ NE $\frac{1}{4}$ SW. The first well still has a power connection but the 2nd well does not. The second well has power at the well but the power lines go up the hill to the southwest (toward the red cement building) and stop at a pole east of the bldg (see photos). TTT

APPLICATION FOR AMENDMENT
TO PERMIT TO APPROPRIATE THE PUBLIC WATERS
OF THE STATE OF IDAHO, NO. G-23013

Comes now Frances Maglecic and represents to the State Reclamation Engineer of the State of Idaho:

That she is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho, No. G-23013.

That the point of diversion is described in said permit as being located SW $\frac{1}{4}$ Section 13, Township 2 North, Range 3 West, B.M.

That she now requests that an additional point of diversion be added at a point located NE $\frac{1}{4}$ Section 13, Township 2 North, Range 3 West, B.M.

That her reasons for desiring to make such change are as follows: In order to obtain a sufficient amount from the first well. It fills up with sand and for that reason a smaller amount only can be developed.

That no one will be injured by such change, and that such change will be made at Permit Holder's own risk.

Signed at Boise, Idaho, this 26th day of August, 1954.

/s/ MRS. FRANCES MAGLECIC

DATE of receipt at Department of Reclamation Aug. 26, 1954.

APPROVAL OF STATE RECLAMATION ENGINEER

I, E. N. Humphrey, Deputy State Reclamation Engineer of the State of Idaho, hereby approve the above and foregoing application for amendment to Permit to appropriate the Public Waters of the State of Idaho, No. G-23013. This approval constitutes a new permit and is issued as an amendment to the original permit, to which it refers and of which it becomes a part, and said application is approved only insofar as the rights of others will not be adversely affected thereby.

E. N. HUMPHREY
Deputy State Reclamation Engineer

APPROVAL OF STATE RECLAMATION ENGINEER

I, Mark R. Kulp, State Reclamation Engineer of the State of Idaho, hereby extend the time for the completion of construction work under Permit to appropriate the Public Waters of the State of Idaho, No. G-23013 to September 9, 1957.

Witness my hand this 11th day of July, 1955.

MARK R. KULP
State Reclamation Engineer

ASSIGNMENT

For value received, I hereby assign 2/3 (two-third) my right, title, and interest in and to Permit to appropriate the Public Waters of the State of Idaho, No. G-23013 to Ladislav Maglecic of Route #4, Nampa, Idaho. That portion which pertains to the S $\frac{1}{2}$ NW $\frac{1}{4}$ of Sec 13., Twp. 2 N., Rge 3 W., B.M.

Remarks: At first he used 9 stages and it pumped
so much sand with the water that he took off
two stages to cut down the amount.

Water was not measured but he has much more
motor than necessary to lift the water.

Re: Notice of Claim to a Water Right No. A63-02911

Dear Ms. Minicucci:

I recently received your August 3rd letter which apparently was misdirected because of an error in the zip code on my address in Laguna Niguel.

Your first letter of July 7th had the correct zip code, 92677. The second letter apparently has a typographical error and was mailed to Laguna Niguel, California 93677, which apparently was held for a period of time and then delivered?

In any event, because of the delay in the delivery and the fact that I was gone the last week of August, I was unable to respond by September 5th, however I believe the response probably is moot.

I notice, from the documents that you mailed me August 3rd, that there is simply a typographical error in the Notice of Claim to Water Right. There has never been a diversion of the water right, nor any claim to diversion. On page 1 of the Notice of Claim to a Water Right, paragraph 5, I have indicated that well #1 is not in use, 330 feet deep (approximately) and was originally licensed (I believe at time of drilling) for 1.25cfs.

I reference well #2 as having a pump motor, being 509 feet deep, 16" casing and licensed for 1.6cfs.

Maria Minicucci
September 8, 1995

Page 2

On the third page, the "Map of Project" apparently I misnumbered the wells. Well #2, that which on page 1 is indicated as the well which is in use and which I believe is the well referenced in the license and certificate of water right issued to the prior owner, Ladislav Maglecic, priority date August, 1952, issued for 80 acres, apparently executed by a State Reclamation Engineer on the 19th of June, 1958.

I wrote in handwriting what I believe to be the correct 80 acres of my ground. I believe I simply misnumbered the two wells that I know exist.

I believe there also should have been some licensing in order to drill the additional well. It has never been used by me in the eleven years of owning this property and I do not know how long ago that well was actually used?

At this time the well that I am using, which has been in continuous use by me since I have owned the property (approximately eleven years) is the one referred to as "well #2" on page 1 and, incorrectly referred to as well #1 "in use" on page 3, the Map of Project page. It should probably have said well #2 - in use - to be consistent with page 1. I have never used the other well, nor do I know if anyone has ever requested change of use from any prior use. A copy of the State of Idaho license and certificate of water rights seems to also indicate the previous point of diversion as including the entire 80 acre parcel?

Thank you for your attention. Would you please make sure that the correction is made to the address and zip code in my file and let me know if anything further is needed from me. If I understand your letter of September 5th correctly, by simply indicating that I had misnumbered the wells on the map on page 3, it would appear that all other information is now consistent.

I have never used any well in any other location but merely mentioned the well since I understand that this well must be referenced since it is drilled, cased and sitting there. There is no pump or motor, nor has there been during the time I have owned the land. I believe there are transformers above the well and I believe it was used at some time in the past however I do not have up-to-date information on whether or not that well was ever licensed.

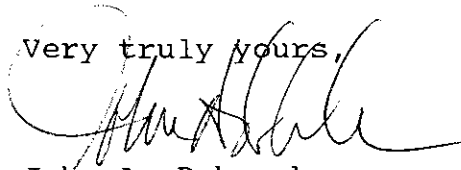

Thank you again for your attention. It would appear that there was no date of change of location at least by me and that this well may have been utilized, however never licensed. I have no intention of using the well or of installing a pump; in which case, with the exception of just the error in numbering of

the wells on page 3, the balance of the information is
consistent.

RESPONSE DATE: SEPTEMBER 5, 1995

RE: Notice of Claim to a Water Right No. A63-02911

Dear Mr. Babcock:

This letter is in response to your correspondence to this office dated August 1, 1995 about your property located in Twp. 02N, Rge. 03W, section 13, in Canyon County. You requested that we inform you of any information which is required.

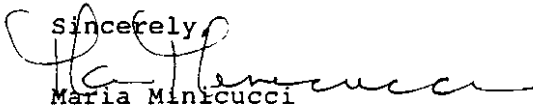

You filed a claim in the Snake River Basin Adjudication (claim no. A63-02911) based on water right license no. 63-02911. A copy of the claim you submitted to this office is enclosed. Please note that in Item 6, you indicated that there are two wells on the property. "Well #1", is described as 330 ft deep and not in use. "Well #2", is described as 509 ft deep, and currently used for this water right. However, on your map (page 3) you indicate that Well #1 is in use, and Well #2 is not in use. This discrepancy makes it difficult to determine where the well now being used is located.

Also enclosed is a copy of license no. 63-02911. This license authorizes the point of diversion (the well) for the water right in Twp. 02N, Rge. 03W, section 13, SW $\frac{1}{4}$ NW $\frac{1}{4}$. At this time IDWR requires information regarding the possible use of a well in another location.

The enclosed IDWR Information Sheet explains IDWR's requirements at this time. You must provide the IDWR with the date of change of the location of the point of diversion used for the water right as well as evidence to support that date. Please read the Information Sheet carefully for additional explanation.

Your response must be received by this office by the response date shown above. If no response is received, then your claim to water from the new point of diversion will not be recommended to be decreed.

If you have any questions or require assistance, please contact this office.

Sincerely,

Maria Minicucci
Water Agent, Adjudication Bureau

Re: Notice of Claim to a Water Right No. A63-02911

Dear Ms. Minicucci:

I received the July 7, 1995 State of Idaho Department of Water Resources letter Re: Notice of Claim to a Water Right No. A63-02911.

I reviewed my records and I do not know that there is any indication of a change, to the best of my knowledge, in point of diversion or that there is any indication of "new points of diversion" in my eighty acre farm.

I have owned this land for approximately ten years. I have the old water rights applications which I believe date back to sometime in the 1940's or 1950's.

There are two wells on the farm, one that I have used continuously for ten years and which I understand to be the well that was primarily used. There is a second well in another area of the farm. It could be, in filing the most recent water applications and/or following up with the perfection of water rights, that by mentioning the second well (no pump or motor; I have never used that well) that the particular point of diversion has not been perfected or was not part of the original application, or does not show on my well permits?

There is one well, that which is indicated as the active well in my application, which I have used and which has been in the same spot, servicing the same eighty acres, for the last ten years (my ownership) and, from what I understand, for twenty years prior thereto when the property was owned by a man named Codr, and I believe prior to that by a man named Maglicic.

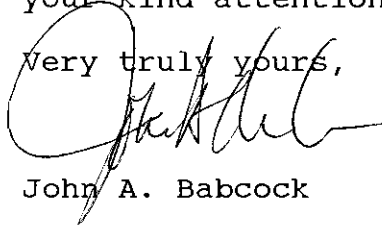

Maria Minicucci
August 1, 1995

Page 2

Is there anything further that I need to do at this point? I am not sure I even understand the "adjudication claim profile report" however, it appears to split my eighty acres into two different forty acre parcels, one SWNW, the other SENW. Since there has only been one well that services all eighty acres, for the ten years that I have owned the property, the "other well (not in use) which may have been referenced in prior water rights papers (by marking where I believed that well was on the farm) may have looked like a change in point of diversion?

Thank you for your prompt review and response. Please feel free to call me collect at my office in Laguna Niguel, California or fax to me at my fax number in Orange County, California (714) 249-6709. Thank you for your kind attention.

RE: Notice of Claim to a Water Right No. A63-02911

RESPONSE DATE: AUGUST 8, 1995

Dear Mr. Babcock:

IDWR's initial investigation of the Notice of Claim listed above indicates that there has been a change in point of diversion as described below:

Previous point of diversion: Twp. 02N, Rge. 03W, s. 13, SWNW
New points of diversion: Twp. 02N, Rge. 03W, s. 13, SWNW & SENW

A water right owner who has made a change in use of a water right prior to commencement of the SRBA without prior IDWR approval may claim the change in the SRBA. IDWR may recommend a right as changed only if the change meets certain requirements. One of those requirements is that the change not result in injury to other water rights, or that the change be conditioned to prevent injury to other water rights.

Before IDWR may recommend your claim you must provide IDWR with the date the change was made, and some evidence tending to support that date. If the change was made before November 19, 1987, then the date provided must include the month, day, and year. If the change was made after November 19, 1987, then a specific date is not necessary and the evidence need only support that the change occurred sometime after November 19, 1987. An information sheet is enclosed that describes the types of evidence that can be submitted for showing the date of change.

Your response must be received by this office by the response date shown above. If no response is received, then your claim from the new point of diversion will not be recommended to be decreed.

If you have any questions or need additional information, please contact this office.

Sincerely,

Maria Minicucci

APPLICATION FOR AMENDMENT
TO PERMIT TO APPROPRIATE THE PUBLIC WATERS
OF THE STATE OF IDAHO, NO. G-23013

Comes now Frances Maglecic and represents to the State Reclamation Engineer of the State of Idaho:

That she is the owner and holder of Permit to Appropriate the Public Waters of the State of Idaho, No. G-23013.

That the point of diversion is described in said permit as being located SW $\frac{1}{4}$ NW $\frac{1}{4}$ Section 13, Township 2 North, Range 3 West, R.M.

That she now requests that an additional point of diversion be added at a point located NE $\frac{1}{4}$ SW $\frac{1}{4}$ Section 13, Township 2 North, Range 3 West, R.M.

That her reasons for desiring to make such change are as follows: In order to obtain a sufficient amount from the first well. It fills up with sand and for that reason a smaller amount only can be developed.

That no one will be injured by such change, and that such change will be made at Permit Holder's own risk.

Signed at Boise, Idaho, this 26th day of August, 1954.
