Can-Ada Farms

A63-20487

Date: November 21, 1997

To: Kay Walker

From: Jim Johnson

Subject: Follow up to our conversation on water rig
03189, and 63-03339

=====

The present renter of the property came into the office today inquiring about the above referenced water rights.

During my investigation and conversation I learned the following.

The renter has been renting the farm from Can Ada the land owners for 25 years and is very familiar with the history of water use. He represented that only two wells have been used for irrigation. A third well somewhere in the SW part of section 12 had been drilled but because of pumping large amounts of sand the well was capped and has not been used.

The two wells are no longer interconnected and have been this way since the 60's. The well that has the 250 hp motor is used to irrigate the land owned by Can Ada and the well with the 400 hp motor is used to irrigate the other owner's property which is the South 1/2 half of section 12, North 1/2 half of section 13 and the NW 1/4 section 18.

63-03339

The fourth right, 63-03339, was issued for 4.66 cfs for lands and listed 520 acres. A condition on the license stated that the acre feet listed the license was the volume requirement for 233 acres. The 520 acres listed on the license corresponds to the lands owned by Can Ada as a result of modifications made to the application for amendment by Mr. Richard Davis. The examiner reported the water being used on 1088 acres. An additional fee had been requested from the right holder to cover the additional acres.

With the information I got today I don't believe the license should have been issued. The well is one of the two wells licensed under the three other rights listed above. The examiner apparently compared the serial number he took off the well with the serial numbers listed on the other three rights and when they did not match assumed the

well was not the same well listed in the SENE S 12 on the other three rights. Consequently a license was issued.

He also stated that "This system can be operated in conjunction with another system that irrigates the same acreage." I believe what he was reflecting is that another well was used to jointly supply water to the 1188 acres being irrigated by the system. The renter says only two wells were ever used. He uses the well with the 250 hp motor to irrigate the Can Ada lands and the other well with the 400 hp motor is used to irrigate lands not owned by Can Ada.

The examiner estimated rate of diversion of the well by listing sprinkler head discharge. He documented 14 handlines @ 32 heads per line (448 heads) with a flow of 4.72 gpm/head for a total of 4.69 cfs. The same examiner performed an examination on the three other rights listed above, four years earlier listing 429 sprinkler heads @ 5.13 gpm for a discharge of 4.9 cfs. I believe from the same well both reports list a 250 hp motor. The renter represents that only one 250 hp motor has ever been used. The other well has always had a 400 hp motor on it.

It does not appear that any additional water or irrigated land had occurred under this right over what was already licensed under the three existing rights.

The departments investigation of the claims filed on the four rights should consider the above information.
